Introduction

This document is a **simplified prospectus**. In this document:

- The funds offered under this simplified prospectus are referred to collectively as the **BMO ETFs** and each individually as a **BMO ETF**.
- Each BMO ETF is structured as a trust and issues **units** to its investors, and each such investor is a **unitholder**.
- The terms **we**, **us**, **our**, and **Manager** refer to BMO Asset Management Inc., acting in its capacity as the manager of the BMO ETFs.
- The term **BMOAM** refers to BMO Asset Management Inc., acting in its capacity as the portfolio adviser to the BMO ETFs.
- Your **financial advisor** is the individual with whom you consult for investment advice, and your **dealer** is the organization that employs your financial advisor.

This document contains selected important information to help you make an informed investment decision and to help you understand your rights as an investor.

This document is divided into two parts. The first part contains general information applicable to all of the BMO ETFs. The second part, which begins on page 128, contains specific information about each BMO ETF described in this document.

Look for these boxes

To make this document easier to understand, we have included supplementary material in boxes like this one. These boxes provide additional detail about the information in the main text.

Additional information about each BMO ETF is available in the following documents:

- the most recently filed ETF Facts document;
- the most recently filed annual financial statements;
- any interim financial report filed after those annual financial statements;
- the most recently filed annual management report of fund performance; and
- any interim management report of fund performance filed after that annual management report of fund performance.

These documents are incorporated by reference into this simplified prospectus, which means that they legally form part of this document, just as if they were printed as a part of this document. You can get a copy of these documents, at your request, and at no cost, by calling us toll free at 1-800-361-1392, or from your dealer.

These documents are available on the BMO ETF's designated website at www.bmogam.com/ca-en/resources/legal-and-regulatory-documents/#bmo-etfs.

These documents and other information about the BMO ETFs are available at www.sedarplus.ca.

Defined terms

This document contains many defined terms. The defined terms that appear most frequently appear in Table 1.

Table 1: Defined terms

Term	Definition
Accumulating Units	a series of units of certain BMO ETFs whereby distributions, if any, are paid by issuing additional units that will be automatically reinvested and consolidated
ADRs	American Depositary Receipts. An ADR is a type of negotiable financial security that is traded on a local stock exchange but which represents a security that is issued by a foreign publicly-listed company
Alternative BMO ETF	a BMO ETF that is an “alternative mutual fund” as defined by NI 81-102; each BMO ETF that is an Alternative BMO ETF is identified on the cover page as such
Basket	in relation to a particular BMO ETF, a group of securities or assets representing the constituents of the BMO ETF, as determined by us from time to time
beta	a statistic that measures the expected increase or decrease of an individual stock price in proportion to movements of the stock market as a whole
BMO Funds	ETFs, mutual funds or other investment funds managed by the Manager or an affiliate, including the BMO ETFs
BMO GAM	BMO Global Asset Management
business day	each day that the TSX is open for trading
CAD	Canadian dollar
CAD Units	the Canadian dollar denominated series of units of certain BMO ETFs
Cboe	Cboe Canada Inc.
CDS	CDS Clearing and Depository Services Inc.
CDS Participant	a participant in CDS that holds Units on behalf of beneficial owners of Units
Converge Options	customizable equity or ETF option contracts, known as Converge® Options, that reference the price return of an equity or ETF and are centrally cleared, but provide investors with the ability to customize key contract terms such as exercise price, style and expiration date
CRA	Canada Revenue Agency
Custodian	State Street Trust Company Canada in its capacity as custodian for each BMO ETF, except as otherwise indicated (see Gold bullion assets of BMO Gold Bullion ETF on page 10)
Designated Broker	a registered dealer, including BMO Nesbitt Burns Inc., an affiliate of ours, that has entered into a designated broker agreement with us, on behalf of one or more BMO ETFs, pursuant to which that registered dealer agrees to perform certain duties in relation to the BMO ETFs
Developed Market	as defined by MSCI, a set of countries whose members are Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the UK
Distribution Reinvestment Plan	the distribution reinvestment plan of each BMO ETF

Term	Definition
DPSP	deferred profit-sharing plan
EAFE	Europe, Australasia, and the Far East
eSecLending	Securities Finance Trust Company
ESG	environmental, social and governance
ETF	exchange-traded fund
ETF Dealer	a registered dealer that may or may not be a Designated Broker, including BMO Nesbitt Burns Inc., an affiliate of ours, that has entered into a continuous distribution agreement with us, on behalf of one or more BMO ETFs, pursuant to which that registered dealer may subscribe for, purchase and redeem Units of those BMO ETF(s) on a continuous basis from time to time
Exchange	each of Cboe and TSX
FHSA	first home savings account
Fixed Percentage Distribution Units	a series of units of certain BMO ETFs designed to provide investors with a fixed monthly distribution based on a target annual distribution rate which is based on the NAVPS at the end of the prior year, or in the case of a newly created series, based on a target annualized distribution rate which is based on the initial starting NAVPS
GIC	guaranteed investment certificate
GICS	the Global Industry Classification Standard, a hierarchical industry classification system, developed and maintained by MSCI, that classifies companies by sector, industry groups, industry, and sub-industry
Hedged to CAD Index ETFs	means, collectively, BMO Dow Jones Industrial Average Hedged to CAD Index ETF, BMO Emerging Markets Bond Hedged to CAD Index ETF, BMO Equal Weight Global Base Metals Hedged to CAD Index ETF, BMO Equal Weight US Banks Hedged to CAD Index ETF, BMO Equal Weight US Health Care Hedged to CAD Index ETF, BMO ESG US Corporate Bond Hedged to CAD Index ETF, BMO Global Consumer Discretionary Hedged to CAD Index ETF, BMO Global Consumer Staples Hedged to CAD Index ETF, BMO High Yield US Corporate Bond Hedged to CAD Index ETF, BMO Mid-Term US IG Corporate Bond Hedged to CAD Index ETF, BMO MSCI EAFE Hedged to CAD Index ETF, BMO MSCI Europe High Quality Hedged to CAD Index ETF, BMO Nasdaq 100 Equity Hedged to CAD Index ETF, BMO S&P 500 Hedged to CAD Index ETF, BMO Short-Term US IG Corporate Bond Hedged to CAD Index ETF, BMO US Preferred Share Hedged to CAD Index ETF
Hedged Unit ETFs	means, collectively, BMO Japan Index ETF, BMO Long-Term US Treasury Bond Index ETF, BMO MSCI USA Selection Equity Index ETF, BMO MSCI USA High Quality Index ETF, BMO S&P US Mid Cap Index ETF, BMO S&P US Small Cap Index ETF, BMO Short-Term US TIPS Index ETF, BMO SPDR Communication Services Select Sector Index ETF, BMO SPDR Consumer Discretionary Select Sector Index ETF, BMO SPDR Consumer Staples Select Sector Index ETF, BMO SPDR Energy Select Sector Index ETF, BMO SPDR Financials Select Sector Index ETF, BMO SPDR Health Care Select Sector Index ETF, BMO SPDR Industrials Select Sector Index ETF, BMO SPDR Materials Select Sector Index ETF, BMO SPDR Real Estate Select Sector Index ETF, BMO SPDR Technology Select Sector Index ETF, BMO SPDR Utilities Select Sector Index ETF, BMO US Aggregate Bond Index ETF, and BMO Premium Yield ETF
Hedged Units	the Canadian dollar denominated series of units of certain BMO ETFs where the foreign currency denominated portfolio assets allocable to the series of units are hedged back to the Canadian dollar

Term	Definition
Index BMO ETF	a BMO ETF that is an “index mutual fund” as defined by NI 81-102; each BMO ETF that is an Index BMO ETF is identified on the cover page as such
investment grade	a debt instrument assigned one or more of the following ratings: BBB- or better by Standard & Poor’s, Fitch or DBRS; or Baa3 or better by Moody’s
IRC	the Independent Review Committee of the BMO ETFs
LBMA	London Bullion Market Association
LIF	life income fund
LRIF	locked-in retirement income fund
MSCI	MSCI Inc.
MSCI ESG	MSCI ESG Research LLC
NAV	the net asset value of a BMO ETF or of a series of units of a BMO ETF, determined in accordance with the BMO ETF’s constating documents
NAVPS	the net asset value per unit of a series of units of a BMO ETF, determined in accordance with the BMO ETF’s constating documents
NI 81-101	National Instrument 81-101 <i>Mutual Fund Prospectus Disclosure</i>
NI 81-102	National Instrument 81-102 <i>Investment Funds</i>
NI 81-105	National Instrument 81-105 <i>Mutual Fund Sales Practices</i>
NI 81-107	National Instrument 81-107 <i>Independent Review Committee for Investment Funds</i>
Non-Hedged Units	as applicable, the CAD Units, USD Units, Accumulating Units and Fixed Percentage Distribution Units of the Hedged Unit ETFs
Non-Index BMO ETFs	each BMO ETF that is a Non-Index BMO ETF is identified on the cover page as such
Other Securities	securities, other than the constituent securities of an applicable Index, included in the portfolio of an Index BMO ETF, including ETFs, mutual funds or other investment funds, ADRs or derivative instruments.
Plan Agent	State Street Trust Company Canada
Precious Metals BMO ETF	a BMO ETF that is a “precious metals fund” as defined by NI 81-102; each BMO ETF that is a Precious Metals BMO ETF is identified on the cover page as such
®	registered trademark, used under licence
RDSP	registered disability savings plan
registered plan	a DPSP, FHSA, LIF, LRIF, RDSP, RESP, RLIF, RRIF, RRSP or TFSA

Term	Definition
REIT	real estate investment trust
RESP	registered education savings plan
RLIF	restricted life income fund
RRIF	registered retirement income fund
RRSP	registered retirement savings plan
SIFT trust	a specified investment flow-through trust within the meaning of the Tax Act
State Street	State Street Bank and Trust Company and its affiliates
Structured Outcome ETFs	each BMO ETF that is a Structured Outcome ETF is identified on the cover page as such
T+3 Instruments	any instruments for which trades customarily settle on the third business day following the date on which the terms of the trade are agreed
Tax Act	The <i>Income Tax Act</i> (Canada) and the Regulations promulgated thereunder as the same may be amended from time to time
TFSA	tax-free savings account
™	trademark, used under licence
Trading Day	a day on which a regular session of the Exchange on which the Units of a BMO ETF are traded is held and the primary market or exchange for the majority of the securities held by the BMO ETF is open for trading
Trustee	BMO Asset Management Inc. in its capacity as the trustee of the BMO ETFs
TSX	Toronto Stock Exchange
Underlying Fund	any fund, including a fund that is an ETF, in which a BMO ETF invests, which may include BMO Funds
Unit	In relation to a particular BMO ETF, a redeemable, transferable unit of that BMO ETF, which represents an equal, undivided interest in the net assets of that BMO ETF, and which include Accumulating Units, CAD Units, Fixed Percentage Distribution Units, Hedged Units and USD Units
US or U.S. or United States	the United States of America
USD	U.S. dollars
USD Units	the U.S. dollar denominated series of units of certain BMO ETFs
Valuation Agent	State Street Bank and Trust Company
Valuation Currency	the currency in which a BMO ETF's NAV is calculated, which is USD for BMO Ultra Short-Term US Bond ETF and CAD for each other BMO ETF

Term	Definition
Valuation Day	any day that the TSX is open for trading or such other time as we may from time to time determine to be a day for valuation for any BMO ETF

Responsibility for fund administration

Manager

BMO Asset Management Inc. is the manager, as well as the trustee and portfolio adviser, of the BMO ETFs. Our principal office is located at 100 King Street West, 43rd Floor, Toronto, Ontario, M5X 1A1. You can contact us toll free at 1-800-361-1392 or email us at bmo.etfs@bmo.com. Our website is www.bmogam.com.

As Manager, we are responsible for the overall business and operation of the BMO ETFs. We manage the BMO ETFs pursuant to the Declaration of Trust (as defined below). To learn more, **Declaration of Trust** on page 23.

Table 2 identifies each director and/or executive officer of the Manager and provides, for each such individual, that individual's municipality of residence and position and office held with the Manager.

Table 2: Directors and executive officers of the Manager

Name	Municipality of residence	Position and office held with the Manager
Nelson C. Avila	Toronto, Ontario	Chief Financial Officer
William E.P. Bamber	Toronto, Ontario	Head and Ultimate Designated Person, and Director
Amanda Custodio	Oakville, Ontario	Director
Denise (Carson) Fernandes	Toronto, Ontario	Chief Compliance Officer
Lisa Hofstatter	Oakville, Ontario	Director
Benjamin K. Iraya	Oakville, Ontario	Corporate Secretary
Gilles G. Ouellette	Toronto, Ontario	Chair and Director
Asma Panjwani	Toronto, Ontario	Head, Client Management and Distribution, and Director
Sara Petreich	Toronto, Ontario	Head of Exchange Traded Funds and Structured Solutions, and Director
Robert J. Schauer	Toronto, Ontario	Head Investment Funds Operations
Fiona Wong	Toronto, Ontario	Chief Anti-Money Laundering Officer

Voting of Underlying Fund securities

A BMO ETF may invest some or all of its assets in an Underlying Fund.

When a BMO ETF owns securities of an Underlying Fund managed by us, or by one of our associates or affiliates, and the holders of that Underlying Fund's securities are entitled to vote, we will not cause the BMO ETF to vote the securities of that Underlying Fund. We may, at our discretion, arrange for the securities of that Underlying Fund to be voted by the BMO ETF's unitholders; however, we generally don't do this, because of the associated cost and complexity.

Portfolio advisers

We are the portfolio adviser to each BMO ETF. As portfolio adviser to each BMO ETF, we provide investment advisory services to the BMO ETFs.

Table 3 provides the name, title, and role in the investment decision-making process by individuals employed by the portfolio adviser.

Table 3: Portfolio managers of BMOAM

Name	Title	Role in investment decisions
Paul Borean	Vice President and Portfolio Manager	Member of the Quantitative Investment Team, responsible for portfolio management and research of quantitative strategies
Raymond Chan	Director, Portfolio Manager	Member of the ETF Team, responsible for portfolio management and research of equity ETFs
Alizay Fatema	Portfolio Manager	Member of the ETF Team, responsible for portfolio management of fixed income portfolios
Yadwinder Garg	Vice President and Portfolio Manager	Member of the Quantitative Investment Team, responsible for portfolio management and research of quantitative strategies
Jonathan Lau	Director and Portfolio Manager	Member of the ETF Team, responsible for portfolio management of equity portfolios with a focus on derivatives strategies
Duy Le	Vice President and Portfolio Manager	Member of Structured Solutions Team, responsible for portfolio management, structuring and analysis of synthetic asset portfolios and derivatives strategies
Olivia Li	Vice President and Portfolio Manager	Member of the ETF Team, responsible for portfolio management of equity portfolios with a focus on derivatives strategies
Ariel Liang	Director and Portfolio Manager	Member of the Quantitative Investment Team, responsible for portfolio management and research of quantitative strategies
Sachal Mahajan	Director and Portfolio Manager	Member of the Quantitative Investment Team, responsible for portfolio management and research of quantitative strategies
Matthew Montemurro	Head, Fixed Income and Equity Index ETFs	Leader of the Index ETF Team, responsible for strategy, portfolio management, and research of equity and fixed income ETFs
Olivia Pei	Vice President and Portfolio Manager	Member of Structured Solutions Team, responsible for portfolio management, structuring and analysis of synthetic asset portfolios and derivatives strategies
Mirza Shakir	Portfolio Manager	Member of the ETF Team, responsible for portfolio management and research of equity ETFs
Jimmy Xu	Head of Liquid Alternatives and Portfolio Manager	Leader of the Non-Linear ETF Team, responsible for strategy, portfolio management and research of derivatives based solutions and synthetic asset portfolios

The investment decisions of the individuals listed in Table 3 made on behalf of the Manager are not subject to the oversight, approval, or ratification of any committee. The investment decision-making process is supported by research, analysis, and internal investment committees. Investment decisions are overseen by the Chief Investment Officer.

Brokerage arrangements

BMOAM is responsible for making trades on behalf of the BMO ETFs and makes decisions as to the purchase and sale of fund securities, including units of the Underlying Funds and other assets of the BMO ETFs (such as cash and term deposits), as well as making decisions regarding the execution of portfolio transactions of the BMO ETFs, including the selection of market, broker and the negotiation of commissions.

BMOAM receives goods or services from dealers or brokers in exchange for directing brokerage transactions to such dealers or brokers. The types of goods and services received are order execution goods and services such as data analysis, software applications and data feeds, and may also include research related to order execution. Research provided by an executing dealer or broker may include:

- advice as to the value of securities and the advisability of effecting transactions in securities; and
- analyses and reports concerning securities, issuers, industries, portfolio strategy or economic or political factors and trends that may have an impact on the value of securities.

This research is provided by the executing dealer directly, and not by a party other than the executing dealer.

BMOAM may review and approve a dealer or broker for use if their ability to provide order execution goods and services, which may include research related to order execution, adds value to BMOAM's investment decision-making process. BMOAM considers a dealer's

or broker's regulatory status, creditworthiness and its ability to efficiently process trade orders and settle trades when considering the approval of such dealer or broker. BMOAM conducts trade cost analysis to make a good faith determination that the BMO ETFs receive a reasonable benefit considering the use of the order execution goods and services and related research, and the amount of brokerage commissions paid. BMOAM determines which dealers or brokers are allocated brokerage business based on their ability to provide best execution of trades, the competitiveness of the commission costs, and the range of services and quality of research received.

BMOAM uses the same criteria in selecting all of its dealers and brokers, regardless of whether the dealer or broker is an affiliate of BMOAM. Currently, BMOAM has in place brokerage arrangements with BMO Nesbitt Burns Inc. (BMONB), BMO Capital Markets Corp. (BMOCM), and BMO Capital Markets Limited (BMOCM Limited), each of which is an affiliate of BMOAM. BMONB, BMOCM, and BMOCM Limited may provide order execution goods and services, which may include research related to order execution.

Order execution goods and services, and research related to order execution, may benefit not only the funds whose trades generated the brokerage commission, but may also benefit other funds and clients to whom BMOAM provides advice. Such goods and services may also be shared with affiliates of BMOAM. A fund may benefit from such goods and services obtained with brokerage commissions generated by client accounts of affiliates of BMOAM. There are policies and procedures in place to ensure that, over a reasonable period of time, all clients, including the BMO ETFs, receive a fair and reasonable benefit in return for the commissions generated.

A list of any other dealer or broker that provides order execution goods and services will be provided upon request, at no cost, by calling 1-800-361-1392.

Directors, executive officers, and trustees

BMO Asset Management Inc. is the Trustee of each BMO ETF pursuant to a declaration of trust (see **Declaration of Trust** on page 23). Our principal office is located in Toronto, Ontario.

As Trustee, we have the exclusive authority over the assets and affairs of each BMO ETF and a fiduciary duty to act in the best interests of the unitholders of each BMO ETF.

Custodians

Gold bullion assets of BMO Gold Bullion ETF

Bank of Montreal is the Custodian of the gold bullion assets of BMO Gold Bullion ETF. Its principal office is located in Toronto, Ontario.

The Custodian holds these assets pursuant to an agreement with us (see **Custody agreements** on page 24).

All of the gold bullion owned by BMO Gold Bullion ETF and held by the Custodian is stored in Bank of Montreal's vault facilities located in Toronto, Ontario on a fully-allocated and segregated basis on behalf of BMO Gold Bullion ETF. The Custodian is required to:

- maintain BMO Gold Bullion ETF's gold bullion physically segregated, allocated and specifically identifiable as BMO Gold Bullion ETF's property under specifically-identified account numbers as directed by the Custodian;
- maintain an inventory of BMO Gold Bullion ETF's gold bullion stored with the Custodian;
- provide a monthly inventory to State Street Trust Company Canada;
- facilitate the transfer of gold bullion in and out of BMO Gold Bullion ETF through unallocated

gold accounts that it maintains for BMO Gold Bullion ETF's Designated Broker and its registered dealers; and

- take good care, custody, and control of BMO Gold Bullion ETF's gold bullion.

To the extent that BMO Gold Bullion ETF's gold bullion is held by a sub-custodian, that gold bullion will be stored on a fully-allocated and segregated basis by that sub-custodian.

Bank of Montreal is our parent company.

All other portfolio assets

State Street Trust Company Canada is the Custodian of the BMO ETFs, except in respect of the gold bullion assets of BMO Gold Bullion ETF. Its principal office is located in Toronto, Ontario.

The Custodian holds the assets of each BMO ETF pursuant to an agreement with us (see **Custody agreements** on page 24).

All of the BMO ETFs' marketable securities are held at the Custodian's principal office, with the exception of foreign assets, which may be held by local sub-custodians appointed by the Custodian or under their authority in various foreign jurisdictions where a BMO ETF may have assets invested. The Custodian or the sub-custodians may use the facilities of any domestic or foreign depository or clearing agency authorized to operate a book-based system. The sub-custodians appointed to hold assets of the BMO ETFs will be listed in the compliance report prepared by the Custodian and filed on SEDAR+ on behalf of the BMO ETFs pursuant to the requirements of NI 81-102.

State Street Trust Company Canada is not affiliated with us.

Valuation Agent

State Street Bank and Trust Company acts as the valuation agent of the BMO ETFs and provides certain

fund accounting and valuation services to the BMO ETFs including, without limitation, calculating the NAV, NAVPS, net income and net realized capital gains of the BMO ETFs.

The principal office of State Street Bank and Trust Company is located in Toronto, Ontario.

State Street Bank and Trust Company is not affiliated with us.

Auditor

PricewaterhouseCoopers LLP, Chartered Professional Accountants, is the auditor of the BMO ETFs. Its principal office is located in Toronto, Ontario.

The auditor audits the annual financial statements of the BMO ETFs.

Registrar and transfer agent

State Street Trust Company Canada acts as the registrar and transfer agent in respect of the BMO ETFs.

The principal office of State Street Trust Company Canada is located in Toronto, Ontario.

State Street Trust Company Canada is not affiliated with us.

Securities lending agents

One of the following entities acts as agent for securities lending transactions for each BMO ETF that may engage in securities lending:

- State Street Bank and Trust Company
- eSecLending

The principal office of each entity is located in Boston, Massachusetts.

Each of these entities acts as a securities lending agent pursuant to an agreement with us. Pursuant to the terms of each agreement, the securities lending agent determines the value of the loaned securities and the

collateral on each business day to ensure that the collateral received from each borrower has a market value of not less than 105% of the market value of the loaned securities.

Neither entity is affiliated with us.

State Street Securities Lending Agreement

State Street Bank and Trust Company acts as a securities lending agent for certain BMO ETFs pursuant to an agreement with us, acting on behalf of the BMO ETFs, dated as of June 12, 2018, as amended, restated, or supplemented from time to time (the **State Street Securities Lending Agreement**).

This State Street Securities Lending Agreement sets forth the terms and conditions under which State Street Bank and Trust Company, together with any of its affiliates that it appoints as its agents pursuant to the terms of the agreement, is authorized by us to act on behalf of the BMO ETFs with respect to the lending of certain securities of the BMO ETFs held by the Custodian or by State Street Bank and Trust Company as sub-custodian.

Pursuant to the terms of State Street Securities Lending Agreement, State Street agrees to indemnify a BMO ETF from all direct losses, damages, liabilities, costs, or expenses (for the purposes of this section, **Losses**) actually incurred by the BMO ETF and arising directly from a claim brought, or a demand made, by a third party arising from State Street's failure to satisfy its standard of care, provided, however, that such indemnification shall not apply:

- in the event that State Street's failure to perform is caused by events or circumstances beyond its reasonable control including, without limitation, nationalization, expropriation, currency restriction, acts of war or terrorism, riot, revolution, acts of God or other similar event or acts; and

- to the extent any Losses arise from any negligent action or omission on the part of the BMO ETF or its agents.

Either party may terminate this agreement upon five business days' notice, by written notice to the other party.

eSecLending Securities Lending Agreement

eSecLending acts as agent for securities lending transactions for certain BMO ETFs pursuant to an agreement with us, acting on behalf of the BMO ETFs, dated as of February 22, 2024, as amended, restated, or supplemented from time to time (the **eSecLending Securities Lending Agreement**).

The eSecLending Securities Lending Agreement sets forth the terms and conditions under which eSecLending is authorized by us to act on behalf of the BMO ETFs with respect to the lending of certain securities of the BMO ETFs held by the Custodian.

Pursuant to the terms of the eSecLending Securities Lending Agreement, eSecLending agrees to indemnify a BMO ETF for all losses, costs, expenses, damages, charges, liabilities, demands or claims, including legal and accounting fees (for the purposes of this section, **Losses**) insofar as such Losses are caused by or arise directly out of:

- a material breach by eSecLending of its obligations;
- any inaccuracy of any representation or warranty made by eSecLending; and
- the negligence, bad faith, wilful misconduct or breach of the standard of care by eSecLending in the performance of its duties;

except, in each case, to the extent that any such Losses are caused by the negligence, bad faith or wilful misconduct of the Manager or a BMO ETF.

Either party may terminate the eSecLending Securities Lending Agreement immediately, by written notice to the other party, if:

- any representation made by the other party in respect of the eSecLending Securities Lending Agreement is found to be incorrect or untrue in any material respect when made or deemed to have been reaffirmed;
- the other party has notified the terminating party of its inability to, or its intention not to perform, its obligations under the eSecLending Securities Lending Agreement;
- the other party fails to perform any material obligation under the eSecLending Securities Lending Agreement, and has not cured such failure within five business days after notice of such failure from the terminating party;
- the other party has its license, charter or other authorization necessary to conduct the services or a material portion of its activities withdrawn, suspended or revoked by any applicable federal or state government or agency thereof; or
- eSecLending notifies us in writing that it will not implement changes requested by us, or any of the BMO ETFs, because it has determined, in its sole discretion, that it is not commercially practicable to, as applicable, implement changes that may be required by an entity with regulatory authority over the BMO ETFs, and/or implement changes to the eSecLending Securities Lending Agreement, in order to comply with NI 81-102, or to its internal controls and procedures to ensure they are adequate and appropriate.

Prime brokers

We have retained the following entities as prime brokers to one or more Alternative BMO ETFs:

- BMO Nesbitt Burns Inc., which is located in Toronto, Ontario; and

- TD Securities Inc., which is located in Toronto, Ontario.

BMO Nesbitt Burns Inc. is an affiliate of ours. TD Securities Inc. is not affiliated with us.

An Alternative BMO ETF may borrow cash and/or securities from a prime broker for investment purposes in accordance with its investment objectives and strategies.

Promoter

The Manager has taken the initiative in founding and organizing the BMO ETFs and, accordingly, may be considered to be the promoter of the BMO ETFs within the meaning of securities legislation of certain provinces and territories of Canada.

Designated Brokers

On behalf of the BMO ETFs, we have entered into agreements with Designated Brokers pursuant to which each Designated Broker agrees to perform certain duties relating to one or more BMO ETFs, including without limitation:

- to subscribe for a sufficient number of Units of a BMO ETF to satisfy the original listing requirements of the applicable Exchange;
- to subscribe for Units of a BMO ETF on an ongoing basis in connection with the rebalancing of and adjustments to the BMO ETF's portfolio, as well as when cash redemptions of Units of a BMO ETF occur; and
- to post a liquid two-way market for the trading of a BMO ETF's Units on the applicable Exchange.

We may, in our discretion from time to time, reimburse any Designated Broker for certain expenses incurred by that Designated Broker in performing these duties.

The agreements provide that we may, from time to time but not more than once per quarter, require a Designated Broker to subscribe for Units of a BMO ETF for cash in a dollar amount not to exceed 0.30% of the BMO ETF's NAV. The number of Units issued will be the subscription amount divided by the NAVPS next determined following our delivery of a subscription notice to that Designated Broker. Payment for the Units of a BMO ETF must be made by that Designated Broker, and the Units will be issued, by no later than the first Trading Day after the subscription notice has been delivered.

Registrar and Transfer Agent

State Street Trust Company Canada acts as the registrar and transfer agent for the BMO ETFs. As registrar and transfer agent, State Street Trust Company Canada processes orders and makes arrangements to keep a record of all holders of Units of the BMO ETFs.

State Street Trust Company Canada maintains the register of Units of the BMO ETFs in Toronto, Ontario.

Independent Review Committee and Fund Governance

In accordance with NI-81-107, we have established an Independent Review Committee for the BMO ETFs. The IRC reviews and provides input on conflict of interest matters in respect of the Manager and the BMO ETFs. As required under NI 81-107, we have policies and procedures relating to conflicts of interest matters.

The IRC currently consists of four members:

- Jacqueline Allen
- Marlene Davidge (Chair)
- Jim Falle
- Wendy Hannam

The composition of the IRC may change from time to time, but it will be composed of individuals who are independent of the BMO ETFs, of us, and of entities related to us.

The mandate of the IRC is to review and assess the adequacy and effectiveness of:

- BMOAM's policies and procedures relating to conflicts of interest matters in respect of the BMO ETFs
- Any standing instructions it has provided to BMOAM pertaining to conflicts of interest matters in respect of the BMO ETFs
- BMOAM's and the BMO ETFs' compliance with any conditions imposed by the IRC in a recommendation or approval

In addition, the IRC will, no less frequently than annually, review and assess the independence of its members, the compensation of its members, its effectiveness and the contribution and effectiveness of its members. The IRC provides BMOAM with a report of the results of such assessment.

The IRC prepares, at least annually, a report of its activities for investors. You may obtain a copy of its reports, at no cost, in any of the following ways:

- by visiting www.bmogam.com/ca-en/resources/legal-and-regulatory-documents/
- by writing to us at BMO Asset Management Inc., 100 King Street West, 43rd Floor, Toronto, Ontario, M5X 1A1

This report and other information about the IRC are also available at www.sedarplus.ca.

Fund governance

We have established appropriate policies, procedures, practices and guidelines to ensure the proper management of the BMO ETFs, including, as required by NI 81-107, policies and procedures relating to conflicts of interest (see **Policies and practices** on page 16).

Reporting to Unitholders

The fiscal year of the BMO ETFs is the calendar year or such other fiscal period permitted or deemed under the Tax Act. The annual financial statements of a BMO ETF shall be audited by the auditor in accordance with Canadian generally accepted auditing standards. The auditor will be asked to report on the fair presentation of the annual financial statements in accordance with International Financial Reporting Standards, which is one of the financial reporting frameworks included in Canadian generally accepted accounting principles. We will ensure that the BMO ETFs comply with all applicable reporting and administrative requirements.

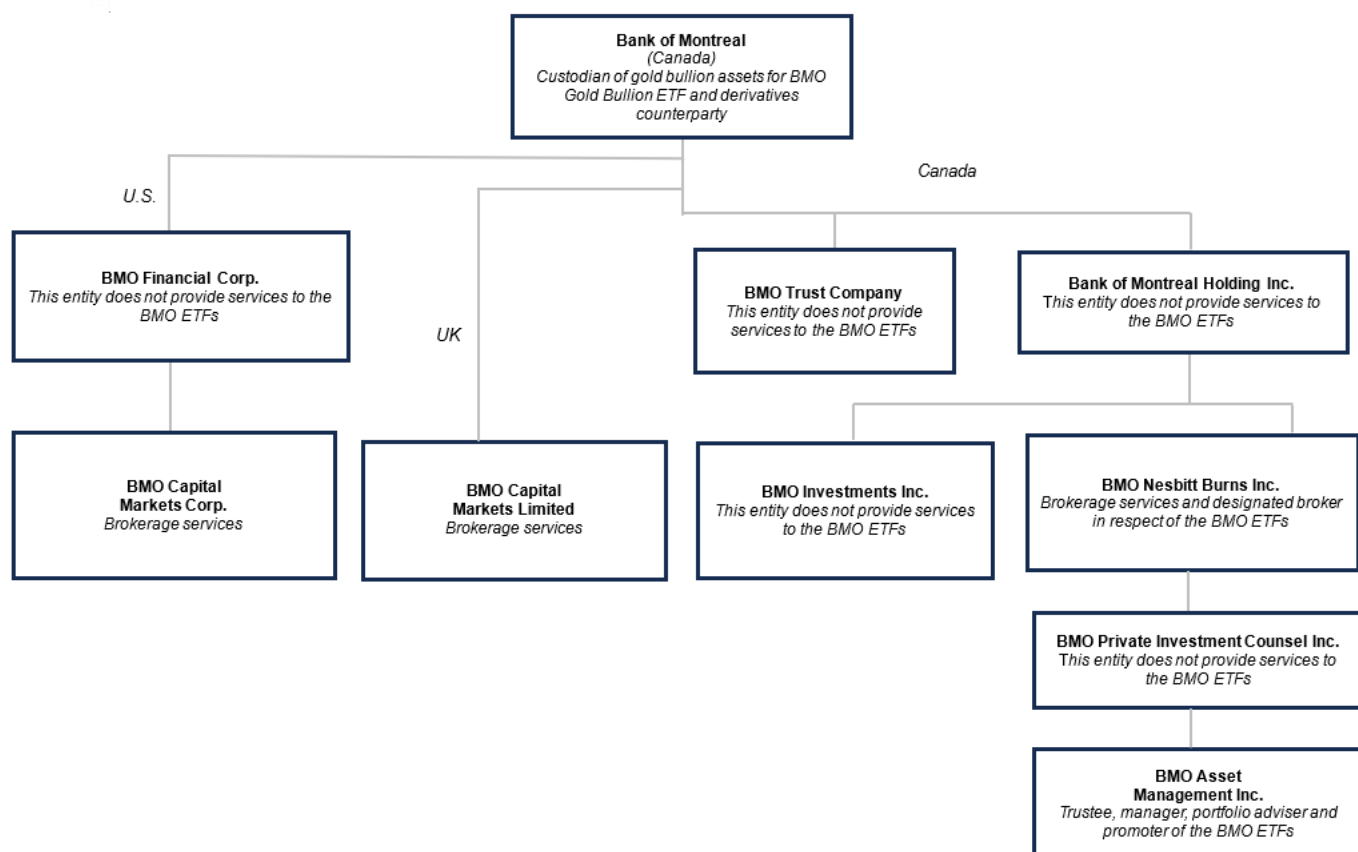

We, on behalf of each BMO ETF, will provide unitholders of that BMO ETF with unaudited interim financial statements, audited annual financial statements, interim MRFPs and the most recently filed annual MRFPs of that BMO ETF, in accordance with applicable laws.

Any tax information necessary for unitholders to prepare their annual federal income tax returns will be distributed to them within 90 days after the end of each financial year of the BMO ETFs occurring in December of each calendar year.

We will keep adequate books and records reflecting the activities of the BMO ETFs. A unitholder or his or her duly authorized representative has the right to examine the books and records of the applicable BMO ETF during normal business hours at our registered office. Notwithstanding the foregoing, a unitholder will not have access to any information that, in our opinion, should be kept confidential in the interests of the BMO ETFs.

Affiliated entities

The following chart depicts the relationships among the affiliated entities that provide services to the BMO ETFs or to us in connection with the BMO ETFs. All of the entities depicted are wholly owned by Bank of Montreal, directly or indirectly, unless otherwise indicated.

The amount of fees paid by the BMO ETFs to each affiliated entity named above, if applicable, is included in the audited financial statements of the BMO ETFs.

Dealer-manager disclosure

An investment fund is a **dealer-managed investment fund** as defined in NI 81-102 if a dealer, or a principal shareholder of a dealer, owns more than 10% of the voting rights of the portfolio adviser of that investment fund.

The BMO ETFs are dealer-managed investment funds. As a result, the BMO ETFs are subject to the restrictions set out in section 4.1 of NI 81-102:

- Generally, a dealer-managed investment fund must not knowingly invest in a class of securities of an issuer, either in the distribution (primary offering) or in the 60-day period following the distribution (secondary market), if a related entity acted as an underwriter in the

distribution of securities of that class of securities, unless certain exceptions apply (the **related underwriting prohibition**).

- In addition, a dealer-managed investment fund must not knowingly invest in securities of an issuer of which a partner, director, officer or employee of the portfolio adviser is a partner, director, or officer of the issuer of the securities, unless certain exceptions apply.

In both cases, an exception is made for an investment in a class of securities issued or fully and unconditionally guaranteed by the government of Canada or the government of a province or territory of Canada. Another exception is made in respect of the related underwriting prohibition if, among other things, the IRC of the BMO ETF has approved the transaction and the transaction complies with NI 81-102.

Policies and practices

Use of derivatives

The BMO ETFs may use derivatives for hedging or non-hedging purposes in accordance with NI 81-102. In addition, certain Underlying Funds in which the BMO ETFs may invest may use derivatives for hedging or non-hedging purposes in accordance with NI 81-102.

What is a derivative?

A derivative is a contract between two parties whose value is determined with reference to an underlying interest, such as the market price of an asset (*e.g.*, a currency, commodity, or share) or the value of an index or an economic indicator (*e.g.*, a stock market index or a specified interest rate).

Derivatives can generally be classified as options, forwards, futures, or swaps. An option gives its holder the right, but not the obligation, to buy or sell the underlying interest at a specified price within a specified period of time. (A call option gives its holder the right to buy; a put option gives its holder the right to sell.) A forward is a commitment to buy or sell the underlying interest at a specified price on a specified future date. A future is similar to a forward, except that futures are traded on exchanges. A swap is a commitment to exchange one set of payments for another set of payments.

Some derivatives are settled by one party delivering the underlying interest to the other party, who pays the specified price in full; other derivatives are settled by a single cash payment representing the final net value of the contract.

BMOAM, as portfolio manager of the BMO ETFs, is responsible for managing the risks associated with the use of derivatives. Written policies and procedures are in place to manage the risks associated with the BMO ETFs' use of derivatives.

For the risks associated with the use of derivatives, see **Derivative risk** on page 130.

We, as the Manager, are responsible for managing the risks associated with the use of derivatives. BMO GAM has written policies and procedures that set out the objectives and goals for derivatives trading and the risk management procedures applicable to the use of derivatives for hedging or non-hedging purposes.

The policies and procedures are established by the Manager and reviewed periodically by BMO GAM personnel, some of whom are members of the board of directors of the Manager. The policies and procedures set out the risk management procedures applicable to derivatives trading, and set out specific procedures for the authorization, documentation, reporting, monitoring and review of derivative strategies to ensure that these functions are performed by individuals independent of those who trade. Limits and controls on derivatives trading are part of BMO GAM's compliance regime.

BMO GAM does not currently conduct simulations to test the portfolio under stress conditions.

A BMO ETF is permitted to enter into derivatives transactions with or through a related party subject to IRC review and certain other conditions.

Securities lending, repurchase and reverse repurchase transactions

The BMO ETFs may:

- engage in securities lending;
- execute repurchase transactions; and/or
- execute reverse repurchase transactions.

Written policies and procedures are in place to manage the risks associated with the BMO ETFs' securities lending program.

What are securities lending agreements, repurchase agreements and reverse repurchase agreements?

In a securities lending agreement, a BMO ETF loans portfolio securities to a borrower. For as long as the loan remains outstanding, the borrower must compensate the BMO ETF for the loan of the securities and must also provide collateral to the BMO ETF to secure the loan.

In a repurchase agreement, a BMO ETF sells portfolio securities at one price and simultaneously agrees to repurchase these securities on a specified future date at a specified price. Until the repurchase is complete, the counterparty must provide collateral to the BMO ETF to secure its commitment to resell the portfolio securities to the BMO ETF.

In a reverse repurchase agreement, a BMO ETF purchases securities at one price and simultaneously agrees to sell those securities on a specified future date at a specified price. Until the agreement is completed, the counterparty must provide collateral to the BMO ETF to secure its commitment to repurchase the securities from the BMO ETF.

The securities lending program of the BMO ETFs is administered by either State Street Bank and Trust Company or eSecLending pursuant to the terms of the State Street Securities Lending Agreement or the eSecLending Securities Lending Agreement, respectively.

Each of the State Street Securities Lending Agreement and eSecLending Securities Lending Agreement complies with the applicable provisions of NI 81-102. We manage the BMO ETFs' risks associated with securities lending (see **Securities lending, repurchase agreement and reverse repurchase agreement risk** on page 134) by requiring the applicable securities lending agent to:

- maintain internal controls, procedures and records including a list of approved

counterparties based on generally accepted creditworthiness standards, transaction and credit limits for each counterparty and collateral diversification standards;

- establish daily the market value of both the securities loaned by a BMO ETF under a securities lending transaction or sold by a BMO ETF under a repurchase transaction and the cash or collateral held by the BMO ETF;
- request, on any business day on which the market value of the cash or collateral held by the BMO ETF is less than 102% of the market value of the securities borrowed by or sold to a counterparty, that the counterparty provide additional cash or collateral to the BMO ETF to make up the shortfall; and
- ensure that the collateral to be delivered to the BMO ETF is one or more of cash, qualified securities, or securities immediately convertible into, or exchangeable for, securities of the same issuer, class or type, and same term, if applicable, as the securities being loaned by the BMO ETF.

Any transaction may be terminated by a BMO ETF at any time and the loaned securities recalled within the normal and customary settlement period for such transaction.

We review our written policies and procedures periodically to ensure that the risks associated with securities lending transactions are being properly managed. Each of State Street Bank and Trust Company and eSecLending will use risk measurement procedures or simulations to test each portfolio under stress, where applicable.

Although permitted to do so, none of the BMO ETFs currently engages in repurchase or reverse repurchase transactions.

Short selling

Certain BMO ETFs may engage in short selling.

What is short selling?

To execute a short sale, a BMO ETF borrows securities from a lender and sells them on the open market. At a later date, the BMO ETF closes out the short position by purchasing the same securities on the open market and delivering those securities to the lender. In the interim, the BMO ETF must compensate the lender for the loan of the securities and must also provide collateral to the lender to secure the loan.

A BMO ETF's gain (loss) on a short sale equals the amount by which its proceeds from the initial short sale, less the compensation it pays to the lender, is greater (less) than the amount it pays to purchase the securities to close out the short position.

A BMO ETF will only engage in short sales as permitted by Canadian securities regulatory authorities, and only if the strategy is consistent with the BMO ETF's investment objectives.

For the risks involved in short selling, see **Short selling risk** on page 135.

BMOAM, as portfolio manager of the BMO ETFs, is responsible for managing the risks associated with selling securities short. Written policies and procedures are in place to manage the risks associated with the BMO ETFs' short sales.

The written policies and procedures set out the objectives and goals for short selling and the risk management procedures applicable to short selling.

The Manager reviews the written policies and procedures periodically.

To manage the risks associated with engaging in short selling, a BMO ETF will be subject to the controls and

restrictions described in this section, as stated in our written policies and procedures.

A BMO ETF will not sell short any of the following:

- a security that the BMO ETF is otherwise not permitted by securities legislation to purchase at the time of the short sale transaction;
- an illiquid asset; or
- a security of an investment fund other than an index participation unit.

Unless the borrowing agent is the BMO ETF's custodian or sub-custodian, if a BMO ETF deposits portfolio assets with a borrowing agent as security in connection with a short sale of securities, the market value of portfolio assets deposited with the borrowing agent must not, when aggregated with the market value of portfolio assets already held by the borrowing agent as security for outstanding short sales of securities by the BMO ETF:

- in the case of a BMO ETF, other than an Alternative BMO ETF, exceed 10% of the net asset value of the BMO ETF at the time of deposit; and
- in the case of an Alternative BMO ETF or a non-redeemable investment fund, exceed 25% of the net asset value of the Alternative BMO ETF or non-redeemable investment fund at the time of deposit.

A BMO ETF must not deposit portfolio assets as security in connection with a short sale of securities with a dealer outside of Canada unless that dealer:

- is a member of a stock exchange and is subject to a regulatory audit; and
- has a net worth, determined from its most recent audited financial statements, in excess of the equivalent of \$50 million.

At the time the BMO ETF sells the security short:

- the BMO ETF has borrowed or arranged to borrow from a borrowing agent the security that is to be sold under the short sale;
- if the BMO ETF is not an Alternative BMO ETF, the aggregate market value of the securities of the issuer of the securities sold short by the BMO ETF does not exceed 5% of the net asset value of the BMO ETF;
- if the BMO ETF is not an Alternative BMO ETF, the aggregate market value of the securities sold short by the BMO ETF does not exceed 20% of the net asset value of the BMO ETF;
- if the BMO ETF is an Alternative BMO ETF, the aggregate market value of the securities of the issuer of the securities sold short by the BMO ETF, other than government securities sold short by the BMO ETF, does not exceed 10% of the net asset value of the BMO ETF; and
- if the BMO ETF is an Alternative BMO ETF, the aggregate market value of the securities sold short by the BMO ETF does not exceed 50% of the net asset value of the BMO ETF.

A BMO ETF, other than an Alternative BMO ETF, that sells securities short must hold cash cover in an amount that, together with portfolio assets deposited with borrowing agents as security in connection with short sales of securities by the BMO ETF, is at least 150% of the aggregate market value of the securities sold short by the BMO ETF on a daily mark-to-market basis.

A BMO ETF must not borrow cash or sell securities short if, immediately after entering into a cash borrowing or short selling transaction, the aggregate value of cash borrowed combined with the aggregate market value of the securities sold short by the BMO ETF would exceed 50% of the BMO ETF's net asset value.

If the aggregate value of cash borrowed combined with the aggregate market value of the securities sold short by the BMO ETF exceeds 50% of the BMO ETF's net asset value, the BMO ETF must, as quickly as is

commercially reasonable, take all necessary steps to reduce the aggregate value of cash borrowed combined with the aggregate market value of securities sold short to 50% or less of the BMO ETF's net asset value.

An Alternative BMO ETF's aggregate exposure to cash borrowing, short selling and specified derivatives transactions must not exceed 300% of the Alternative BMO ETF's net asset value.

A BMO ETF that wishes to engage in short selling will, unless its investment strategies already include short selling, provide existing unitholders with not less than 60 days' written notice prior to commencing short selling transactions.

On an annual basis, the Manager will report to the Board of Directors of the Manager on short sale strategies, and risk management processes used by the BMO ETFs. The BMO ETFs do not use simulations to test the portfolio under stress conditions.

Personal trading

The personal trading policy is designed to prevent potential, perceived or actual conflicts between the interests of the Manager and its employees, and the interests of the BMO ETFs. Under this policy, certain personnel of the Manager are required to obtain prior approval before placing any trades in securities for their personal accounts in order to ensure that the trades do not conflict with the best interests of the BMO ETFs and have not been made available to the employee because of that employee's position, knowledge of or relationship with the BMO ETFs.

Transactions with related or connected persons or companies

We are a member of a group of related companies known as the **BMO Financial Group**. Applicable securities legislation contains restrictions on the circumstances in which the BMO ETFs, or we on behalf of the BMO ETFs, may enter into transactions or arrangements with or involving other members of the BMO Financial Group.

From time to time, we may, on behalf of the BMO ETFs, enter into transactions or arrangements with or involving other members of the BMO Financial Group, or certain other persons or companies that are related or connected to us or the BMO ETFs. These may include transactions or arrangements with or involving any of the following:

- Bank of Montreal
- BMO Capital Markets Corp.
- BMO Capital Markets Limited
- BMO Investments Inc.
- BMO Nesbitt Burns Inc.
- other related investment funds

and may involve:

- the purchase or sale of portfolio securities through or from a member of the BMO Financial Group;
- the purchase or sale of securities issued or guaranteed by a member of the BMO Financial Group;
- a BMO ETF entering into cash-settled forward contracts, options, swaps, or other types of over-the-counter derivatives with a member of the BMO Financial Group acting as counterparty;
- the purchase or redemption of securities of other mutual funds, including ETFs, managed by us or by an affiliate of ours; or
- the provision of services to us.

However, these transactions and arrangements will only be entered into where they are permitted under applicable securities legislation or by securities regulatory authorities having jurisdiction and, if applicable, approved by the IRC (or after having received the IRC's positive recommendation) and where they are, in the opinion of the Manager, in the best interests of the BMO ETFs.

Proxy voting

As portfolio adviser to the BMO ETFs, we have written policies and procedures that the BMO ETFs follow when voting proxies relating to portfolio securities. We vote proxies on behalf of a BMO ETF in the best interests of the BMO ETF and its unitholders.

Due to the variety of proxy voting issues that may arise, the following summary of the proxy voting policies and procedures is not exhaustive and is intended to provide guidance but not necessarily dictate how each issue must be voted in each instance. Further, we may depart from our proxy voting policies and procedures or not vote a proxy in order to avoid voting decisions that may be contrary to the best interests of a BMO ETF and its unitholders.

Each BMO ETF's proxy voting record, for the most recent period ended June 30 of each year, is available free of charge to any unitholder of a BMO ETF upon request at any time after August 31 of that year. The proxy voting record of a BMO ETF is available on the BMO ETFs' designated website at www.bmogam.com/ca-en/resources/legal-and-regulatory-documents/#bmo-etfs.

Our Responsible Investment team (the **RI Team**), comprised of ESG experts, oversees and executes proxy voting for the BMO ETFs. The RI Team works alongside our other portfolio managers and investment analysts. The RI Team undertakes engagement activities as well as proxy voting research and analysis, and also supports the development of our publicly available Corporate Governance Guidelines (**CGG**) and Expectations on Environmental, Social and Governance Practices, which set out our expectations of companies regarding good ESG practices as well as guides our voting on ESG matters. The RI Team focuses on corporate engagement with North American investee companies and actively votes at company meetings for the Canadian market. We have retained a third-party engagement and voting service provider to provide us with proxy voting and responsible engagement overlay (**reo**[®]) services to ensure our coverage extends to international markets and to execute votes on our behalf and in line with the CGG.

The RI Team monitors and can override any vote instructions by reo® across all markets.

We have established proxy voting policies and procedures for the BMO ETFs, which include the CGG, the Expectations on Environmental, Social and Governance Practices, and standing voting directions (collectively, the **Proxy Voting Guidelines**). The Proxy Voting Guidelines inform the voting on matters for which the BMO ETFs receive proxy materials for an issuer.

In providing proxy voting services, we through reo® use International Shareholder Services (ISS), a third-party proxy voting administrator, to auto-execute, without further guidance, the majority of votes in accordance with standing voting directions which reflect the CGG. When ISS or reo® needs guidance on the standing voting directions or when the RI Team wishes to further consider how to vote on certain matters, they consult with the RI Team and obtain instructions on how to proceed.

Although the RI Team generally adheres to the Proxy Voting Guidelines in executing votes and in addition relies on reo® and ISS to execute votes, any proxy issues that differ from the Proxy Voting Guidelines are considered by taking into account the particular circumstances involved. This provides needed flexibility in making prudent judgments in the proxy voting process. Further, we may depart from the Proxy Voting Guidelines in order to avoid voting decisions that may be contrary to the best interests of a BMO ETF and its unitholders.

The RI Team actively engages investee companies prior to, during and after proxy season to inform voting decisions and communicate good ESG expectations.

Due to the variety of proxy voting issues that may arise, the following summary of the Proxy Voting Guidelines is not exhaustive and is intended to provide guidance but does not necessarily dictate how each issue must be voted in each instance. The Proxy Voting Guidelines include:

- a standing policy for dealing with routine matters on which a BMO ETF may vote, such as election of directors, appointment of auditors and an issuance of shares;
- the circumstances under which a BMO ETF will deviate from the standing policy for routine matters. For example, the Proxy Voting Guidelines provide that the BMO ETFs will typically support management's recommendation regarding appointing auditors, but may vote against such recommendation where auditor independence is in question;
- the policies under which, and the procedures by which, a BMO ETF will determine how to vote on non-routine matters such as mergers and acquisitions, spin-offs and other corporate restructurings, shareholder rights (other than the issuance of shares), corporate governance, compensation, and social and environmental matters. For example, with respect to mergers and acquisitions, spin-offs and other corporate restructurings, the Proxy Voting Guidelines provide that the BMO ETFs will typically support incumbent management provided that the financial terms, synergistic benefits and management quality are sound; and
- procedures to ensure that a BMO ETF's portfolio securities are voted in accordance with the BMO ETF's instructions.

We have a policy in place to identify and deal with potential conflicts of interest in proxy voting such as the following proxy voting situations:

- voting proxies at a company's shareholder meeting where the company is a client of, or has another type of business relationship with, BMO Financial Group;
- voting proxies at a Bank of Montreal or an affiliate's shareholder meeting (including meetings of BMO Funds) or a company's shareholder meeting relating to a corporate

action such as a merger or acquisition involving the company (or any of its affiliates) and a member of BMO Financial Group;

- voting proxies at a company's shareholder meeting where an officer, director or employee of the Manager or BMO Financial Group serves on the board or is nominated for election to that company;
- voting proxies at a company's shareholder meeting with a potential voting outcome that favours one client (including one investment fund) over another; and
- voting proxies at a company's shareholder meeting where different portfolio managers of ours prefer different voting outcomes.

A copy of the policies and procedures relating to proxy voting is available on request, at no cost, by calling 1-800-361-1392 or by writing to the Manager at 100 King Street West, 43rd Floor, Toronto, Ontario M5X 1A1.

Interests of management and others in material transactions

On behalf of the BMO ETFs, we may enter into various continuous distribution agreements with registered dealers, which may or may not be Designated Brokers, pursuant to which the registered dealers may subscribe for Units of the BMO ETFs (see **Purchases** on page 37).

We receive fees for our services to the BMO ETFs (see **Fees and expenses** on page 51).

The BMO ETFs pay standard brokerage commissions at market rates to BMO Nesbitt Burns Inc., BMO Capital Markets Corp. and BMO Capital Markets Limited for trades executed by these entities. See **Brokerage arrangements** on page 9.

BMOAM, on behalf of the BMO ETFs, may enter into Related-Party Transactions (see **IRC approvals** on page 151 and **Affiliated entities** page 14).

No Designated Broker or ETF Dealer has been involved in the preparation of this document or has performed any review of the contents of this document. As such, the Designated Brokers and ETF Dealers do not perform many of the usual underwriting activities in connection with the distribution of Units of the BMO ETFs under this simplified prospectus. The Units do not represent an interest or an obligation of a Designated Broker, any ETF Dealer, or any affiliate of a Designated Broker or ETF Dealer, and a unitholder does not have any recourse against any such party in respect of amounts payable by a BMO ETF to the applicable Designated Broker or ETF Dealer.

Remuneration of directors, officers, and trustees

Trustee compensation

We do not receive any additional fees for serving as the Trustee of the BMO ETFs.

Employee compensation

Robert J. Schauer of Toronto, Ontario is the Chief Financial Officer of each of the BMO ETFs. Otherwise, the BMO ETFs do not have employees and the management functions of each BMO ETF are carried out by employees of the Manager.

Independent review committee compensation

The members of the IRC of the BMO ETFs are entitled to compensation.

Members of the IRC received the following amounts in annual fees and reimbursement for expenses in connection with performing their duties for the BMO ETFs:

- Jacqueline Allen, \$30,913;
- Marlene Davidge (Chair), \$44,437;
- Jim Falle \$30,913; and
- Wendy Hannam, \$30,912.

A flat fee of \$500 is charged to each BMO ETF with the remaining fees and expenses allocated proportionally among the BMO ETFs based on their respective NAV complexity. The NAV complexity for each BMO ETF is determined using factors assigned to the BMO ETF. These factors include the existence of a fund-of-fund structure and the number of series offered by the BMO ETF, both of which increase the allocation of fees and expenses to a BMO ETF.

Material contracts

Declaration of Trust

The BMO ETFs have been established under an amended and restated declaration of trust dated January 21, 2025 (the **Declaration of Trust**). We act as the trustee, manager and portfolio adviser to the BMO ETFs pursuant to the Declaration of Trust.

As the manager, we administer the BMO ETFs' day-to-day operations, supervise their investments, help manage the investment and reinvestment of their assets and distribute their units, or cause them to be distributed. The Declaration of Trust provides that we are entitled to management fees in return for the services that we provide.

We may resign as the Trustee and/or the Manager of any of the BMO ETFs upon 60 days' notice to the unitholders. If we resign as Manager, we may appoint a successor but, unless the successor is an affiliate of ours, the successor must be approved by the unitholders. If we are in material default of our obligations under the Declaration of Trust and such default has not been cured within 30 days after notice of the same has been given to us, the unitholders may remove us and appoint a successor trustee and/or manager.

As Manager, we are entitled to fees for our services as manager under the Declaration of Trust (see **Management Fees** on page 51). In addition, we and our affiliates and each of their directors, officers, employees and agents will be indemnified by each of the BMO ETFs for all liabilities, costs and expenses incurred in connection with any action, suit or

proceeding that is proposed or commenced or other claim that is made against any of them in the exercise of the Manager's duties under the Declaration of Trust, if they do not result from the Manager's wilful misconduct, bad faith, negligence or breach of its obligations under the Declaration of Trust.

The management and trustee services of the Manager are not exclusive and nothing in the Declaration of Trust or any agreement prevents the Manager from providing similar services to other investment funds and other clients (whether or not their investment objectives and policies are similar to those of the BMO ETFs) or from engaging in other business activities.

Amendments to the Declaration of Trust

Pursuant to the terms of the Declaration of Trust, unitholder approval is only required if the nature of an amendment to the Declaration of Trust is a matter for which applicable laws provide such approval is required.

Except for changes to the Declaration of Trust described below that do not require approval of or prior notice to unitholders, we may amend the Declaration of Trust from time to time upon not less than 30 days' prior written notice to unitholders of the BMO ETFs.

We may amend the Declaration of Trust without the approval of or notice to unitholders of the BMO ETFs for the following purposes:

- to remove any conflicts or other inconsistencies which may exist between any terms of the Declaration of Trust and any provisions of any law or regulation applicable to or affecting the BMO ETFs;
- to make any change or correction in the Declaration of Trust which is of a typographical nature or is required to cure or correct any ambiguity or defective or inconsistent provision, clerical omission, mistake or manifest error contained therein;
- to bring the Declaration of Trust into conformity with applicable laws, rules and policies of the

securities regulatory authorities or with current practice within the securities industry, provided that any such amendment does not adversely affect the rights, privileges or interests of unitholders of the BMO ETFs;

- to maintain, or permit us to take such steps as may be desirable or necessary to maintain the status of a BMO ETF as a “mutual fund trust” for the purposes of the Tax Act;
- to change the taxation year end of a BMO ETF as permitted under the Tax Act;
- to establish one or more BMO ETFs;
- to change the name of a BMO ETF;
- to create additional classes and series of units of a BMO ETF and to redesignate existing classes and series of units of a BMO ETF, unless the rights attaching to such units are changed or are adversely affected thereby;
- to provide added protection to unitholders of the BMO ETFs; or
- if, in our opinion, the amendment is not prejudicial to unitholders of the BMO ETFs and is necessary or desirable. Any amendments to the Declaration of Trust made by us without the consent of unitholders of the BMO ETFs will be disclosed in the next regularly scheduled report to such unitholders.

Custody agreements

Gold bullion assets of BMO Gold Bullion ETF

Bank of Montreal provides custodial services for the gold bullion assets of BMO Gold Bullion ETF under a metals custodial agreement dated January 17, 2024, as amended, restated, or supplemented from time to time, between Bank of Montreal and us.

Either party may terminate this agreement:

- upon at least 180 days’ written notice to the other party, subject to any penalties contained in the agreement; or
- immediately, without any penalty, if the other party becomes insolvent, or makes an assignment for the benefit of creditors, or a petition in bankruptcy is filed by or against that party and is not discharged within 30 days, or proceedings for the appointment of a receiver for that party are commenced and not discontinued within 30 days.

All other Fund assets

State Street Trust Company Canada provides custodial services to the BMO ETFs under a custodial agreement dated June 1, 2018, as amended, restated, or supplemented from time to time, among the Manager, BMO Investments Inc., and State Street Trust Company Canada.

Any party may terminate this agreement upon 90 days’ notice, by written notice to the other parties, unless a different period is agreed to in writing by the parties. In addition, we may terminate the agreement immediately, by written notice to the Custodian, if:

- the Custodian ceases to be qualified to act as a custodian of the BMO ETFs pursuant to NI 81-102;
- there is a change of control of the Custodian;
- the Manager is required by applicable law or by the direction of a securities regulatory authority to cease acting as an investment fund manager of the BMO ETFs;
- the Custodian commits a material or persistent breach of the agreement that is not capable of being remedied, or that is capable of being remedied but is not remedied within 60 days or such other period as may be agreed between the Manager and the Custodian, after receiving notice from the Manager requiring the same to be remedied; or

- the Custodian becomes bankrupt or insolvent or upon the passing of a resolution for its dissolution or the issuance of an order for its dissolution or the making of a general assignment for the benefit of its creditors.

Index license agreements

We have entered into an index license agreement with various parties identified in this section (each an **Index Provider**). The Units of the BMO ETFs are not in any way sponsored, endorsed, sold, or promoted by the Index Providers, and the Index Providers make no representation or warranty, express or implied, regarding the advisability of investing in securities generally or in the BMO ETFs particularly or the ability of the Indices to track general market performance.

We may, subject to any required Unitholder approval, change the index underlying a BMO ETF to another widely-recognized index in order to provide investors with substantially the same exposure to the asset class to which that BMO ETF is currently exposed. If we change the index underlying any BMO ETF, or any index replacing such index, we will issue a press release identifying the new index, describing its constituent securities and specifying the reasons for the change in the index.

Each Index Provider calculates, determines and maintains the respective index. In the event that an Index Provider ceases to calculate an index or an index license agreement is terminated, we may terminate the applicable BMO ETF on 60 days' notice, change the investment objective of that BMO ETF if applicable, seek to replicate another index, or make such other arrangements as we consider appropriate and in the best interests of the unitholders of the BMO ETF in the circumstances.

We and the applicable BMO ETF are permitted to use the applicable index pursuant to the applicable index license agreement described below. We and the applicable BMO ETF do not accept responsibility for, or guarantee the accuracy and/or completeness of, the indices or any data included in the indices.

Bloomberg

Bloomberg Index Services Limited (**BISL**) is the provider of the Bloomberg Indices (see **Bloomberg Indices** on page 122), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into an agreement dated March 26, 2010, as amended from time to time, and a master index license agreement dated January 17, 2023, as may be amended from time to time, with BISL (collectively, the **Bloomberg License Agreement**) under which we have the right, on and subject to the terms of the agreement:

- to use the Bloomberg Indices as a basis for the operation of certain BMO ETFs; and
- to use certain trademarks in connection with those Bloomberg Indices and those BMO ETFs.

“Bloomberg®” and the Bloomberg Indices are service marks of Bloomberg Finance L.P. and its affiliates, including BISL (collectively, **Bloomberg**), and have been licensed for use for certain purposes by the Manager.

The Bloomberg License Agreement automatically renews on an annual basis, unless either party gives at least 90 days' notice of termination prior to the end of the term or unless the agreement is otherwise terminated earlier in accordance with its terms. If the agreement is terminated for any reason, we will no longer be able to base the performance of any BMO ETF on any of the Bloomberg Indices.

The BMO ETFs are not sponsored, endorsed, sold, or promoted by Bloomberg. Bloomberg does not make any representation or warranty, express or implied, to the owners of or counterparties to the BMO ETFs or any member of the public regarding the advisability of investing in securities or commodities generally or in the BMO ETFs particularly. The only relationship of Bloomberg to the Manager is the licensing of certain trademarks, trade names and service marks and of the Bloomberg Indices, which are determined, composed, and calculated by BISL without regard to the Manager or

the BMO ETFs. Bloomberg has no obligation to take the needs of the Manager or the owners of the BMO ETFs into consideration in determining, composing, or calculating the Bloomberg Indices. Bloomberg is not responsible for and has not participated in the determination of the timing, price, or quantities of the BMO ETFs to be issued. Bloomberg shall not have any obligation or liability, including, without limitation, to customers of the BMO ETFs, in connection with the administration, marketing or trading of the BMO ETFs.

BLOOMBERG DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE BLOOMBERG INDICES OR ANY DATA RELATED THERETO AND SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS THEREIN. BLOOMBERG DOES NOT MAKE ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE MANAGER, OWNERS OF THE BMO ETF PRODUCTS OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE BLOOMBERG INDICES OR ANY DATA RELATED THERETO. BLOOMBERG DOES NOT MAKE ANY EXPRESS OR IMPLIED WARRANTIES AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE BLOOMBERG INDICES OR ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, TO THE MAXIMUM EXTENT ALLOWED BY LAW, BLOOMBERG, ITS LICENSORS, AND ITS AND THEIR RESPECTIVE EMPLOYEES, CONTRACTORS, AGENTS, SUPPLIERS, AND VENDORS SHALL HAVE NO LIABILITY OR RESPONSIBILITY WHATSOEVER FOR ANY INJURY OR DAMAGES—WHETHER DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, PUNITIVE OR OTHERWISE—ARISING IN CONNECTION WITH THE BMO ETF PRODUCTS OR BLOOMBERG INDICES OR ANY DATA OR VALUES RELATING THERETO—WHETHER ARISING FROM THEIR NEGLIGENCE OR OTHERWISE, EVEN IF NOTIFIED OF THE POSSIBILITY THEREOF.

FTSE and FTSE Canada

FTSE International Limited (**FTSE**) is the provider of the FTSE International Indices (see **FTSE International Indices** on page 122), on whose performance the performance of certain Index BMO ETFs is based, and FTSE Global Debt Capital Markets Inc. (**FTSE Canada**) is the provider of the FTSE Canada Indices (see **FTSE Canada Indices** on page 122), on whose performance the performance of certain Index BMO ETFs is based. The FTSE International Indices and the FTSE Canada Indices are collectively known as the **FTSE Indices**.

We have entered into:

- an agreement dated October 16, 2009, as amended from time to time, with FTSE Canada (the **2009 FTSE Agreement**) and
- an agreement dated January 30, 2017, as amended from time to time, with FTSE, FTSE Canada, Frank Russell Company (**Frank Russell**) and FTSE Fixed Income LLC (**FTSE FI**) (the **FTSE Agreement**),

(collectively, the **FTSE License Agreements**) under which we have the right, on and subject to the terms of the FTSE License Agreements:

- to use the FTSE Indices as a basis for the operation of certain BMO ETFs; and
- to use certain trademarks in connection with those FTSE Indices and those BMO ETFs.

The right to use the FTSE Indices renews on an annual basis unless terminated earlier in accordance with the terms of the FTSE License Agreements. If all or certain parts of either of the FTSE License Agreements are terminated for any reason with respect to a BMO ETF, then we will no longer be able to base the performance of any BMO ETF on any of the FTSE Indices.

The BMO ETFs are not in any way sponsored, endorsed, sold or promoted by FTSE, FTSE Canada, Frank Russell, FTSE FI or the London Stock Exchange Group

companies (collectively, the **Licensor Parties**). The Licensor Parties make no claim, prediction, warranty or representation whatsoever, express or implied, either as to:

- the results to be obtained from the use of the FTSE Indices;
- the figure at which any of the FTSE Indices stands at any particular time on any particular day or otherwise; or
- the suitability of a FTSE Index for the particular purpose to which it is being put in connection with the BMO ETFs.

Each of the FTSE Indices is compiled and calculated by FTSE or FTSE Canada and all copyright in any of the FTSE Indices values and constituent lists vests in FTSE or FTSE Canada, respectively. The Licensor Parties shall not be liable, whether in negligence or otherwise, to any person for any error in any of the FTSE Indices and the Licensor Parties shall not be under any obligation to advise any person of any error therein. The Licensor Parties do not accept any liability whatsoever to any person arising out of the use of the BMO ETFs or the underlying data. “FTSE®” is a trademark of the London Stock Exchange Group companies and is used under licence.

None of the Licensor Parties has provided or will provide any financial or investment advice or recommendation in relation to the Index to the Manager or to its clients. The FTSE Indices are calculated by or on behalf of FTSE or its affiliate, agent, or partner. None of the Licensor Parties shall be:

- liable, whether in negligence or otherwise, to any person for any error in the FTSE Indices; or
- under any obligation to advise any person of any error therein.

MSCI

MSCI Inc. (**MSCI**) is the provider of the MSCI Indices (see **MSCI Indices** on page 123), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into an agreement dated January 29, 2013, as amended from time to time, with MSCI (the **MSCI License Agreement**) under which we have the right, on and subject to the terms of the agreement:

- to use the MSCI Indices as a basis for the operation of certain BMO ETFs, and
- to use certain trademarks in connection with those MSCI Indices and those BMO ETFs.

The MSCI License Agreement automatically renews on an annual basis, unless either party gives at least 90 days’ notice of termination prior to the end of the term or unless the agreement is otherwise terminated earlier in accordance with its terms. If the agreement is terminated in whole or in part for any reason, we will no longer be base the performance of any BMO ETF on any of the MSCI Indices.

THE BMO ETFs ARE NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI, ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE **MSCI PARTIES**). THE MSCI INDICES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY BMO ASSET MANAGEMENT INC. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THE BMO ETFs OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THE BMO ETFs PARTICULARLY OR THE ABILITY OF ANY MSCI

INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDICES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THE BMO ETFS OR THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDICES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THE BMO ETFS TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THE BMO ETFS ARE REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THE BMO ETFS.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDICES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE BMO ETFS, OWNERS OF THE BMO ETFS, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN

CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

No purchaser, seller or holder of this security, product or BMO ETF, or any other person or entity, should use or refer to any MSCI trade name, trademark, or service mark to sponsor, endorse, market, or promote this security without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

MSCI is also the provider of the Bloomberg MSCI Indices (see **Bloomberg Indices** on page 122), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into an addendum to the MSCI License Agreement with MSCI (the **MSCI ESG License Agreement**) under which we have the right, on and subject to the terms of the agreement:

- to use the Bloomberg MSCI ESG Indices as a basis for the operation of certain BMO ETFs; and
- to use certain trademarks in connection with those Bloomberg MSCI ESG Indices and those BMO ETFs.

The initial term of the MSCI ESG License Agreement is three years unless the agreement is terminated earlier as

provided therein. The MSCI ESG License Agreement automatically renews on an annual basis, unless either party gives at least 90 days' notice of termination prior to the end of the term or unless the agreement is otherwise terminated earlier in accordance with its terms.

THE BLOOMBERG MSCI ESG INDICES ARE THE EXCLUSIVE PROPERTY OF THE APPLICABLE INDEX PARTY. "BLOOMBERG", "MSCI", AND THE INDEX NAMES, ARE THE RESPECTIVE TRADE AND/OR SERVICE MARKS OF BLOOMBERG, MSCI, OR THEIR AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY THE MANAGER. BLOOMBERG IS THE BENCHMARK ADMINISTRATOR FOR THE BLOOMBERG MSCI ESG INDICES (AND MSCI IS NOT THE BENCHMARK ADMINISTRATOR FOR THE BLOOMBERG MSCI ESG INDICES) UNDER THE EU BENCHMARK REGULATION, THE IOSCO PRINCIPLES FOR FINANCIAL BENCHMARKS, AND ANY OTHER SIMILAR OR RELATED REGULATION, LEGISLATION, RULES, OR PRINCIPLES, IN ANY JURISDICTION. NONE OF THE INDEX PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN THE BMO ETFS GENERALLY OR IN ONE OF THE BMO ETFS PARTICULARLY OR THE ABILITY OF ANY BLOOMBERG MSCI ESG INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI, BLOOMBERG, OR THEIR AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE BLOOMBERG MSCI ESG INDICES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY BLOOMBERG AND/OR MSCI WITHOUT REGARD TO THE BMO ETFS OR THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY. NONE OF THE INDEX PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY

INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE BLOOMBERG MSCI ESG INDICES. NONE OF THE INDEX PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THE BMO ETFS TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THE BMO ETFS IS REDEEMABLE. FURTHER, NONE OF THE INDEX PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THE BMO ETFS OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THE BMO ETFS.

ALTHOUGH THE INDEX PARTIES SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE BLOOMBERG MSCI ESG INDICES FROM SOURCES CONSIDERED RELIABLE, NONE OF THE INDEX PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY BLOOMBERG MSCI ESG INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE INDEX PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE BMO ETFS, OWNERS OF THE BMO ETFS, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY BLOOMBERG MSCI ESG INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE INDEX PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY BLOOMBERG MSCI ESG INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE INDEX PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE INDEX PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH BLOOMBERG MSCI ESG INDEX AND ANY DATA INCLUDED THEREIN.

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE INDEX PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

No purchaser, seller or holder of any BMO ETF, or any other person or entity, should use or refer to any MSCI or Bloomberg trade name, trademark, or service mark to sponsor, endorse, market or promote that BMO ETF without first contacting MSCI to determine whether permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI or Bloomberg without prior written permission.

Nasdaq

Nasdaq, Inc. (**Nasdaq**) is the provider of the Nasdaq Indices (see **Nasdaq Indices** on page 123), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into an agreement dated January 6, 2010, as amended from time to time, with Nasdaq, the successor in interest to the Nasdaq OMX Group Inc. (the **Nasdaq License Agreement**) under which we have the right, on and subject to the terms of the agreement:

- to use the Nasdaq Indices as a basis for the operation of certain BMO ETFs; and
- to use certain trademarks in connection with those Nasdaq Indices and those BMO ETFs.

The Nasdaq License Agreement automatically renews in respect of each Nasdaq Index on an annual basis, unless either party gives at least 90 days' notice of termination prior to the end of the term or unless the agreement is otherwise terminated earlier in accordance with its terms. If the Nasdaq License Agreement is terminated in respect of a Nasdaq Index for any reason, we will no longer be able to base the performance of any BMO ETF on that Nasdaq Index.

The BMO ETFs are not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (for the purposes of this section, Nasdaq, with its affiliates, are referred to as the **Corporations**). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the BMO ETFs. The Corporations make no representation or warranty, express or implied to the owners of the BMO ETFs or any member of the public regarding the advisability of investing in securities generally or in the BMO ETFs particularly, or the ability of the Indices to track general stock market performance. The Corporations' only relationship to the Manager (the **Licensee**) is in the licensing of the Nasdaq® registered trademark and certain trade names of the Corporations and the use of the Indices which is determined, composed and calculated by Nasdaq without regard to Licensee or the BMO ETFs. Nasdaq has no obligation to take the needs of the Licensee or the owners of the BMO ETFs into consideration in determining, composing or calculating the Indices. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the BMO ETFs to be issued or in the determination or calculation of the equation by which the BMO ETFs is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the BMO ETFs.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF THE INDICES OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE PRODUCTS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDICES OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDICES OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE

FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

S&P Dow Jones

S&P Global, Inc. (**S&P**) is the provider of the S&P Indices (see **S&P Dow Jones Indices** on page 123), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into an agreement dated October 16, 2009, as amended from time to time, with S&P Opco, LLC, a subsidiary of S&P Dow Jones Indices LLC (each an **S&P Opco License Agreement** and collectively the **S&P Opco License Agreements**) under which we have the right, on and subject to the terms of those agreements, to use the S&P Indices and certain related trademarks as a basis for the operation of certain BMO ETFs.

The licenses for the following S&P Dow Jones Indices renew annually:

- S&P 500® Index
- S&P Global Clean Energy Index
- S&P MidCap 400® Index
- S&P SmallCap 600® Index

The licenses for the following S&P Dow Jones Indices renew triannually:

- S&P 500® Hedged to Canadian Dollars Index
- S&P/TSX Capped Composite Index.
- Communication Services Select Sector
- Consumer Discretionary Select Sector
- Consumer Staples Select Sector
- Energy Select Sector
- Financial Select Sector
- Health Care Select Sector
- Industrials Select Sector
- Materials Select Sector
- Real Estate Select Sector

- Technology Select Sector
- Utilities Select Sector

Each license may be renewed in accordance with the terms of the S&P Opco License Agreement. If all or part of the agreement is terminated for any reason, we will no longer be able to base the performance of any BMO ETF on any S&P Dow Jones Index in respect of which the agreement has been terminated.

We have entered into an agreement dated May 29, 2009, as amended from time to time, with Dow Jones Opco, LLC (the **Dow Jones License Agreement**) under which we have the right, on and subject to the terms of the agreement, to use the Dow Jones Indices and certain related trademarks as a basis for the operation of certain BMO ETFs.

The Dow Jones License Agreement automatically renews for successive one-year periods unless terminated by either party. If all or part of the Dow Jones License Agreement is terminated for any reason, we will no longer be able to base the performance of any BMO ETF on any Dow Jones Index in respect of which the agreement has been terminated.

Each of the S&P Dow Jones Indices is a product of S&P Dow Jones Indices LLC or its affiliates (**SPDJI**) and has been licensed for use by the Manager. S&P®, S&P 500®, US 500, The 500, iBoxx®, iTraxx® and CDX® are trademarks of S&P or its affiliates. Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (**Dow Jones**). It is not possible to invest directly in an index. The BMO ETFs are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, and/or any of their respective affiliates and none of these entities makes any representation or warranty, express or implied, to the owners of the BMO ETFs or any member of the public regarding the advisability of investing in securities generally or in the BMO ETFs particularly or the ability of an S&P Dow Jones Index to track general market performance. Past performance of an index is not an indication or guarantee of future results. S&P Dow Jones Indices' only relationship to the Manager with respect to an S&P Dow Jones Index is the licensing of the S&P Dow Jones Index and certain trademarks,

service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. Each S&P Dow Jones Index is determined, composed and calculated by S&P Dow Jones Indices without regard to the Manager or the BMO ETFs. S&P Dow Jones Indices have no obligation to take the needs of the Manager or the owners of BMO ETFs into consideration in determining, composing or calculating the S&P Dow Jones Index. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of the BMO ETFs. There is no assurance that investment products based on an S&P Dow Jones Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment adviser, commodity trading advisor, commodity pool operator, broker dealer, fiduciary, “promoter” (as defined in the *Investment Company Act* of 1940, as amended), “expert” as enumerated within 15 U.S.C. § 77k(a) or tax advisor. Inclusion of a security, commodity, cryptocurrency or other asset within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, commodity, crypto currency or other asset, nor is it considered to be investment advice or commodity trading advice.

THE S&P DOW JONES INDICES DO NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF ANY S&P DOW JONES INDEX OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY THE MANAGER, OWNERS OF THE PRODUCTS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF AN S&P DOW JONES INDEX OR WITH RESPECT TO ANY

DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. S&P DOW JONES INDICES HAVE NOT REVIEWED, PREPARED AND/OR CERTIFIED ANY PORTION OF, NOR DOES S&P DOW JONES INDICES HAVE ANY CONTROL OVER, THE LICENSEE PRODUCT REGISTRATION STATEMENT, PROSPECTUS OR OTHER OFFERING MATERIALS. THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND THE MANAGER, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

Solactive

Solactive AG (**Solactive**) is the provider of the Solactive Indices (see **Solactive Indices** on page **123**), on whose performance the performance of certain Index BMO ETFs is based.

We have entered into a licensing agreement dated October 19, 2015, as amended and restated from time to time, with Solactive (the **Solactive License Agreement**) under which we have the right, on and subject to the terms of the agreement:

- to use the Solactive Indices as a basis for the operation of certain Index BMO ETFs; and
- to use Solactive’s trademarks in connection with those Solactive Indices and those Index BMO ETFs.

The Solactive License Agreement has no set term; however, it may be terminated in certain circumstances. If the agreement is terminated for any reason, we will no

longer be able to base the performance of any BMO ETF on any of the Solactive Indices.

The BMO ETFs that are based on the Solactive Indices are not sponsored, endorsed, promoted, or sold by Solactive in any way and Solactive makes no express or implied representation, guarantee or assurance with regard to:

- the advisability in investing in any BMO ETF;
- the quality, accuracy and/or completeness of the Solactive Indices; and/or
- the results obtained or to be obtained by any person or entity from the use of the Solactive Indices.

Solactive does not guarantee the accuracy and/or the completeness of the Solactive Indices and shall not have any liability for any errors or omissions with respect thereto. Notwithstanding Solactive's obligations to its licensees, Solactive reserves the right to change the methods of calculation or publication with respect to the Solactive Indices and Solactive shall not be liable for any miscalculation of or any incorrect, delayed or interrupted publication with respect to the Solactive Indices. Solactive shall not be liable for any damages, including, without limitation, any loss of profits or business, or any special, incidental, punitive, indirect or consequential damages suffered or incurred as a result of the use of, or inability to use, the Solactive Indices.

Inspection of material contracts

You may inspect copies of these material contracts during normal business hours by visiting our principal office at 100 King Street West, 43rd Floor, Toronto, Ontario M5X 1A1.

To receive copies of the Declaration of Trust, please send us a written request at the preceding address.

Legal proceedings

There are no ongoing material legal proceedings, which include administrative proceedings, to which any of the BMO ETFs or its Manager is a party.

Designated website

A mutual fund is required to post certain regulatory disclosure documents on a designated website. The designated website of the BMO ETFs is www.bmogam.com/ca-en/resources/legal-and-regulatory-documents/#bmo-etfs.

Valuation of portfolio investments

The Valuation Agent values each BMO ETF's holdings in its Valuation Currency before calculating its NAV.

Valuation methods

Cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, dividends receivable and interest declared or accrued and not yet received are valued at the full amount or at what the Valuation Agent considers to be the fair value.

Bonds, debentures, short-term investments and other debt securities are marked-to-market based on prices obtained from a recognized pricing service at the valuation time on the valuation date.

Money market instruments are valued at amortized cost which approximates fair value due to their short-term nature.

Securities listed or dealt in on any stock exchange are valued at their closing sale price (or such other value as the securities regulatory authorities may permit) last reported at the valuation time on the valuation date on the principal stock exchange on which such security is traded, or, if no reliable closing sale price is available at that time, the security shall be fair valued, and in the case of gold bullion, its market value based on that day's announced LBMA Gold Price PM. If there is no announced LBMA Gold Price PM on a business day, the gold bullion is valued at the most recently announced LBMA Gold Price PM or an alternative market price as determined by us.

Mutual fund securities that are not listed on any stock exchange are valued at the respective net asset value for such securities quoted by the trustee or the manager of that investment fund on the relevant valuation date.

Foreign-currency accounts are expressed in the BMO ETF's Valuation Currency on the following basis:

- investments and other assets are valued at the applicable rate of exchange at the valuation date; and
- purchases and sales of investments, income and expenses are recorded at the applicable rate of exchange on the dates of the transactions.

Forward foreign exchange contracts are valued as the difference between the value on the date the contract originated and the value of the contract on the valuation date. Foreign exchange options are valued at their quoted market value. When the contract or option closes or expires, a foreign exchange gain or loss is recognized.

Forward contracts are valued as the difference between the value on the date the contract originated and the value of the contract on the valuation date.

Clearing corporation options are valued at the current market value.

Where a covered clearing corporation option is written, the premium received is considered a deferred credit with a value equal to the current market value of an option that would have the effect of closing the position. Any difference resulting from revaluation will be treated as an unrealized gain or loss. Deferred credits will be deducted before the BMO ETF's NAV is calculated.

Futures contracts are valued at outstanding current margin payable or receivable.

Bullion, coins, certificates and other evidences of precious metals are valued at current market value.

Restricted securities are valued at the lesser of:

- the value thereof based on reported quotations in common use, and
- the percentage of the market value of unrestricted securities of the same class, equal to the percentage that the BMO ETF's acquisition cost was of the market value of such unrestricted

securities at the time of acquisition, provided that if we know the time period during which the restrictions on such securities apply, we may adjust the price to reflect that time period.

All other investments are valued at the Valuation Agent's best estimate of fair value.

If the Valuation Agent considers any of these valuation principles inappropriate under the circumstances, or if it cannot value an investment according to these principles, the Valuation Agent may estimate the fair value of an investment using established fair valuation procedures, such as consideration of public information, broker quotes and valuation models. It may also use external fair value service providers. The value calculated on fair-value securities for the purposes of calculating a BMO ETF's NAV may differ from the securities' most recent closing market price.

The Valuation Agent may also fair-value securities in the following circumstances:

- when there is a halt in the trading of a security that is normally traded on an exchange;
- on securities that trade on markets that have closed prior to the time as of which the BMO ETF's NAV is calculated and for which there is sufficient evidence that the closing price on that market is not the most appropriate value at the time of valuation; and
- when there are investment or currency restrictions imposed by a country that affect the BMO ETF's ability to liquidate its investments in that country.

We have valued the BMO ETFs' investments in accordance with the disclosed practices, and, in particular, in accordance with the foregoing outlined principles. We do not have discretion to deviate from the valuation methods described above.

Calculation of net asset value

The Valuation Agent calculates the NAV of each BMO ETF in its Valuation Currency in accordance with the rules and policies of the Canadian Securities Administrators or in accordance with any exemption therefrom that the BMO ETF may obtain. The NAV of a BMO ETF, calculated in this way and applying the principles described in the preceding section, may differ from the NAV of that BMO ETF as determined under International Financial Reporting Standards.

The NAV of each BMO ETF and the NAVPS of each series of each BMO ETF is calculated as at 4:00 p.m. Eastern Time on each Valuation Day.

Except as described in the following section, the NAV of a particular series equals its proportionate share of all of the assets of the BMO ETF minus:

- the liabilities of the BMO ETF that are specifically attributable to that series; and
- the series' proportionate share of the liabilities of the BMO ETF that are not specifically attributable to any series.

The NAVPS of a particular series equals its NAV divided by the number of units of that series then issued and outstanding.

Modifications for Hedged Units

A BMO ETF may offer Hedged Units. Where this is the case, the BMO ETFs contains two classes of units:

- the **Special Class** is comprised of the BMO ETF's Hedged Units; and
- the **Ordinary Class** is comprised of the BMO ETF's Non-Hedged Units

If a BMO ETF contains two classes, then after calculating the NAV of the BMO ETF but before calculating the NAV of any series of that BMO ETF, the Valuation Agent allocates the fair value of the derivative

instruments that the BMO ETF holds for currency hedging purposes exclusively to the Special Class.

Publication of NAVPS data

The NAVPS for the Units of the BMO ETFs are published at www.bmo.com/gam/ca and www.bmoetfs.com.

Purchases, switches, and redemptions

The Units offered by the BMO ETFs are described in the section **Series of the BMO ETFs** on page 153.

The BMO ETFs are offered for sale on a continuous basis, which means that subject to certain restrictions, you can purchase or redeem Units of a BMO ETF at any time.

The following BMO ETFs are newly established:

- BMO SPDR Communication Services Select Sector Index ETF
- BMO SPDR Consumer Discretionary Select Sector Index ETF
- BMO SPDR Consumer Staples Select Sector Index ETF
- BMO SPDR Energy Select Sector Index ETF
- BMO SPDR Financials Select Sector Index ETF
- BMO SPDR Health Care Select Sector Index ETF
- BMO SPDR Industrials Select Sector Index ETF
- BMO SPDR Materials Select Sector Index ETF
- BMO SPDR Real Estate Select Sector Index ETF
- BMO SPDR Technology Select Sector Index ETF
- BMO SPDR Utilities Select Sector Index ETF
- BMO Target 2027 Canadian Corporate Bond ETF
- BMO Target 2028 Canadian Corporate Bond ETF
- BMO Target 2029 Canadian Corporate Bond ETF

(collectively, the **New BMO ETFs**).

In compliance with NI 81-102, each New BMO ETF will not issue units to the public until orders aggregating not less than \$500,000 have been received and accepted by the New BMO ETF from investors other than the Manager or its directors, officers or securityholders.

When you buy or sell Units of a BMO ETF on an Exchange, you are engaging in secondary market trading (see **Secondary market trading** on page 40).

As permitted by Canadian securities regulators, we may suspend your right to redeem and/or exchange Units:

- if normal trading is suspended on an exchange within or outside Canada on which securities are listed and posted for trading, or on which “specified derivatives” as defined in NI 81-102 are traded, that represent more than 50% by value, or underlying market exposure, of the total assets of that BMO ETF without allowance for liabilities and if those securities are not traded on any other exchange that represents a reasonably practical alternative for the BMO ETF;
- with the consent of securities regulators, if the BMO ETF determines that it is not practical to sell the BMO ETF’s assets or fairly determine the value of the BMO ETF’s net assets; or
- of a BMO ETF whose investment objective is to track the performance of an Underlying Fund, if the right to redeem the securities of that Underlying Fund is suspended.

If your right to redeem and/or exchange Units of a BMO ETF is suspended, and you do not withdraw your redemption order, we will redeem your Units of a BMO ETF at their NAVPS determined after the suspension ends.

Purchases

By Designated Brokers and other registered dealers

Generally, only a Designated Broker or a registered dealer may purchase Units directly from a BMO ETF. The BMO ETFs reserve the right to reject any subscription order placed by a Designated Broker or registered dealer.

On any Trading Day, a Designated Broker or registered dealer may place a subscription order for the following number of Units of a BMO ETF:

- a prescribed number of Units, which number we may, in our discretion, increase or decrease from time to time;
- an integral multiple thereof; or
- such other number of Units as we may permit.

If we receive the subscription order by 9:00 a.m. Eastern Time on a particular Trading Day, or such later time on that Trading Day as we may permit, the BMO ETF will issue the requested number of Units to the Designated Broker or registered dealer:

- in the case of a BMO ETF that invests a portion of its portfolio assets in T+3 Instruments, by the third business day after the subscription notice is accepted;
- in the case of a BMO ETF that does not invest a portion of its portfolio assets in T+3 Instruments, by the second business day after the date on which the subscription order is accepted; or
- in such shorter period as we may determine in response to changes in applicable law or general changes to settlement procedures in applicable markets,

in each case provided that the BMO ETF has received payment for the Units.

For each prescribed number of Units issued by a BMO ETF other than BMO Gold Bullion ETF, the Designated Broker or registered dealer must make a payment whose value is equal to the NAV of the Units next determined following the receipt of the purchase order. This payment must take one of three forms, as determined by us in our sole discretion:

- a Basket and cash;
- cash; or

- a combination of instruments and cash specified by us.

For each prescribed number of Units issued by BMO Gold Bullion ETF, we accept only cash payment.

For each BMO ETF other than BMO Gold Bullion ETF, we will make the Basket available to the BMO ETF's Designated Broker and registered dealers on each Trading Day.

No fees will be payable by a BMO ETF to a Designated Broker or registered dealer in connection with the issuance of Units.

On the issuance of Units, we may, in our discretion, charge an administrative fee to a Designated Broker or registered dealer to offset any expenses of the issuance.

By other unitholders

A BMO ETF may issue additional Units directly to the holders of those Units, via the automatic reinvestment of special dividends and certain other distributions.

Switches

You may not switch into or out of any series of a BMO ETF.

Redemptions

For cash

On any Trading Day, a unitholder may redeem Units for cash at a redemption price per Unit equal to the lesser of:

- 95% of the closing price per Unit on the applicable Exchange on the effective day of the redemption; and
- the NAVPS on the effective day of the redemption.

Because unitholders will generally be able to sell Units at the market price on the applicable Exchange through a registered dealer subject only to customary brokerage

commissions, unitholders are advised to consult their dealers or investment advisors before redeeming their Units for cash.

If we receive the redemption order by 9:00 a.m. on a particular Trading Day, or such later time on that Trading Day as we may permit, the BMO ETF will redeem the Units and pay the proceeds of redemption:

- in the case of a BMO ETF that invests a portion of its portfolio assets in T+3 Instruments, by the third business day after the subscription notice is accepted;
- in the case of a BMO ETF that does not invest a portion of its portfolio assets in T+3 Instruments, by the second business day after the date on which the subscription order is accepted; or
- in such shorter period as we may determine in response to changes in applicable law or general changes to settlement procedures in applicable markets.

The cash redemption request forms may be obtained from any registered dealer.

For Baskets and cash

On any Trading Day, a unitholder may place an exchange order for the following number of Units:

- a prescribed number of Units, which number we may, in our discretion, increase or decrease from time to time;
- an integral multiple thereof; or
- such other number of Units as we may permit,

requesting that the Units be exchanged for one of three forms of payment, as determined by us in our sole discretion, whose value is equal to the NAV of the Units on the effective date of the exchange order:

- a Basket and cash;
- cash; or

- a combination of instruments and cash specified by us.

For each prescribed number of Units issued by BMO Gold Bullion ETF, we provide only cash payment.

Non-Resident Unitholders

At no time may:

- non-residents of Canada;
- partnerships that are not Canadian partnerships; or
- a combination of non-residents of Canada and such partnerships (all as defined in the Tax Act),

be the beneficial owners of a majority of the Units of a BMO ETF. We may require declarations as to the jurisdictions in which a beneficial owner of Units is resident and, if a partnership, its status as a Canadian partnership. If we become aware, as a result of requiring such declarations as to beneficial ownership or otherwise, that the beneficial owners of 40% of the Units of a BMO ETF then outstanding are, or may be, non-residents and/or partnerships that are not Canadian partnerships, or that such a situation is imminent, we may make a public announcement thereof. If we determine that more than 40% of such Units are beneficially held by non-residents and/or partnerships that are not Canadian partnerships, we may send a notice to such non-resident unitholders and partnerships, chosen in inverse order to the order of acquisition or in such manner as we may consider equitable and practicable, requiring them to sell their Units or a portion thereof within a specified period of not less than 30 days. If the unitholders receiving such notice have not sold the specified number of Units or provided us with satisfactory evidence that they are not non-residents or partnerships other than Canadian partnerships within such period, we may on behalf of such unitholders sell such Units and, in the interim, will suspend the voting and distribution rights attached to such Units. Upon such sale, the affected holders will cease to be beneficial holders of Units and their rights will be limited to receiving the net proceeds of sale of such Units.

Notwithstanding the foregoing, we may determine not to take any of the actions described above if we have been advised by legal counsel that the failure to take any of such actions would not adversely impact the status of a BMO ETF as a mutual fund trust for purposes of the Tax Act or, alternatively, may take such other action or actions as may be necessary to maintain the status of the BMO ETF as a mutual fund trust for purposes of the Tax Act.

Exchanges

On any Trading Day, unitholders may exchange the prescribed number of Units (or an integral multiple thereof) for a Basket and cash. However, at our discretion, BMO Gold Bullion ETF will only pay cash on the exercise of an exchange right.

To effect an exchange of Units, a unitholder must submit an exchange request in the form prescribed by us from time to time to the applicable BMO ETF at its registered office by 9:00 a.m. on a Trading Day (or such later time on such Trading Day as we may permit). The exchange price will be equal to the NAV of the series of Units on the effective day of the exchange request, payable by delivery of a Basket and cash, other than in respect of BMO Gold Bullion ETF, which will only be payable by delivery of cash. The Units will be redeemed in the exchange.

If an exchange request is not received by the submission deadline noted immediately above on a Trading Day, the exchange order will be effective only on the next Trading Day. Settlement of exchanges for a Basket and cash will be made:

- in the case of a BMO ETF that invests a portion of its portfolio assets in T+3 Instruments, by the third business day after the effective day of the exchange request;
- in the case of a BMO ETF that does not invest a portion of its portfolio assets in T+3 Instruments, by the second business day after the effective day of the exchange request; or

- in such shorter period as we may determine in response to changes in applicable law or general changes to settlement procedures in applicable markets.

The securities to be included in the Basket delivered on an exchange shall be selected by the manager in its discretion.

Unitholders should be aware that the NAVPS will decline on the ex-dividend date of any distribution payable in cash on Units. A unitholder that is no longer a holder of record on or after the ex-dividend date will not be entitled to receive that distribution.

If the securities held by a BMO ETF are cease traded at any time by order of a securities regulatory authority or other relevant regulator or stock exchange, the delivery of such securities to a unitholder on an exchange in the prescribed number of Units may be postponed until such time as the transfer of the securities is permitted by law.

Secondary market trading

You may buy or sell Units of the BMO ETFs on the relevant Exchange or another marketplace, through registered dealers, in the province or territory where you reside.

The TSX has conditionally approved the listing of Units of the following BMO ETFs:

- CAD Units of BMO Target 2027 Canadian Corporate Bond ETF
- CAD Units of BMO Target 2028 Canadian Corporate Bond ETF
- CAD Units of BMO Target 2029 Canadian Corporate Bond ETF

(collectively, the **New BMO ETFs**) on the TSX.

Listing is subject to the New BMO ETFs fulfilling all of the requirements of the TSX on or before January 8, 2026. Subject to satisfying the TSX's original listing requirements, the New BMO ETFs will be listed on the TSX and offered on a continuous basis, and an investor will be able to buy or sell these Units on the TSX

through registered brokers and dealers in the province or territory where the investor resides. Investors may incur customary brokerage commissions in buying or selling the Units.

From time to time as may be agreed by a BMO ETF and the Designated Brokers and the ETF Dealers, the Designated Brokers and the ETF Dealers may agree to accept the constituent securities of the BMO ETF as payment for Units of a BMO ETF from prospective purchasers.

You may incur brokerage commissions when you buy or sell Units of a BMO ETF. No fees are payable by you to us or to any BMO ETF in connection with the buying or selling of Units of the BMO ETF on the relevant Exchange or on another marketplace.

The provisions of the so-called “early warning” requirements set out in Canadian Securities Legislation do not apply in connection with the acquisition of Units

of a BMO ETF. In addition, the BMO ETFs have obtained exemptive relief from the securities regulatory authorities to permit unitholders to acquire more than 20% of the Units of a BMO ETF through purchases on an Exchange without regard to the take-over bid requirements of Canadian Securities Legislation, provided that any such unitholder, and any person acting jointly or in concert with the unitholder, undertakes to us not to vote more than 20% of the Units of a BMO ETF at any meeting of unitholders.

For each BMO ETF, Table 4 identifies:

- the Exchange on which those Units are listed for trading;
- each series of Units of the BMO ETF; and
- the ticker under which the Units of the BMO ETF may be traded.

Short-term trading

At the present time, the Manager is of the view that it is not necessary to impose any short-term trading restrictions on the BMO ETFs as Units of the BMO ETFs are generally traded by investors on an exchange in the secondary market in the same way as other listed securities. In the few situations where the BMO ETFs are not purchased in the secondary market, purchases usually involve a Designated Broker or a Dealer upon whom the Manager may impose a redemption fee, which is intended to compensate the applicable BMO ETF for any costs and expenses incurred in relation to the trade.

Optional services

Distribution reinvestment plans

We offer a distribution reinvestment service for holders of Units of BMO ETFs. Using this service, you can elect to have all cash distributions that you receive on these Units automatically reinvested in additional units of the same type (for the purposes of this section, **Plan Units**).

This service is governed by the distribution reinvestment agreement between us, on behalf of the BMO ETFs, and the Plan Agent, as may be amended, and by the terms of a **Distribution Reinvestment Plan**, a copy of which is available through your dealer. The key terms of the Distribution Reinvestment Plan are summarized in this section.

You cannot participate in the Distribution Reinvestment Plan if you are not a resident of Canada. If you cease to be a resident of Canada, you will be required to terminate your participation in the Distribution Reinvestment Plan.

If you wish to enroll in the Distribution Reinvestment Plan as of a particular distribution record date, you should notify the CDS Participant through which you hold Units of a BMO ETF sufficiently in advance of that distribution record date to allow such CDS Participant to notify CDS by 4:00 p.m. on the distribution record date.

Distributions that you are due to receive will be used to purchase Plan Units on your behalf in the market. No fractional Plan Units will be purchased under the Distribution Reinvestment Plan. Any funds remaining after the purchase of whole Plan Units will be credited to you via its CDS Participant in lieu of fractional Plan Units.

You may voluntarily terminate your participation in the Distribution Reinvestment Plan as of a particular distribution record date by notifying your CDS Participant sufficiently in advance of that distribution record date. You should contact your CDS Participant to obtain details of the appropriate procedures for terminating your participation in the Distribution

Reinvestment Plan. Beginning on the first distribution payment date after such notice is received from you and accepted by a CDS Participant, distributions to you will be made in cash. Any expenses associated with the preparation and delivery of such termination notice will be borne by you to exercise your right to terminate participation in the Distribution Reinvestment Plan.

We may, at any time and in our sole discretion:

- amend, modify or suspend the Distribution Reinvestment Plan, provided that we receive prior approval for the amendments from the applicable Exchange(s); or
- terminate the Distribution Reinvestment Plan,

by giving prior notice to:

- registered participants in the Distribution Reinvestment Plan;
- the CDS Participant through which you hold Units of a BMO ETF;
- the Plan Agent; and
- if necessary, the applicable Exchange(s).

If we terminate the Distribution Reinvestment Plan in this way, we will provide this notice not less than 30 days prior to the date of its termination.

Registered plans

Units of a BMO ETF are qualified investments for registered plans, provided the BMO ETF is either a “mutual fund trust” or is a “registered investment” within the meaning of those terms in the Tax Act, or the Units are listed on a “designated stock exchange” within the meaning of the Tax Act, which includes the TSX and Cboe.

We encourage you to consult your financial advisor or your tax advisor about the tax considerations associated with registered plans.

It is your responsibility to determine the tax consequences to you and your registered plan of establishing the registered plan and causing it to invest in the BMO ETFs. Neither we nor the BMO ETFs assume any liability to you as a result of making Units of the BMO ETFs available for purchase within registered plans.

Fees and expenses

This section describes the fees and expenses you may pay if you invest in a BMO ETF. Some of these fees and expenses are payable by you. Others are payable by the BMO ETF and will indirectly reduce the value of your investment in the BMO ETF.

Fees and expenses payable by the BMO ETFs

Management Fees

Each BMO ETF pays us a **Management Fee** as set forth in Table 5 below based on the average daily NAV of the applicable BMO ETF. The Management Fee, plus applicable taxes, will be accrued daily and paid quarterly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged.

Operating expenses

Each BMO ETF that incurs any of the following expenses (**Fund Expenses**) pays those expenses itself:

- the costs and expenses incurred in relation to compliance with NI 81-107, including expenses related to the implementation and ongoing operation of the IRC;
- costs associated with compliance with any new governmental or regulatory requirement introduced after the BMO ETF was established;
- brokerage expenses and commissions;
- income and withholding taxes as well as all other applicable taxes; and
- extraordinary expenses.

A BMO ETF that offers more than one series of units will allocate all Fund Expenses that are specific to a particular series to that series and will allocate its remaining Fund Expenses proportionately among its series.

We pay all of each BMO ETF's operating expenses, except for its Fund Expenses. The operating expenses of each BMO ETF that we pay (its administration expenses) include, but are not limited to:

- custodian costs
- fund accounting costs
- audit fees
- transfer agency costs
- Index Provider costs
- Plan Agent costs
- costs attributable to the issue, redemption and change of Units, including the costs of the unitholder record-keeping system
- costs associated with the preparation and distribution of offering documents and continuous disclosure documents
- costs of communicating with unitholders
- regulatory filing fees
- legal fees and expenses

Fees and expenses of fund of fund structures

If a BMO ETF invests in an Underlying Fund, there may be fees and expenses payable by the Underlying Fund in addition to the fees and expenses payable by the BMO ETF. However, we will ensure that there is no duplication of management fees for the same services in respect of a BMO ETF that invests in any Underlying Fund. Furthermore, a BMO ETF that invests in an Underlying Fund will not pay sales charges or redemption fees in relation to its purchases or redemptions of securities of that Underlying Fund.

IRC fees and expenses

Each member of the IRC receives compensation for the duties he or she performs as an IRC member and is entitled to reimbursement of all reasonable expenses in connection with the performance of these duties (see **Independent review committee compensation** on page 22).

Management fee distributions

To achieve effective and competitive management fees, we may agree to charge a reduced management fee as compared to the management fee we would otherwise be entitled to receive from a BMO ETF with respect to investments in that BMO ETF by certain unitholders. An amount equal to the difference between the fee otherwise chargeable and the reduced fee of the BMO ETF will be distributed in cash by the BMO ETF to those unitholders as a **Management Fee Distribution**.

The availability, amount and timing of Management Fee Distributions will be determined from time to time at our sole discretion. Management Fee Distributions will generally be calculated and applied based on a unitholder's average holdings of Units (excluding Units lent by those unitholders under the terms of securities lending agreements) over each applicable period as specified by us from time to time.

Management Fee Distributions will be available only to the beneficial owners of such units (including

Designated Brokers and ETF Dealers) and not to the holdings of Units by dealers, brokers or other CDS Participants that hold Units on behalf of beneficial owners. In order to receive a Management Fee Distribution for any applicable period, a beneficial owner of Units must submit a claim for a Management Fee Distribution that is verified by a CDS Participant on the beneficial owner's behalf and provide us with such further information as we may require in accordance with the terms and procedures established by us from time to time.

Management Fee Distributions will be paid first out of a BMO ETF's net income, then out of its capital gains, and thereafter out of capital.

We reserve the right to discontinue or change Management Fee Distributions at any time.

Fees and expenses payable directly by you

For fees and expenses payable directly by you, the applicable rate of GST, HST or QST, as applicable, will be determined based on your province or territory of residence.

Short-term trading fees

At the present time, the Manager is of the view that it is not necessary to impose any short-term trading restrictions on the BMO ETFs as Units of the BMO ETFs are generally traded by investors on an exchange in the secondary market in the same way as other listed securities. In the few situations where the BMO ETFs are not purchased in the secondary market, purchases usually involve a Designated Broker or a Dealer upon whom the Manager may impose a redemption fee, which is intended to compensate the applicable BMO ETF for any costs and expenses incurred in relation to the trade.

Brokerage commissions

You may buy and sell Units of a BMO ETF on an Exchange through registered brokers and dealers. You

may have to pay brokerage commissions when you buy or sell these units.

Broker/dealer fees

We may charge a Designated Broker or ETF Dealer a fee to offset certain transaction costs and other costs associated with the listing, issue, exchange and/or redemption of Units of a BMO ETF.

This charge is payable to the applicable BMO ETF and does not apply to you if you buy and sell Units of a BMO ETF on an Exchange.

Exchange/redemption fees

If we process an exchange or redemption of Units of a BMO ETF, we may decide, in our sole discretion, to offset certain transaction costs associated with that exchange or redemption, by charging an administrative fee of up to 0.05% of the value of the Units exchanged or redeemed.

This charge will not apply to you if you buy and sell Units of a BMO ETF on an Exchange.

Changes to fees and expenses

In general, we will not seek the prior approval of the holders of Units of a BMO ETF for:

- any change to the basis of the calculation of a fee or expense that is charged to that BMO ETF, or directly to the unitholders by the BMO ETF or the Manager in connection with the holding of those Units, even if that change could result in an increase in that fee or expense; or
- the introduction of a fee or expense to be charged to that BMO ETF, or directly to the unitholders by the BMO ETF or the Manager in connection with the holding of those units.

In these cases, we will send unitholders a written notice of the change at least 60 days before the effective date of the change.

Dealer compensation

Trailing commissions

We don't pay any trailing commissions in respect of the BMO ETFs.

Marketing support programs

We pay for marketing materials that we give to dealers to help support their sales efforts. We may provide monetary support to a participating dealer in the form of co-operative marketing support. We may also pay up to 50% of the direct costs of a participating dealer relating to marketing and educational practices related to the BMO ETFs.

We may provide costs in support of events sponsored by participating dealers or industry associations. We may pay up to 10% of the total direct costs incurred by certain participating dealers or industry associations to hold educational seminars or conferences for their representatives to teach them about, among other things, new developments in the investment industry, financial planning or new financial products. The participating dealer makes all decisions about where and when the conference is held and who may attend.

We may arrange seminars for dealers' representatives, in which we inform them about new developments in our products and services and certain industry matters. When we do this, we invite dealers to send their representatives to our seminars and we do not decide who attends. The representatives must pay their own travel, accommodation and personal expenses in connection with their attendance.

We will pay for any new compensation programs that we may introduce as well as a portion of marketing and educational programs.

Equity interests

BMO Private Investment Counsel Inc. owns 100% of the issued shares of the Manager. BMO Private Investment

Counsel Inc. is a wholly-owned subsidiary of Bank of Montreal.

BMO Nesbitt Burns Inc., BMO InvestorLine Inc. and BMO Private Investment Counsel Inc., all wholly-owned, indirect subsidiaries of Bank of Montreal, may sell Units of the BMO ETFs. Such sales are made on the same basis as those made by other dealers, with no preferential compensation.

Income tax considerations

This section provides a general summary of principal Canadian federal income tax considerations under the Tax Act for the BMO ETFs and for a prospective investor in a BMO ETF. It assumes that:

- you are a Canadian resident individual, other than a trust;
- you are not affiliated with and deal at arm's length with the BMO ETFs; and
- you hold your Units as capital property.

This summary is of a general nature only and is not exhaustive of all possible income tax considerations; therefore, you should consult your tax advisor about your own tax situation.

In this section, except as otherwise indicated, terms enclosed within quotation marks have the meanings assigned to them by the Tax Act.

This summary is based on the assumptions that:

- no BMO ETF will be a SIFT trust at any time;
- none of the issuers of securities held by the BMO ETF will be a "foreign affiliate" of the BMO ETF;
- none of the securities held by a BMO ETF will be a "tax shelter investment";
- none of the securities held by a BMO ETF will be an interest in a "non-resident trust" other than an "exempt foreign trust"; and
- none of the securities held by a BMO ETF will be an interest in a trust (or partnership which holds such an interest) which would require the BMO ETF (or the partnership) to report significant amounts of income in connection with such interest pursuant to the rules in section 94.1 or 94.2 of the Tax Act.

Tax proposals released on September 23, 2024 to implement tax proposals first announced in the 2024 Federal Budget (the **Capital Gains Amendments**) would generally increase the capital gains inclusion rate from one-half to two-thirds (see **Dispositions of Fund Units** on page 64). The status of the Capital Gains Amendments, however, are uncertain as Governor-General Mary Simon granted Prime Minister Justin Trudeau's request to prorogue Parliament on January 6, 2025, which will delay any fiscal action on the tax proposals until at least March 24, 2025, when parliament is scheduled to resume. On January 31, 2025, the Minister of Finance (Canada) announced that the federal government is deferring from June 25, 2024 to January 1, 2026, the date on which the capital gains inclusion rate would increase.

Status of the BMO ETFs

This summary assumes that each BMO ETF will comply at all material times with the conditions prescribed in the Tax Act so as to qualify as a "mutual fund trust". If a BMO ETF were not to qualify as a "mutual fund trust" for any period of time, the tax considerations could be materially different from those described below. See "Funds that do not qualify as "mutual fund trusts".

How the BMO ETFs are taxed

Taxation of the BMO ETFs

Generally, each BMO ETF is subject to tax under Part I of the Tax Act on its net income, including net taxable capital gains, as calculated under the Tax Act for a taxation year (after deducting available loss carryforwards) to the extent that it is not paid or made payable to unitholders. A BMO ETF will be entitled for each taxation year throughout which it is "mutual fund trust" to reduce (or receive a refund in respect of) its liability, if any, for tax on its net realized capital gains by an amount determined under the Tax Act based on the redemptions of units during the year (**Capital Gains Refund**). The Capital Gains Amendments provide for

certain adjustments to the Capital Gains Refund to generally take into account the increase in the capital gains inclusion rate. The Capital Gains Refund in a particular taxation year may not completely offset the tax liability of the BMO ETF for such taxation year which may arise upon the sale of its investments in connection with the redemption of Units. The Declaration of Trust requires each BMO ETF to distribute a sufficient amount of its net income and net realized capital gains, if any, for each taxation year of the BMO ETF to unitholders so that the BMO ETF will not be liable in any taxation year for ordinary income tax (after taking into account any applicable losses of the BMO ETF and any Capital Gains Refunds to which the BMO ETF is entitled). If in a taxation year the income for tax purposes of a BMO ETF exceeds the cash available for distribution by the BMO ETF, the BMO ETF will distribute its income through a payment of reinvested distributions.

A BMO ETF is required to calculate its net income, including net taxable capital gains, in Canadian dollars for each taxation year according to the rules in the Tax Act. Net income, including net taxable capital gains, is affected by fluctuations in the value of the Canadian dollar relative to foreign currency where amounts of income, expense, cost or proceeds of disposition are denominated in foreign currency.

A BMO ETF will include in computing its income taxable distributions received on securities held by it, including any special distributions, the taxable portion of capital gains realized by the BMO ETF on the disposition of securities held by it, income earned by any securities lending activity and futures trading activity and taxable capital gains or income realized through transactions in options. A BMO ETF will include in computing its income any interest accruing to it on bonds held by that BMO ETF. In the case of BMO Real Return Bond Index ETF, or any other BMO ETF holding real return or inflation-adjusted bonds, any amounts in respect of inflation-related adjustments to the principal amount of the bonds will be deemed to be interest for this purpose. Any such amounts of accrued interest and amounts deemed to be interest will be reflected in distributions to unitholders.

If a BMO ETF invests in an Underlying Fund that is a Canadian resident trust other than a SIFT trust, the Underlying Fund may designate a portion of amounts it distributes to the BMO ETF as may reasonably be considered to consist of:

- taxable dividends (including eligible dividends) received by the Underlying Fund on shares of taxable Canadian corporations; and
- net taxable capital gains realized by the Underlying Fund.

Any such designated amounts will be deemed for tax purposes to be received or realized by the BMO ETF as a taxable dividend or taxable capital gain, respectively. An Underlying Fund that pays foreign withholding tax may make designations such that a BMO ETF may be treated as having paid its share of such foreign tax. If a BMO ETF owns 10% or more of the securities of a class of a non-resident trust, the BMO ETF will generally be required to include in the calculation of its income its proportionate share of the non-resident trust's undistributed net income (including net taxable capital gains), as calculated under the Tax Act.

In certain cases, capital losses realized by a BMO ETF on a disposition of an investment may be effectively denied or temporarily suspended and therefore not available to offset capital gains.

In determining the income of a BMO ETF, gains or losses realized upon transactions in securities undertaken by the BMO ETF will constitute capital gains or capital losses of the BMO ETF in the year realized unless the BMO ETF is considered to be trading or dealing in securities or otherwise carrying on a business of buying and selling securities or the BMO ETF engaged in a transaction or transactions considered to be an adventure or concern in the nature of trade. Each of the BMO ETFs (other than BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF) will purchase the securities in its portfolio with the objective of receiving dividends, interest or other distributions thereon and will take the position that gains and losses realized on the disposition of its securities are capital gains and capital

losses. The Manager has advised that each of the BMO ETFs that hold “Canadian securities”, as such term is defined for purposes of the Tax Act, have elected or will elect in accordance with the Tax Act to have each such security treated as capital property. Such election will ensure that gains or losses realized by the BMO ETF on the disposition of “Canadian securities” are taxed as capital gains or capital losses.

There can be no assurance that tax laws applicable to the BMO ETFs, including the treatment of certain gains and losses as capital gains and losses, will not be changed in a manner which could adversely affect the BMO ETFs or the unitholders of the BMO ETFs. Furthermore, there can be no assurance that the CRA will agree with the tax treatment adopted by a BMO ETF in filing its tax return and the CRA could reassess a BMO ETF on a basis that results in tax being payable by the BMO ETF or an increase in the taxable component of distributions considered to have been paid to unitholders. A reassessment by the CRA may result in a BMO ETF being liable for unremitted withholding tax on prior distributions to non-resident unitholders. Such liability may reduce the NAV of, or trading prices of, Units of the BMO ETF.

If a BMO ETF realizes capital gains as a result of the transfer or disposition of its property undertaken to permit an exchange or redemption of Units by a unitholder, allocation of fund-level capital gains may be permitted pursuant to the Declaration of Trust. Rules in the Tax Act will restrict the ability of a “mutual fund trust” to allocate and designate capital gains as part of the exchange or redemption price of Units to an amount determined by a formula which is based on:

- the amount of capital gains designated to unitholders on an exchange or redemption of Units in the taxation year,
- the total amount paid for exchanges or redemptions of the Units in the taxation year,
- the portion of the BMO ETF’s NAV that is referable to the Units at the end of the taxation year and the end of the previous taxation year,

- the BMO ETF’s NAV at the end of the taxation year, and
- the BMO ETF’s net taxable capital gains for the taxation year.

In general, the formula is meant to limit the BMO ETF’s designation to an amount that does not exceed the portion of the BMO ETF’s taxable capital gains considered to be attributable to investors who redeemed in the year. These restrictions are referred to as the **ATR Rule**. The Manager does not intend to allocate capital gains to exchanging or redeeming unitholders in a manner that would result in the allocated amounts being non-deductible under the Tax Act.

Each BMO ETF will include gains and deduct losses on income account, rather than as capital gains and losses, in connection with investments made through derivative transactions, including short sales of securities other than “Canadian securities”, except where such derivatives are used to hedge portfolio securities held on capital account provided there is sufficient linkage, subject to the DFA Rule discussed below. Such gains and losses will be recognized for tax purposes at the time they are realized by the BMO ETF.

The Tax Act contains rules (the **DFA Rules**) that target certain financial arrangements (described in the DFA Rules as “derivative forward agreements”) that seek to reduce tax by converting, through the use of derivatives contracts, the return on an investment that would have the character of ordinary income to capital gains. The DFA Rules are broad in scope and could apply to other agreements or transactions (including certain options). If the DFA Rules were to apply in respect of derivatives utilized by a BMO ETF, gains realized in respect of the property underlying such derivatives could be treated as ordinary income rather than capital gains. Based on the option writing strategy of the BMO ETFs, such options will not be subject to the DFA Rules.

Premiums received on options written by a BMO ETF that are on capital account, which are not exercised prior to the end of the taxation year, will constitute capital gains of the BMO ETF in the taxation year received.

Premiums received on options written by a BMO ETF that are on income account will be included in the income of the BMO ETF in the year in which the option expires unexercised, if applicable.

In accordance with the CRA's published administrative policies, premiums received on the writing of call options that are subsequently exercised are to be added in computing the proceeds of disposition of the securities disposed of (if the options are on capital account) or are to be included in income (if the options are on income account), upon the exercise of such call options. In addition, where the premium was in respect of a call option on capital account granted in a previous year so that it constituted a capital gain in the previous year, such capital gain is to be reversed. Premiums received on the writing of put options that are subsequently exercised are to be deducted in computing the cost of the securities acquired upon the exercise of such put options. In addition, where the premium was in respect of a put option on capital account granted in a previous year so that it constituted a capital gain in the previous year, such capital gain is to be reversed.

In accordance with the CRA's published administrative policies, the amount of option premium paid will constitute a capital loss (if the option is on capital account) or will be deducted from income (if the option is on income account), in the year in which the option expires unexercised. Premiums paid on call options are to be added to the cost of the securities acquired if the call options are exercised. Premiums paid on put options are to be deducted from the proceeds of disposition if the put options are exercised.

Having regard to the investment strategy of BMO US Put Write ETF and BMO US Put Write Hedged to CAD ETF, the Manager intends that option transactions undertaken by such BMO ETFs will be treated and reporting as arising on income account.

A BMO ETF may derive income or gains from investments in countries other than Canada, and as a result, may be liable to pay income or profits tax to such countries. To the extent that such foreign tax paid by a BMO ETF exceeds 15% of the amount included in the

BMO ETF's income from such investments, such excess may generally be deducted by the BMO ETF in computing its net income for the purposes of the Tax Act. To the extent that such foreign tax does not exceed 15% of the amount included in the BMO ETF's income from such investments and has not been deducted in computing the BMO ETF's income, the BMO ETF may designate in respect of a unitholder a portion of its foreign source income that can reasonably be considered to be part of the BMO ETF's income distributed to such unitholder so that such income and a portion of the foreign tax paid by the BMO ETF may be regarded as foreign source income of, and foreign tax paid by, the unitholder for the purposes of the foreign tax credit provisions of the Tax Act.

A BMO ETF will be entitled to deduct an amount equal to the reasonable expenses that it incurs in the course of issuing Units. Such issue expenses paid by a BMO ETF and not reimbursed will be deductible by the BMO ETF rateably over a five-year period subject to reduction in any taxation year which is less than 365 days. In computing its income under the Tax Act, a BMO ETF may deduct reasonable administrative and other expenses incurred to earn income. Recent amendments to the Tax Act (the **EIFEL Rules**) generally limit the deductibility of interest and financing expenses of a Canadian resident corporation or trust that is not an "excluded entity" to a fixed ratio of tax EBITDA (as calculated in accordance with the EIFEL Rules). If the EIFEL Rules apply to a BMO ETF, the amount of interest and other financing expenses otherwise deductible by the BMO ETF may be reduced and the taxable component of distributions by the BMO ETF to its unitholders may be increased accordingly.

Losses incurred by a BMO ETF in a taxation year cannot be allocated to unitholders, but may be deducted by the BMO ETF in future years in accordance with the Tax Act.

The Tax Act contains loss restriction event rules that apply to trusts such as the BMO ETFs. The loss restriction event rules generally apply at any time when a unitholder of the trust (counted together with its affiliates) becomes a "majority-interest beneficiary" of

the trust (i.e., holds more than 50% of the fair market value of the units of the trust) or a group of unitholders of the trust becomes a “majority interest group of beneficiaries” of the trust. A BMO ETF that experiences a “loss restriction event”:

- will be deemed to have a taxation year end, which could result in a distribution of the BMO ETF’s taxable income at such time to unitholders, so that the BMO ETF is not liable for income tax on such amounts, and
- will be subject to the loss restriction rules generally applicable to corporations that experience an acquisition of control, including a deemed realization of any unrealized capital losses and restrictions on its ability to carry forward losses.

BMO ETFs that qualify as “investment funds” are exempt from such adverse consequences. An “investment fund” for this purpose includes a trust that meets certain conditions, including satisfying certain of the conditions necessary to qualify as a “mutual fund trust”, not using any property in the course of carrying on a business and complying with certain asset diversification requirements. BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF will not qualify as “investment funds”. Because of the way Units are bought and sold, it may not be possible for a BMO ETF to determine if or when a loss restriction event has occurred. Therefore, there can be no assurance that a BMO ETF has not been, or will not in the future, become subject to the loss restriction event rules and there can be no assurance regarding when distributions resulting from a loss restriction event will be made.

SIFT Rules

Each BMO ETF will be a SIFT trust during any taxation year in which it holds “non-portfolio property”.

A BMO ETF that is a SIFT trust will generally be subject to tax at rates applicable to a Canadian corporation on income from its “non-portfolio property” and net taxable capital gains realized on the disposition

of its “non-portfolio property”. In addition, unitholders who receive distributions of this type of income and capital gains from a SIFT trust are deemed to receive an eligible dividend from a Canadian corporation for tax purposes. The total of the tax payable by a SIFT trust on its non-portfolio earnings and the tax payable by its taxable unitholders on the distribution of those earnings will generally be more than the tax that would have been payable if the BMO ETF was not a SIFT trust.

The Declaration of Trust requires each BMO ETF to restrict its investments and activities so that it will not be a SIFT trust.

BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF

In determining its income for tax purposes, BMO Gold Bullion ETF intends to treat gains (or losses) as a result of any disposition of gold bullion as capital gains (or capital losses). The CRA has expressed the opinion that gains (or losses) of “mutual fund trusts” resulting from transactions in commodities should generally be treated for purposes of the Tax Act as being derived from an adventure or concern in the nature of trade, so that such transactions give rise to ordinary income rather than capital gains, although the treatment in each particular case remains a question of fact to be determined having regard to all the circumstances. Based on the advice from counsel, the Manager is of the view that the holding by BMO Gold Bullion ETF of gold bullion with no intention of disposing of such gold bullion other than to meet redemption requests likely would not represent an adventure or concern in the nature of trade so that a disposition of gold bullion that previously had been acquired with such intention would likely give rise to a capital gain (or capital loss) to the BMO ETF. As the Manager intends for BMO Gold Bullion ETF to be long-term holder of gold bullion and does not anticipate that the BMO ETF will sell its gold bullion (otherwise than where necessary to redeem unitholders or to fund expenses), the Manager anticipates that BMO ETF will treat gains (or losses) as a result of dispositions of gold bullion as capital gains (or capital losses). The CRA may disagree with the position of BMO Gold Bullion ETF to treat gains from dispositions of gold bullion as capital

gains. If any transactions of BMO Gold Bullion ETF are reported on capital account but subsequently determined to be on income account, the net income of BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF which invests substantially all of its assets in BMO Gold Bullion ETF could increase. Any such redetermination by the CRA may result in BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF being liable for unremitted withholding taxes on prior distributions made to its unitholders who were not resident in Canada for the purposes of the Tax Act at the time of the distribution. Such potential liability may reduce the NAV of, or trading prices of, the Units of BMO Gold Bullion ETF and BMO Gold Bullion Hedged to CAD ETF.

Funds that do not qualify as “mutual fund trusts”

The following BMO ETF does not qualify as “mutual fund trusts”:

- BMO Long Short Canadian Equity ETF

A BMO ETF that does not qualify as a “mutual fund trust” throughout a taxation year, may be liable to pay alternative minimum tax and/or tax under Part XII.2 of the Tax Act, and would not be entitled to the Capital Gains Refund (as defined herein). Recent amendments to the Tax Act will exempt unit trusts from the alternative minimum tax regime if the total fair market value of the units of the trust that are listed on a designated stock exchange for purposes of the Tax Act (which includes the TSX and Cboe) represents all or substantially all of the total fair market value of all the units of the trust. The Manager has advised that the BMO ETFs are expected to qualify for this new exception.

A BMO ETF that does not qualify as a “mutual fund trust” will be treated as a “financial institution” for purposes of certain mark-to-market rules in the Tax Act if more than 50% of the units of the BMO ETF are held by one or more unitholders that are themselves considered to be “financial institutions” under those rules. In this case, most of the BMO ETF’s investments

would be considered mark-to-market property, with the following results:

- the BMO ETF will be deemed to have disposed of, and re-acquired, its mark-to-market property at the end of each taxation year, as well as at such time as it becomes, or ceases to be, a financial institution; and
- the gains and losses from these deemed dispositions will be ordinary income and losses, not capital gains and capital losses.

Given the manner in which Units are distributed, there will be circumstances in which it will not be possible to control or identify whether a BMO ETF has, or has ceased to, become a “financial institution”. As a result, there can be no assurance that a BMO ETF is not a “financial institution” or will not in the future become a “financial institution” and no assurance as to when and to whom any distributions arising on the change in “financial institution” status of a BMO ETF will be made, or that a BMO ETF will not be required to pay tax on any undistributed income or taxable capital gains realized by the BMO ETF on such event.

If at any time in a year a BMO ETF that does not qualify as a “mutual fund trust” has an investor that is a “designated beneficiary”, the BMO ETF may be subject to a special tax at a rate of 40% under Part XII.2 of the Tax Act on its “designated income”. A “designated beneficiary” includes a non-resident person. “Designated income” includes income from carrying on business in Canada (which may include gains on certain derivatives) and capital gains from dispositions of “taxable Canadian property”. If possible, where a BMO ETF is subject to tax under Part XII.2, the BMO ETF may make designations which will result in unitholders that are not “designated beneficiaries” receiving a tax credit with respect to their share of the Part XII.2 tax paid by the BMO ETF.

How you are taxed on your Fund Units

Fund Units held in a registered plan

If you hold Units in a registered plan, any distributions that you receive on the Units and any capital gains that you realize on a disposition of the Units are generally sheltered from tax until you decide to make withdrawals from the plan. Withdrawals from a registered plan, other than a withdrawal from a TFSA or certain permitted withdrawals from a RESP, RDSP or FHSA, are generally taxable. This assumes the Units are a “qualified investment” and not a “prohibited investment” for your registered plans.

Units are qualified investments for registered plans, provided the BMO ETF is either a “mutual fund trust” or is a “registered investment” within the meaning of those terms in the Tax Act, or the Units are listed on a “designated stock exchange” within the meaning of the Tax Act, which includes the TSX and Cboe.

Units may be a “prohibited investment” for your registered plan, even though they are a “qualified investment”. Units will not be a “prohibited investment” for your registered plan as long as you deal at arm’s length with the BMO ETF or you do not have a “significant interest” in the BMO ETF.

Under a safe harbour rule for new mutual funds, Units of a BMO ETF will not be a “prohibited investment” for your registered plan at any time during the first 24 months of the BMO ETF’s existence, provided the BMO ETF is, or is deemed to be, a “mutual fund trust” under the Tax Act during that time and is in substantial compliance with NI 81-102 or follows a reasonable policy of investment diversification.

If you hold Units in a registered plan and you redeem some or all of these Units for Baskets and cash, some or all of the investments that you receive may not be a “qualified investment” for your registered plan and may be a “prohibited investment” for your registered plan.

Fund Units not held in a registered plan

Distributions on Fund Units

If you hold Units in a non-registered account, and you receive distributions on Units in a particular year, you must include the amount of the net income and the taxable portion of net capital gains distributed to you when computing your income for tax purposes for that year, whether you receive these distributions in cash or they are reinvested in additional Units (including Plan Units acquired under the Distribution Reinvestment Plan). To the extent that a distributing BMO ETF so designates under the Tax Act, its distributions of net capital gains, taxable dividends on securities of taxable Canadian corporations and foreign source income to you will effectively retain their character in your hands and be subject to the special tax treatment applicable to income of that character.

A BMO ETF may make a distribution that consists, in whole or in part, of a return of capital. A return of capital is not taxable to you, but it reduces the adjusted cost base (ACB) of your Units. If the ACB of your Units is reduced to less than zero, you will realize a capital gain to the extent that your ACB is less than zero and the ACB of your Units will be increased by the amount of that capital gain.

You will be informed each year of the composition of the amounts distributed to you, including amounts in respect of both cash and reinvested distributions. This information will indicate whether distributions are to be treated as ordinary income, taxable dividends (including eligible dividends), taxable capital gains, return of capital or foreign source income, and as to the foreign tax deemed paid by you on that foreign source income as applicable.

Dispositions of Fund Units

If you dispose or are deemed to dispose of a Unit, whether by redemption, sale, transfer or otherwise, a capital gain (or capital loss) will be realized to the extent that the proceeds of disposition, less any costs of disposition, are greater (or less) than the ACB of the

Unit. Refer to “How to calculate your adjusted cost base” (below) for more details.

If you redeem Units for cash or exchange Units for a Basket of Securities and cash, the BMO ETF may allocate and designate as payable capital gains to you as partial payment of your redemption price or exchange price, as applicable. Any capital gains so allocated and designated must be included in the calculation of your income in the manner described above, but subject to the restrictions imposed under the Tax Act, including the ATR Rule, should be deducted from your redemption price or exchange price, as the case may be, for the Units in determining your proceeds of disposition. The cost for tax purposes of securities acquired by a redeeming unitholder on the exchange or redemption of Units will generally be the fair market value of such securities at that time.

Based on the current provisions of the Tax Act, generally, you must include one-half of any capital gain in your income for tax purposes as a taxable capital gain, and you may deduct one-half of any capital loss against your taxable capital gains, subject to the provisions of the Tax Act.

Under the Capital Gains Amendments, the portion of a capital gain realized on or after January 1, 2026 that must be included in your income and the portion of a capital loss which is or can be deducted against the taxable portion of capital gains will be increased from one-half to two-thirds. However, the two-thirds inclusion rate will only apply to a unitholder who generally realizes net capital gains (including net taxable capital gains designated by a BMO ETF) above an annual \$250,000 threshold. Under the Capital Gains Amendments, two-thirds of capital losses realized prior to 2026 will be deductible against capital gains included in income at the two-thirds inclusion rate such that a capital loss will offset an equivalent capital gain regardless of the inclusion rate. **The Capital Gains Amendments are complex and may be subject to further changes or abandonment, and their application to a particular unitholder will depend on the unitholder’s particular circumstances.**

Unitholders should consult their own tax advisors with respect to the Capital Gains Amendments.

Where a unitholder holds USD Units, any capital gain or capital loss for tax purposes on a disposition of such USD Units will be determined by converting the U.S. dollar cost and proceeds of disposition into Canadian dollars using the applicable rate of exchange on the date of acquisition and disposition, respectively.

In certain situations, loss restriction rules may limit or eliminate your ability to deduct a capital loss. For more information, contact your tax advisor.

Amounts designated by a BMO ETF to you as taxable capital gains or dividends from taxable Canadian corporations (including eligible dividends), and taxable capital gains realized on the disposition of Units may increase your liability for alternative minimum tax.

How to calculate your adjusted cost base

You must calculate a separate ACB for each series of each BMO ETF whose Units you hold. You must calculate the ACB in Canadian dollars.

For each series of each BMO ETF whose Units you hold, your total ACB generally equals:

- the sum of all amounts that you paid to purchase those Units, including any sales charges that you paid;
- plus the sum of all distributions that you received on, and reinvested in, the series;
- minus the sum of any returns of capital included in the distributions that you received on the series;
- minus the ACB of any Units that you redeemed.

Your ACB per Unit equals the total ACB divided by the number of Units you hold.

Tax Implications of the BMO ETFs' Distribution Policy

When an investor purchases Units, a portion of the price paid may reflect income or capital gains accrued and/or realized before such person acquired such Units. When these amounts are payable to such unitholder as distributions, they must be included in the unitholder's income for tax purposes subject to the provisions of the Tax Act, even though the BMO ETF earned or accrued these amounts before the unitholder owned the Units, and such amounts may have been reflected in the price paid by the Unitholder for the Units. This may particularly be the case if Units are purchased near year-end before the final distributions have been made.

Portfolio turnover and distributions

In general, the higher a BMO ETF's portfolio turnover rate, the greater the chance that it will realize capital gains and that its unitholders will receive a capital gains distribution from the BMO ETF.

There is not necessarily a relationship between a BMO ETF's portfolio turnover rate and its performance.

International information reporting

Generally, unitholders (or in the case of certain unitholders that are entities, the "controlling persons" thereof) will be required to provide their dealer with information related to their citizenship and tax residence and, if applicable, a foreign tax identification number.

If a unitholder (or, if applicable, any of its controlling persons):

- is identified as a U.S. Specified Person, including a U.S. resident or U.S. citizen;

- is identified as a tax resident of a country other than Canada or the U.S.; or
- does not provide the required information and indicia of U.S. or non-Canadian status is present,

details about that unitholder (or, if applicable, its controlling persons) and the unitholder's investment in the BMO ETF will be reported to the CRA, unless the investment is held within a registered plan. The CRA will provide that information to the U.S. Internal Revenue Service (in the case of U.S. citizens or tax residents) or the relevant tax authority of any country that is a signatory of the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information or that has otherwise agreed to a bilateral information exchange with Canada under the Common Reporting Standard (in the case of non-Canadian tax residents other than U.S. tax residents).

Investment income received by a BMO ETF from sources within foreign countries may be subject to foreign income tax withheld at the source. Canada has entered into tax treaties with certain foreign countries which may entitle a BMO ETF to a reduced rate of tax on such income. Some countries require the filing of tax reclaim or other forms, which could include requests for information about the BMO ETF's unitholders, to receive the benefit of the reduced tax rate. A BMO ETF may provide the required information about its unitholders to foreign tax authorities in order to reclaim foreign income tax owing to it.

What are your legal rights?

This section is a general summary. For more information, see the securities law of your province or territory or consult your lawyer.

Securities legislation in certain of the provinces and territories of Canada provides you with the right to withdraw from an agreement to purchase Units of a BMO ETF. This right may be exercised within 48 hours after receipt or deemed receipt of a simplified prospectus or ETF facts document or any amendment thereto.

In several of the provinces and territories, the securities legislation further provides you with remedies for rescission or, in some jurisdictions, revisions of the price or damages if the simplified prospectus or any amendment thereto contains a misrepresentation or the ETF facts are not delivered to you, provided that the remedies for rescission, revisions of the price or damages are exercised by you within the time limit prescribed by the securities legislation of the purchaser's province or territory. You should refer to the applicable provisions of the securities legislation of the province or territory for the particulars of these rights or should consult with a legal adviser.

We have received exemptive relief from the requirement in securities legislation to include an underwriter's certificate in the simplified prospectus. As such, purchasers of Units of a BMO ETF will not be able to rely on the inclusion of an underwriter's certificate in the simplified prospectus or any amendment for the statutory rights and remedies that would otherwise be available against an underwriter that would have been required to sign an underwriter's certificate.

Additional information

Registration and transfer through CDS

Registration of interests in, and transfers of, Units of a BMO ETF will be made only through the book-entry only system of CDS. These Units may be purchased, transferred, and surrendered for exchange or redemption only through a CDS Participant. All rights of an owner of these Units must be exercised through, and all payments or other property to which such owner is entitled will be made or delivered by, CDS or the CDS Participant through which the owner holds such Units.

Upon purchase of any Units of a BMO ETF, the purchaser will receive only the customary confirmation. All distributions and redemption proceeds in respect of these Units will be made or paid initially to CDS, which payments will be forwarded by CDS to the CDS Participants and, thereafter, by such CDS Participants to the applicable unitholders.

Any reference in this simplified prospectus to a holder of Units of a BMO ETF means, unless the context otherwise requires, the owner of the beneficial interest in such Units.

Neither the BMO ETFs nor the Manager will have any liability for:

- any aspect of the records maintained by CDS relating to the beneficial interests in the Units of the BMO ETFs or the book-entry accounts maintained by CDS;
- maintaining, supervising or reviewing any records relating to such beneficial ownership interests; or
- any advice or representation made or given by CDS, whether contained in this simplified prospectus or otherwise, or made or given with respect to the rules and regulations of CDS or

any action taken by CDS or at the direction of the CDS Participants.

The rules governing CDS provide that it acts as the agent and depository for the CDS Participants. As a result, CDS Participants must look solely to CDS, and persons other than CDS Participants having an interest in the Units of the BMO ETFs must look solely to CDS Participants for payment made by the BMO ETFs to CDS.

The ability of a beneficial owner of Units of the BMO ETFs to pledge such Units or otherwise take action with respect to such owner's interest in such Units, other than through a CDS Participant, may be limited due to the lack of a physical certificate.

A BMO ETF may terminate the registration of its Units through the book-entry only system, in which case certificates for these Units in fully-registered form will be issued to beneficial owners of such Units or to their nominees.

Trading ranges and volumes of the BMO ETFs

Table 6 – Table 170 set out the market price range and trading volume of the BMO ETFs on the relevant Exchange for the periods indicated.

Exemptions and approvals

If a BMO ETF has received the approval of a securities regulatory authority to vary from any of the investment restrictions and requirements contained in securities legislation, including NI 81-102, the details of the permitted variations are described in the section

Exemptions from NI 81-102 on page 150.

If a BMO ETF or the Manager has received the approval of a securities regulatory authority to vary from any other requirement of NI 81-102, any requirement of NI 81-101, or any requirement of NI 81-105, the details of the permitted variations are described in this section.

Appointment of eSecLending as Agent

The Manager has received relief that permits the Manager to appoint eSecLending as agent to act on behalf of the BMO ETFs to administer securities lending, repurchase and reverse repurchase transactions entered into by the BMO ETFs, even though eSecLending is not a custodian or a sub-custodian of the BMO ETFs.

ETF relief

Each BMO ETF has received exemptive relief to:

- relieve the BMO ETF from the requirement to prepare and file a long-form prospectus for the Units in accordance with National Instrument 41-101 *General Prospectus Requirements* in the form prescribed by Form 41-101F2 *Information Required in an Investment Fund Prospectus*, subject to the terms of the relief, provided that the BMO ETF files a simplified prospectus for the Units in accordance with the provisions of NI 81-101, other than the requirements pertaining to the filing of a fund facts document;
- relieve the BMO ETF from the requirement that a prospectus offering Units contain a certificate of the underwriters;

- relieve a person or company purchasing Units of a BMO ETF in the normal course through the facilities of an Exchange from the take-over bid requirements of Canadian securities legislation;
- permit the BMO ETF to borrow cash from its custodian and, if required by that custodian, to provide a security interest over any of its portfolio assets as a temporary measure to fund the portion of any distribution payable to investors that represents, in the aggregate, amounts that are owing to, but not yet been received by, the BMO ETF; and
- treat each series of Units of the BMO ETFs as if such series were two separate funds in connection with their compliance with the provisions of Parts 9, 10 and 14 of NI 81-102.

Fund data relief

The Manager has received exemptive relief to permit the following to be referenced in sales communications relating to a BMO ETF, subject to certain sales communication disclosure requirements:

- Lipper Fund Awards
- Lipper Leader Ratings
- FundGrade A+ Awards
- FundGrade Ratings

Gold Bullion custodian relief

BMO Gold Bullion ETF has obtained exemptive relief to permit the Manager to act as a second custodian to hold the BMO ETF's gold bullion. In addition, the BMO ETF may rely on exemptive relief that permits the Manager to appoint certain sub-custodians, which are entities that are not described in sections 6.2 or 6.3 of NI 81-102, as sub-custodians of the BMO ETF to hold the BMO ETF's gold bullion in Canada, provided certain conditions are met.

Prospectus consolidation relief

BMO Asset Management Inc. has received exemptive relief from subsection 5.1(4) of NI 81-101 to permit it to consolidate the simplified prospectus of the conventional mutual funds that it manages with the simplified prospectus of the alternative mutual funds that it manages. This relief also applies to funds that are managed by the Manager, an affiliate of BMO Asset Management Inc., including the BMO ETFs.

T+3 settlement relief

Each BMO ETF that may invest a portion of its portfolio assets in securities, the trades in respect of which

customarily settle on the third business day after the date upon which pricing for the securities is determined, has received exemptive relief from the securities regulatory authorities to permit such BMO ETF to settle primary market trades in the Units no later than the third business day following the date on which pricing for the Units is determined. This settlement cycle differs from the standard settlement cycle for secondary market trades in the Units, which customarily occurs no later than the second business day following the date on which pricing for the Units is determined.

Certificate of the BMO ETFs and the Manager and Promoter of the BMO ETFs

This amended and restated simplified prospectus dated February 28, 2025, amending and restating the simplified prospectus dated January 21, 2025 and the documents incorporated by reference into the amended and restated simplified prospectus, constitute full, true and plain disclosure of all material facts relating to the securities offered by the amended and restated simplified prospectus, as required by the securities legislation of British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, Prince Edward Island, Nova Scotia, New Brunswick, Newfoundland and Labrador, Northwest Territories, Yukon Territory and Nunavut, and do not contain any misrepresentations and do not contain any misrepresentations.

Dated: February 28, 2025.

Specific information about each of the BMO ETFs described in this document

What is a mutual fund and what are the risks of investing in a mutual fund?

What is a mutual fund?

A mutual fund is a pool of money contributed by people with similar investment objectives. A mutual fund is managed by investment professionals who select the investments that are held by the mutual fund. The mutual fund's investors share its income, expenses, gains, and losses in proportion to the value of the mutual fund's units that they hold.

Each BMO ETF that is identified on the cover page as an Alternative BMO ETF is an alternative mutual fund. Each other BMO ETF is a mutual fund. All of the BMO ETFs are subject to NI 81-102.

Each BMO ETF is a trust, and the securities that it issues to its investors are units.

What are the risks of investing in a mutual fund?

Mutual funds own different types of investments, depending on their investment objectives. The value of these investments will change from day to day, reflecting changes in interest rates, economic conditions, and market and company news. In addition to changes in the condition of markets generally, local, regional or global events such as the imposition of or increase in tariffs or other financial or trade restrictions, or the perception that these events could occur, could have a significant impact on the value of these investments. As a result, the value of a mutual fund's units may increase or decrease, and the value of your investment in a mutual fund may be greater or less when you redeem it than when you purchased it.

The full amount of your investment in any BMO ETF is not guaranteed. Unlike bank accounts or GICs, mutual fund units are not covered by the Canada Deposit Insurance Corporation or any other government deposit insurer.

In exceptional circumstances, a mutual fund may suspend redemptions (see **Purchases, switches, and redemptions** on page 37).

What follows is a summary of the various risks that may be applicable to an investment in a BMO ETF. To find out which of these risks apply to a particular BMO ETF, see **What are the risks of investing in the BMO ETFs?** on page 168, as well as the individual BMO ETF profiles in the second part of this document.

Capital depletion risk

Fixed Percentage Distribution Units make monthly distributions of a fixed amount comprised, in whole or in part, of a return of capital. As well, certain other series of the BMO ETFs may make distributions comprised, in whole or in part, of a return of capital. A return of capital reduces the amount of an original investment and may result in the return to investors of the entire amount of an original investment. A return of capital that is not reinvested will reduce the NAV of the BMO ETF, which could reduce the BMO ETF's ability to generate future income. Investors should not draw any conclusions about the BMO ETF's investment performance from the amount of this distribution. A return of capital can only be made by a series of a BMO ETF to the extent that there is a positive balance in the capital account for the relevant series. To the extent that the balance in the capital account becomes, or is at risk of becoming, zero, monthly distributions may be reduced or discontinued without prior notice.

Changes in legislation risk

There can be no assurance that securities or other laws will not be changed in a manner that adversely affects a BMO ETF or the unitholders of a BMO ETF.

Commodity risk

The price of a commodity may change due to factors including:

- changes in demand from government, industry and consumers;
- supply chain disruptions;
- inventory adjustments;
- variations in production costs, including storage, labour and energy costs; and
- costs associated with regulatory compliance, including environmental regulations applicable to the commodity.

If a BMO ETF has exposure to a commodity, whether because of a direct or indirect investment in that commodity or because of investment in an issuer whose business has exposure to that commodity, its performance may be affected by changes in the price of that commodity.

Concentration risk

A BMO ETF may concentrate its investments by:

- investing in relatively few issuers; and/or
- investing primarily or exclusively in a particular asset, industry, sector, country, and/or region.

A BMO ETF that has concentrated its investments in one more of these ways may be less diversified than other mutual funds. It may underperform other mutual funds if there is a downturn in the region, country, sector and/or securities in which the BMO ETF has concentrated its investments.

If a BMO ETF's investment objectives and/or strategies require it to concentrate its investments in this way, that BMO ETF will generally maintain the concentration of its investments, despite unfavourable conditions for investment in the region, country, sector and/or securities in which it has concentrated its investments.

Credit risk

The issuer of a debt instrument may not be able to pay interest or repay the principal when it is due.

Many debt instruments have been assigned credit ratings by independent credit rating agencies. Credit risk is generally lower if the instrument has a high credit rating and higher if the instrument has a low credit rating or no credit rating. A credit rating agency may change the rating it has assigned to a debt instrument at any time, and such a change may impact the market value of that debt instrument.

A debt instrument with a low credit rating or no credit rating may be difficult to value due to the unavailability of market quotations. It may be less liquid than a higher-rated instrument, and its value may be more volatile.

A BMO ETF is also subject to credit risk when it places money on deposit with a deposit-taking institution such as a bank or trust company. The deposit-taking institution may fail to return the deposit upon demand, and any resulting loss to the BMO ETF is not expected to be covered by any applicable deposit insurance regimes.

Currency risk

The value of an investment that is denominated in, or that pays income in, a currency other than a BMO ETF's Valuation Currency (for the purposes of this section and the following section, a **foreign currency**) is affected by changes in the value of that foreign currency relative to the Valuation Currency. As a result, currency fluctuations may adversely affect the BMO ETF's NAV. For example, if the U.S. dollar rises relative to the Canadian dollar, U.S. securities will be worth more in Canadian

dollars. On the other hand, if the U.S. dollar falls, U.S. securities will be worth less in Canadian dollars.

BMO ETFs or series of BMO ETFs whose strategy includes currency hedging will seek to minimize this risk. To the extent that a BMO ETF or series of a BMO ETF does not hedge its foreign currency risk, the value of the assets attributable to that BMO ETF or series, or of the income derived from those assets, could be adversely affected by currency exchange rate movements.

Currency hedging risk

Certain BMO ETFs, and certain series of certain BMO ETFs, may seek to reduce or eliminate currency risk by entering into derivatives such as forwards. The pursuit of this type of hedging strategy entails the following risks:

- There is no guarantee that the hedging strategy will be successful. To the extent that the hedging strategy is incomplete or unsuccessful, the BMO ETF will remain exposed to foreign currency risk.
- The BMO ETF may from time to time be unable to enter into, or to exit from, the derivatives on which the hedging strategy depends.
- There may be circumstances in which a hedging transaction reduces currency gains that would otherwise arise for the BMO ETF.

Cybersecurity risk

As the use of technology has become more prevalent in the course of business, the Manager and the BMO ETFs have become potentially more susceptible to operational risks through breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause a BMO ETF to lose proprietary information, suffer data corruption, or lose operational capacity. This in turn could cause a BMO ETF to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures, and/or financial loss. Cybersecurity breaches may involve unauthorized access to a BMO ETF's digital

information systems (for example, through hacking or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (efforts to make network services unavailable to intended users). In addition, cybersecurity breaches of a BMO ETF's third-party service providers (who may include administrators, transfer agents, custodians, and sub-advisors) or issuers that a BMO ETF invests in can also subject a BMO ETF to many of the same risks associated with direct cybersecurity breaches.

The Manager and the BMO ETFs have established risk management systems designed to reduce the risks associated with cybersecurity. However, there is no guarantee that these systems will be effective, especially since the BMO ETFs do not directly control the cybersecurity systems of issuers or third-party service providers.

Derivative risk

Although derivatives are often used by mutual funds to avoid risk, they have their own kinds of risk.

What is a derivative?

A derivative is a contract between two parties whose value is determined with reference to an underlying interest, such as the market price of an asset (such as a currency, commodity or share) or the value of an index or an economic indicator (such as a stock market index or a specified interest rate).

Derivatives can generally be classified as options, forwards, futures or swaps. An option gives its holder the right, but not the obligation, to buy or sell the underlying interest at a specified price within a specified period of time. (A call option gives its holder the right to buy; a put option gives its holder the right to sell.) A forward is a commitment to buy or sell the underlying interest at a specified price on a specified future date. A future is similar to a forward, except that futures are traded on exchanges. A swap is a commitment to exchange one set of payments for another set of payments.

Some derivatives are settled by one party delivering the underlying interest to the other party, who pays the specified price in full. Other derivatives are settled by a single cash payment representing the final net value of the contract.

A BMO ETF that uses derivatives may be subject to the following risks:

- There is no guarantee a market will exist when a BMO ETF wants to exit a derivative. This could prevent the BMO ETF from realizing a profit or limiting a loss on the derivative.
- Certain derivatives are traded on exchanges that may set daily trading limits that may prevent a BMO ETF from entering or exiting a derivative when it wishes to do so.
- If the counterparty to a derivative defaults on its obligations to the BMO ETF, the BMO ETF may incur a loss.

- When entering into a derivative, a BMO ETF may be required to provide collateral to the counterparty to that derivative. If the counterparty becomes insolvent, the BMO ETF may not recover all or any of the collateral it provided to the lender.
- A BMO ETF that holds a long or short position in a future whose underlying interest is a commodity will always seek to close out that position by entering into an offsetting future prior to the first date on which the mutual fund might be required to make or take delivery of the commodity under the future. However, there is no guarantee the BMO ETF will be able to do so. This could result in the BMO ETF having to make or take delivery of the commodity.
- Any use of derivatives for hedging purposes may be ineffective, and may limit, reduce or eliminate the BMO ETF's opportunity for profit in respect of the investment(s) being hedged.

Furthermore, certain BMO ETFs may use derivatives to implement 'covered call' or 'put write' strategies, which entail additional risks:

- in a 'covered call' strategy, a BMO ETF sells a call option whose underlying interest is contained within the BMO ETF's portfolio, which limits the return that the BMO ETF may earn on that investment; and
- in a 'put write' strategy, a BMO ETF sells a put option whose underlying interest is not contained within the BMO ETF's portfolio, which exposes the BMO ETF to the risk of loss should the value of that underlying interest decrease.

Emerging market risk

Certain BMO ETFs may invest in one or more emerging markets. In an emerging-market country, relative to more-developed countries:

- there may be less publicly-available information about the issuers in that market, these issuers may be subject to less rigorous accounting, auditing and financial reporting standards, and systems of corporate governance may be less advanced;
- investments may be less liquid, and their prices more volatile, making it more difficult to trade securities in order to realize profits or avoid losses;
- securities laws may be newer and less settled, and laws regarding foreign investment, securities regulation, title to securities and shareholder rights may change more quickly and less predictably; and
- the enforcement of systems of taxation at federal, regional and local levels may be less consistent, and more prone to sudden change.

Equity risk

Equity instruments, often called stocks or shares, give the holder an ownership stake in their issuer. The price of an equity instrument is influenced by the outlook for its issuer and by general economic, industry and market trends.

Foreign market risk

The value of foreign securities may be influenced by the policies of foreign governments and by political, economic or social instability. There may be less information about foreign issuers than about Canadian issuers and there may be lower standards of government supervision and regulation in foreign financial markets. A BMO ETF that holds foreign securities may have difficulty enforcing its legal rights as an investor in jurisdictions outside Canada.

Index investment risk

A BMO ETF may seek to replicate the performance of an index. This entails the following risks:

- the BMO ETF will not take defensive positions in anticipation of adverse market conditions;
- generally, the BMO ETF will not reduce or eliminate its exposure to an index constituent that has experienced, or is expected to experience, an adverse change, until that index constituent is removed from the applicable index; furthermore, if an index constituent is removed from an index, there is no guarantee that the BMO ETF will be able to dispose of that index constituent at an attractive price, or at all; and
- the BMO ETF may invest a greater portion of its NAV invested in one or more issuers than is usually permitted for mutual funds, which may increase the volatility of its returns.

A BMO ETF may fail to replicate the performance of an index for reasons including:

- fees, expenses and/or taxes that are incurred by the BMO ETF that are not included in the calculation of the index;
- the BMO ETF may invest in instruments that are not index constituents, and the performance of these investments may not replicate the performance of those index constituents; and
- the calculation or publication of an index's performance may be incorrect, delayed or suspended.

Interest rate risk

The value of a BMO ETF that invests in bonds, other debt instruments or preferred shares will be affected by changes in interest rates.

Generally, the interest rate on such an instrument is fixed when it is issued. As a result, the instrument's price will increase when interest rates fall, but it will also decrease when interest rates rise.

Convertible bonds also pay interest at a fixed rate. Therefore, the price of a convertible bond may also vary inversely with interest rates. However, because a convertible bond can be converted into equity on specified terms, its price may be less sensitive to changes in interest rates than the price of a similar non-convertible bond.

Certain instruments pay a floating or variable rate of interest. While the value of such an instrument is generally less sensitive to changes in interest rates, its yield will generally rise and fall with such changes.

A fixed-rate instrument may provide its issuer with the right to repay some or all of the principal amount prior to its maturity. A BMO ETF that holds an instrument of this type is exposed to additional interest-rate-related risks:

- during periods of rising interest rates, the issuer may not exercise this right, in which case the value of the obligation will decrease and the BMO ETF's performance may suffer from its inability to invest in higher-yielding instruments; and
- during periods of falling interest rates, the issuer may exercise this right, in which case any reinvestment of proceeds may occur at less favourable interest rates than those prevailing when the instrument was originally acquired.

Large transaction risk

Units of a BMO ETF may be purchased and redeemed by certain investors, including financial institutions and other mutual funds, who may purchase or redeem large numbers of Units of a BMO ETF at one time.

The purchase or redemption of a substantial number of a BMO ETF's Units may require its portfolio adviser to change the composition of its portfolio significantly or force the portfolio adviser to buy or sell investments at unfavourable prices, which can affect the BMO ETF's performance and may also have adverse tax

consequences (see **Income tax considerations** on page 58).

Leverage risk

A BMO ETF that is an Alternative BMO ETF may employ leverage through one or more of the following means:

- borrowing cash or securities
- using derivatives
- selling securities short

What is leverage?

Leverage is an investment technique in which money is borrowed to make investments. The use of leverage magnifies the returns on those investments, whether the returns are positive or negative.

The use of leverage may increase the volatility of the Alternative BMO ETF's returns. In addition, the use of leverage may decrease the liquidity of the Alternative BMO ETF's portfolio and may require the Alternative BMO ETF to liquidate certain investments at times when its portfolio manager(s) would prefer to retain them.

Liquidity risk

A BMO ETF that holds illiquid investments may be unable to sell these securities. This may be because there is a limited trading market for the securities, or because their trading is subject to legal restrictions. An illiquid security may trade at a price that differs significantly from its value. Unitholders of a BMO ETF that holds illiquid investments may receive such investments on termination of the BMO ETF if the BMO ETF is unable to liquidate those investments prior to the termination.

Portfolio management risk

Each BMO ETF depends on the portfolio adviser to manage its portfolio in a manner consistent with its investment objective and investment strategies. There is

no certainty that the portfolio adviser will perform this function well.

Responsible investment risk

Certain BMO ETFs have investment objectives that reference responsible investment. Certain other BMO ETFs seek to replicate the performance of indices that have responsible investment criteria applied at the index level. These BMO ETFs, and certain other BMO ETFs, employ responsible investment strategies to pursue their investment objectives.

A BMO ETF that employs responsible investment strategies may underperform similar funds that do not employ such strategies:

- the BMO ETF may decline to invest—or may underweight or dispose of its investment—in a particular issuer, sector or region due to sustainability considerations when other investment considerations suggest that investment would be advantageous; and
- the BMO ETF may invest—or may overweight or maintain its investment—in a particular issuer, sector or region due to sustainability considerations when other investment considerations suggest that investment would be disadvantageous.

A BMO ETF's use of responsible investment strategies may be guided by the determination of ESG factors and assessment of ESG characteristics of an issuer, sector or country by the BMO ETF's portfolio management team or by the Index Provider of the index tracked by the BMO ETF. The process of determining ESG factors and assessing ESG characteristics is at least partially subjective. For a BMO ETF that uses responsible investment strategies, there can be no assurance that the determination of ESG factors and assessment of ESG characteristics that guides these strategies will reflect the beliefs or values of any of the BMO ETF's investors.

BMO ETFs may use third-party research as well as proprietary research to evaluate the ESG characteristics,

risks and opportunities regarding an issuer. Such research information and data may be incomplete, inaccurate or unavailable, resulting in incorrect assessments of the ESG practices of an issuer. Legislative and regulatory changes, market developments and/or changes in data availability and reliability could also materially affect the quality and comparability of such research information and data.

Secondary market trading risk

Although the Units the BMO ETFs are or will be listed on an Exchange, there can be no assurance that an active public market for the Units will develop or be sustained.

There can be no assurance that Units will trade at prices that reflect their NAVPS. The Units may trade on an Exchange at a premium or a discount to their NAVPS. However, as Designated Brokers and ETF Dealers subscribe for and exchange the Units at the series' NAVPS, we do not expect the Units to trade at a large premium or discount to their NAVPS for a sustained period of time.

The trading of Units on an Exchange may be halted by the activation of security-specific or market-wide 'circuit breakers', which halt trading for a specific period of time when the price of a particular security or the overall market declines by a specified percentage. The trading of Units may also be halted if:

- those Units are delisted from an Exchange without first being listed on another exchange; or
- Exchange officials determine that such action is appropriate in the interest of a fair and orderly market or to protect investors.

Securities lending, repurchase agreement and reverse repurchase agreement risk

Certain BMO ETFs may enter into securities lending agreements, repurchase agreements (**repos**), and/or reverse repurchase agreements (**reverse repos**).

What are securities lending agreements, repurchase agreements and reverse repurchase agreements?

In a securities lending agreement, a BMO ETF loans portfolio securities to a borrower. For as long as the loan remains outstanding, the borrower must compensate the BMO ETF for the loan of the securities and must also provide collateral to the BMO ETF to secure the loan.

In a repurchase agreement, a BMO ETF sells portfolio securities at one price and simultaneously agrees to repurchase these securities on a specified future date at a specified price. Until the repurchase is complete, the counterparty must provide collateral to the BMO ETF to secure its commitment to resell the portfolio securities to the BMO ETF.

In a reverse repurchase agreement, a BMO ETF purchases securities at one price and simultaneously agrees to sell those securities on a specified future date at a specified price. Until the agreement is completed, the counterparty must provide collateral to the BMO ETF to secure its commitment to repurchase the securities from the BMO ETF.

A BMO ETF that enters into any of these agreements is subject to the risk that the counterparty to the agreement defaults on its obligations to the BMO ETF. In this case, the BMO ETF may incur a loss if the collateral it holds is worth less than:

- the portfolio securities it has loaned (in the case of a securities lending agreement) or sold (in the case of a repurchase agreement), or
- the amount by which the securities it has purchased have declined (in the case of a reverse repurchase agreement).

Series risk

A BMO ETF may issue units of more than one series. Each series of a BMO ETF has its own expenses, which

the BMO ETF tracks separately. If a BMO ETF cannot pay the expenses of one series using that series' proportionate share of its assets, it may have to pay those expenses out of the other series' proportionate share of its assets, which could lower the investment return of those other series.

Short selling risk

Certain BMO ETFs may engage in short selling.

What is short selling?

To execute a short sale, a BMO ETF borrows securities from a lender and sells them on the open market. At a later date, the BMO ETF closes out the short position by purchasing the same securities on the open market and delivering those securities to the lender. In the interim, the BMO ETF must compensate the lender for the loan of the securities and must also provide collateral to the lender to secure the loan.

A BMO ETF's gain (loss) on a short sale equals the amount by which its proceeds from the initial short sale, less the compensation it pays to the lender, is greater (less) than the amount it pays to purchase the securities to close out the short position.

A BMO ETF that engages in short selling is subject to these risks:

- There can be no assurance that the borrowed securities will decline in value during the term of the short position; they may increase in value instead.
- The BMO ETF may experience difficulties in repurchasing the borrowed securities if a liquid market for those securities does not exist at that time.
- The lender may require the BMO ETF to return the borrowed securities at any time, which may require the BMO ETF to close out the short sale at an inopportune time.

- The lender may become insolvent, in which case the BMO ETF may not recover all or any of the collateral it provided to the lender.

Underlying fund risk

A BMO ETF may invest some or all of its assets in the securities of one or more Underlying Funds. Such a BMO ETF is exposed to the same risks as the Underlying Fund(s) in which it invests.

The performance of a BMO ETF that invests substantially all of its assets in one or more Underlying Funds may differ from the performance of its Underlying Fund(s) for one or more of the following reasons:

- the fees and expenses of the BMO ETF may differ from the fees and expenses of its Underlying Fund;
- there may be a delay between the time an investor purchases Units of a BMO ETF and the time the BMO ETF makes the corresponding purchase of Underlying Fund securities; and
- the BMO ETF may, instead of investing in its Underlying Fund(s), hold cash or short-term debt instruments for liquidity reasons.

Investment risk classification methodology

The investment risk level of a mutual fund is required to be determined in accordance with the standardized risk

classification methodology mandated by the Canadian Securities regulatory authorities. It is based on a mutual fund's historical volatility as measured by the 10-year standard deviation of the returns of the mutual fund.

What is standard deviation?

Standard deviation is one of the most widely-accepted ways to quantify the volatility of a fund's returns. The greater the standard deviation, the greater the volatility.

In cases where a BMO ETF is new or has less than 10 years of performance history, we determine its investment risk level using a proxy fund or a reference index. A proxy fund is another BMO ETF that has at least 10 years of performance history, and that has the same portfolio manager, investment objectives and strategies as the mutual fund whose investment risk level we are determining. If we cannot identify a proxy fund, we will choose an appropriate reference index, whose standard deviation we expect to approximate the standard deviation of the BMO ETF, to determine the BMO ETF's investment risk level.

Table 171 identifies each BMO ETF for which we have used a proxy fund or one or more reference indices, and for each such BMO ETF, identifies the proxy fund or reference indices we have used and the weight, if applicable, assigned to each.

Table 171: Proxy funds and reference indices

Fund	Series of Units	Reference index or fund
BMO All-Equity ETF	CAD Units	70% MSCI World Index and 30% S&P/TSX Composite Index
BMO Long Short Canadian Equity ETF	CAD Units	50% S&P TSX + 50% CAD Tbills
BMO Long Short US Equity ETF	CAD Units	50% S&P 500 + 50% US Tbills

Table 172 provides a description of each reference index listed in Table 171.

Table 172: Reference index descriptions

Reference index	Description of reference index
Bloomberg Canada Aggregate Corporate Index	The Bloomberg Canada Aggregate Corporate Index consists of investment grade corporate bonds denominated in Canadian dollars, with greater than \$300 million outstanding.
Bloomberg Canadian Corporate Index	The Bloomberg Canadian Corporate Index measures the Canadian investment-grade, fixed-rate, corporate bond market. Eligible securities must have greater than one year to maturity and greater than \$150 million outstanding and issued by industrial, utility and financial issuers.
Bloomberg Canadian Government/Credit 1-5 Year Index	The Bloomberg Canadian Government/Credit 1-5 Year Index measures the Canadian market for investment-grade, fixed-rate treasury, government-related and corporate securities. Eligible securities must have between one to five years to maturity and greater than \$150 million outstanding.
Bloomberg Canadian Treasury and Government-Related Index	The Bloomberg Canadian Treasury and Government-Related Index tracks the market for CAD-denominated, fixed-rate, investment-grade treasury and government-related securities with a minimum maturity of 1 year and greater than \$150 million outstanding and issued by Canadian and non-Canadian local authorities, sovereigns, and supranational.
Bloomberg Capital U.S. High Yield Very Liquid Index	The Bloomberg U.S. High Yield Very Liquid Index consists of United States dollar-denominated, non-investment grade, fixed rate, corporate bonds.
Bloomberg Treasury 1-5 Year Total Return Index Value Unhedged CAD	The Bloomberg Treasury 1-5 Year Total Return Index Value Unhedged CAD provides exposure to the U.S. Treasury bond market. Eligible securities must have between one and five years to maturity, and greater than US\$250 million outstanding.
Bloomberg U.S. Corporate 1-5 years Total Return Index	The Bloomberg U.S. Corporate 1-5 years Total Return Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.
Bloomberg U.S. High Yield Very Liquid Index	The Bloomberg U.S. High Yield Very Liquid Index consists of United States dollar-denominated, non-investment grade, fixed rate, corporate bonds.
Bloomberg U.S. Investment Grade 1-5 Year Corporate Bond Capped Total Return Index Value Hedged CAD	The Bloomberg U.S. Investment Grade 1-5 Year Corporate Bond Capped Total Return Index Value Hedged CAD measures the investment grade, fixed-rate, taxable, corporate bond market. The indices include U.S. dollar denominated securities publicly issued by U.S. and non-U.S. industrial, utility and financial issuers.
Bloomberg U.S. Treasury 5-10 Yr Total Return Index Value Unhedged CAD	The Bloomberg U.S. Treasury 5-10 Yr Total Return Index Value Unhedged CAD provides exposure to the U.S. Treasury bond market. Eligible securities must have between five and ten years to maturity, and greater than US\$250 million outstanding.
Bloomberg U.S. Treasury Bill 1-3 Months Index	The Bloomberg U.S. Treasury Bill 1-3 Months Index tracks the market for treasury bills with 1 to 2.99 months to maturity issued by the U.S. government.
Bloomberg US Aggregate Bond Index	The Bloomberg US Aggregate Bond Index includes investment grade U.S. treasury bonds, government-related bonds, corporate bonds, mortgage-backed pass-through securities, commercial mortgage backed securities and asset backed securities, that are publicly offered for sale in the U.S. and has a minimum of US \$300 million of outstanding face value and must have at least one year remaining to maturity.
Bloomberg US Corporate Index	The Bloomberg US Corporate Index consists of investment grade corporate bonds denominated in U.S. dollars, with greater than \$300 million outstanding.

Reference index	Description of reference index
Bloomberg US Government Inflation-Linked 0-5 Year Bond Index	The Bloomberg US Government Inflation-Linked 0-5 Year Bond Index measures the performance of the US Treasury Inflation Protected Securities (TIPS) market. Eligible securities must have maturities between 0 and 5 years, greater than US \$500 million outstanding, and principal and interest must be inflation-linked and denominated in USD.
Bloomberg US High Yield 1-5 Year Cash Pay 2% Total Return Index	The Bloomberg US High Yield 1-5 Year Cash Pay 2% Total Return Index tracks the performance of U.S. dollar dominated, below investment grade corporate debt, with a remaining maturity between 1 – 5 years.
Bloomberg US Long Treasury Total Return Index	The Bloomberg US Long Treasury Total Return Index provides exposure to the U.S. Treasury bond market. Eligible securities must have greater than ten years to maturity, and greater than US\$250 million outstanding.
Bloomberg US Treasury Inflation Protected Securities (TIPS) Index (US\$)	The Bloomberg US Treasury Inflation-Linked Bond Index (Series-L) measures the performance of the US Treasury Inflation Protected Securities (TIPS) market. Eligible securities must have at least one year remaining to maturity, greater than US \$500 million outstanding, and principal and interest must be inflation-linked and denominated in USD.
Bloomberg US Treasury Inflation-Linked Bond Index (Series-L)	The Bloomberg US Treasury Inflation-Linked Bond Index (Series-L) measures the performance of the US Treasury Inflation Protected Securities (TIPS) market. Eligible securities must have at least one year remaining to maturity, greater than US \$500 million outstanding, and principal and interest must be inflation-linked and denominated in USD.
CBOE S&P 500 2% OTM PutWrite Index	The CBOE S&P 500 2% OTM PutWrite Index represents selling near term 2% out of the money put options and holding short-term t-bills.
CBOE S&P 500 BuyWrite Index in Canadian dollars	The CBOE S&P 500 BuyWrite Index represents buying 500 large capitalization U.S. public issuers and selling near term close to the money call options
CBOE S&P 500 Put Write Index	The CBOE S&P 500 Put Write Index tracks the performance of a hypothetical investment strategy (PUT strategy) that overlays short S&P 500 puts over a money market account.
Communication Services Select Sector Index	The Communication Services Select Sector Index is designed to reflect modern communication activities and information delivery mechanisms. Industries include Telecommunications, Media, Wireless, Entertainment and Internet Media.
Consumer Discretionary Select Sector Index	The Consumer Discretionary Select Sector Index includes industries such as retail, automobiles and components, consumer durables, apparel, hotels, and restaurants.
Consumer Staples Select Sector Index	The Consumer Staples Select Sector Index consists of companies involved in the development and production of consumer products that cover food and drug retailing, beverages, food products, tobacco, household products, and personal products.
Dow Jones U.S. Large-Cap Banks Equal Weight Total Stock Market Total Return Index	The Dow Jones U.S. Large-Cap Banks Equal Weight Total Stock Market Total Return Index consist of large capitalization United States banks. Each security in the index is allocated an equal weight rather than a market capitalization weight.
Dow Jones U.S. Large-Cap Health Care Equal Weight Total Stock Market Total Return Index	The Dow Jones U.S. Large-Cap Health Care Equal Weight Total Stock Market Total Return Index consists of the securities of large capitalization United States health care companies. Each security in the index is allocated an equal weight rather than a market capitalization weight.

Reference index	Description of reference index
Energy Select Sector Index	The Energy Select Sector Index consist of companies which primarily develop and produce crude oil and natural gas, and provide drilling and other energy-related services.
Financial Select Sector Index	The Financial Select Sector Index consists of a wide array of diversified financial service firms, insurance, banks, capital markets, consumer finance and thrift companies.
FTSE Canada All Corporate Bond Index	The FTSE Canada All Corporate Bond Index consists of Canadian investment-grade, fixed-rate, corporate bonds. Eligible securities must have greater than one year to maturity and \$100 million units outstanding.
FTSE Canada Corporate A Bond Index	The FTSE Canada Corporate A Bond Index consists of semi-annual pay fixed rate corporate bonds denominated in Canadian dollars, with a credit rating of A or higher and greater than \$100 million outstanding.
FTSE Canada Short Term Federal (Canada) Total Return Index™	The FTSE Canada Short Term Federal (Canada) Total Return Index™ consists of semi-annual pay fixed rate federal bonds denominated in Canadian dollars, with an effective term to maturity less than five years and greater than one year.
FTSE Canada Short Term Overall Bond Index	The FTSE Canada Short Term Overall Bond Index is intended to represent the Canadian short-term bond market and contains bonds with remaining effective terms greater than or equal to one year and less than or equal to five years.
FTSE Canada Universe Bond Index	The FTSE Canada Universe Bond Index is a broad measure of the Canadian investment-grade fixed income market consisting of federal, provincial and corporate bonds.
FTSE Canada Universe Corporate BBB Bond Index™	The FTSE Canada Universe Corporate BBB Bond Index™ consists of semi-annual pay fixed rate corporate bonds denominated in Canadian dollars, with a credit rating of BBB and greater than \$100 million outstanding.
FTSE Canada Universe Total Return Index™	The FTSE Canada Universe Total Return Index™ is designed to be a broad measure of the Canadian investment-grade fixed income market consisting of federal, provincial and corporate bonds.
FTSE Canada Short Term Corporate Bond Index	The FTSE Canada Short Term Corporate Bond Index consists of semi-annual pay fixed rate corporate bonds denominated in Canadian dollars, with an effective term to maturity less than five years but greater than one year, a credit rating of BBB or higher and minimum size requirement of \$100 million per issue. Each security in the index is weighted by its relative market capitalization and rebalanced on a daily basis.
Health Care Select Sector Index	The Health Care Select Sector Index includes companies primarily focused on health care equipment and supplies, health care providers and services, biotechnology, and pharmaceuticals industries.
Industrials Select Sector Index	The Industrials Select Sector Index consists of various industries, including: aerospace and defense, building products, construction and engineering, electrical equipment, conglomerates, machinery, commercial services and supplies, air freight and logistics, airlines, marine, road and rail, etc.
London Bullion Market Association Gold Price (Canadian Dollars)	The London Bullion Market Association Gold Price is determined by an auction process conducted by the ICE Benchmark Administration and published by the LBMA.
Materials Select Sector Index	The Materials Select Sector Index is primarily composed of companies involved in such industries as chemicals, construction materials, containers and packaging, metals and mining, and paper and forest products.

Reference index	Description of reference index
MSCI ACWI Climate Paris Aligned Index CAD and MSCI ACWI Index CAD	The MSCI ACWI Climate Paris Aligned Index is based on the MSCI ACWI Index, its parent index, and includes large and mid cap securities across Developed Markets and Emerging Markets countries. The index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements.
MSCI ACWI Quality Net Total Return CAD	The MSCI ACWI Quality Net Total Return CAD is a factor based global equity index that screens for quality companies based on three main fundamental variables: high return on equity, stable year-over-year earnings growth, and low financial leverage.
MSCI Canada Enhanced Value Capped Index	MSCI Canada Enhanced Value Capped Index is based on its parent index, MSCI Canada Index, which includes large and mid-cap representation across the Canadian equity markets exhibiting overall value style characteristics, targeting the higher of 25 securities or 50% market cap coverage of the parent index. The index is designed to represent the performance of securities that exhibit higher value characteristics relative to their peers within the corresponding GICS® sector. The value investment style characteristics for index construction are defined using three variables: Price-to-Book Value, Price-to-Forward Earnings and Enterprise Value-to-Cash flow from Operations. The index applies a 10% security capping, applied at each semi-annual rebalance.
MSCI Canada Selection Index	The MSCI Canada Selection Index consists of large and mid-capitalization stocks across Canada that have been selected based on MSCI ESG ratings.
MSCI EAFE Selection Index	The MSCI EAFE Selection Index consists of large and mid-capitalization stocks across developed markets ex-North America that have been selected based on MSCI ESG ratings.
MSCI EAFE Hedged 100% to CAD Net Total Return Index	The MSCI EAFE Hedged 100% to CAD Net Total Return Index is an equity index that captures large and mid-capitalization representation across developed market countries around the world, excluding the U.S. and Canada.
MSCI EAFE Minimum Volatility Net Total Return Index (CAD)	The MSCI EAFE Minimum Volatility Net Total Return Index (CAD) aims to reflect the performance characteristics of a minimum variance strategy applied to the large and mid-capitalization equity universe across developed markets countries around the world excluding the U.S. and Canada.
MSCI EAFE Net Total Return USD Index	The MSCI EAFE Net Total Return USD Index is an equity index that captures large and mid-capitalization representation across developed market countries around the world, excluding the U.S. and Canada.
MSCI Emerging Markets Minimum Volatility Net Total Return Index	The MSCI Emerging Markets Minimum Volatility Net Total Return Index aims to reflect the performance characteristics of a minimum variance strategy applied to large and mid-capitalization equities across 24 emerging markets countries.
MSCI Europe Index	The MSCI Europe Index captures large and mid-capitalization representation across 15 developed markets countries in Europe.
MSCI Europe Quality Net Return EUR Index	The MSCI Europe Quality Net Return EUR Index is a factor based European equity index that screens for quality companies based on three main fundamental variables: high return on equity, stable year-over-year earnings growth, and low financial leverage.

Reference index	Description of reference index
MSCI USA Enhanced Value Capped Index	MSCI USA Enhanced Value Capped Index is based on its parent index, MSCI USA Index, which includes the large and mid-cap representation across the U.S. equity markets exhibiting overall value style characteristics. The index is designed to represent the performance of securities that exhibit higher value characteristics relative to their peers within the corresponding GICS® sector. The value investment style characteristics for index construction are defined using three variables: Price-to-Book Value, Price-to-Forward Earnings and Enterprise Value-to-Cash flow from Operations. The index applies a 10% security capping, applied at each semi-annual rebalance.
MSCI USA Selection Index	The MSCI USA Selection Index consists of large and mid-capitalization stocks across the U.S.A. that have been selected based on MSCI ESG ratings.
MSCI USA Minimum Volatility Net Return Index	The MSCI USA Minimum Volatility Net Return Index aims to reflect the performance characteristics of a minimum variance strategy applied to the large and mid-capitalization USA equity universe. The index is 100% hedged to the CAD.
MSCI USA Quality Net Total Return Index	The MSCI USA Quality Net Total Return Index is a factor based U.S. equity index that screens for quality companies based on three main fundamental variables: high return on equity, stable year-over-year earnings growth, and low financial leverage.
MSCI World Consumer Discretionary Index	The MSCI World Consumer Discretionary Index is designed to capture the large and mid-capitalization segments across 23 developed markets around the world. All securities in the index are classified in the Consumer Discretionary sector as per the Global Industry Classification Standard (GICS®).
MSCI World Consumer Staples Index	The MSCI World Consumer Staples Index is designed to capture the large and mid-capitalization segments across 23 developed markets around the world. All securities in the index are classified in the Consumer Staples sector as per the Global Industry Classification Standard. (GICS®).
MSCI World Selection Index	The MSCI World Selection Index consists of large and mid-capitalization stocks across global developed markets that have been selected based on MSCI ESG ratings.
MSCI World Index	The MSCI World Index consists of large and mid-cap equities across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country.
MSCI World Information Technology USD (CAD) Index	The MSCI World Information Technology USD (CAD) Index is designed to capture the large and mid-capitalization segments across 23 Developed Markets countries. All securities in this index are classified in the Information Technology sector as per the Global Industry Classification Standard (GICS®).
MSCI World Telecommunication Services Sector USD (CAD) Index	The MSCI World Telecommunication Services Sector USD (CAD) Index is designed to capture the large and mid-capitalization segments across 23 developed markets countries. All securities in the index are classified in the Telecommunication Services sector as per the Global Industry Classification Standard (GICS®).
MSCI World Total Return Index	The MSCI World Total Return Index is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country.
NASDAQ-100 Total Return Index	The NASDAQ-100 Total Return Index is a modified market capitalization weighted index tracks 100 of the largest non-financial securities listed on the Nasdaq Stock Market based on market capitalization.
Real Estate Select Sector Index	The Real Estate Select Sector Index includes companies from the following industries: Real Estate Management & Development and REITs, excluding Mortgage REITs.

Reference index	Description of reference index
Russell Developed Large Cap Consumer Discretionary Capped 100% Hedged to CAD Total Return Index	The Russell Developed Large Cap Consumer Discretionary Capped 100% Hedged to CAD Total Return Index is a global equity index that includes companies classified as consumer discretionary.
Russell Developed Large Cap Consumer Staples Capped 100% Hedged to CAD Total Return	The Russell Developed Large Cap Consumer Staples Capped 100% Hedged to CAD Total Return is a global equity index that includes companies classified as consumer staples.
S&P/TSX Capped Composite Total Return Index	The S&P/TSX Capped Composite Total Return Index is a market capitalization-weighted index of securities of the largest and most liquid companies on the TSX.
S&P 500 Dividend Aristocrats Total Return Index	The S&P 500 Dividend Aristocrats Total Return Index measures the performance of S&P 500 companies that have increased dividends every year for the last 25 consecutive years.
S&P 500 Health Care Index	The S&P 500 Health Care Index consists of companies included in the S&P 500 that are classified as members of the GICS health care sector.
S&P 500 Hedged to Canadian Dollars Index	The S&P 500 Hedged to Canadian Dollars Index is a market capitalization-weighted index of securities of 500 of the largest U.S. public issuers provided by S&P, hedged to Canadian dollars.
S&P Global 1200 Energy Index	The S&P Global 1200 Energy Index consists of all members of the S&P Global 1200 that are classified within the GICS energy sector.
S&P Global Agribusiness Composite Index (TR)	The S&P Global Agribusiness Composite Index (TR) provides liquid exposure to 24 of the largest publicly-traded agribusiness companies that meet specific investability requirements.
S&P Global Clean Energy Index	The S&P Global Clean Energy Index measures companies from both developed and emerging markets that are involved in clean energy related businesses.
S&P MidCap 400® Index	The S&P MidCap 400® Index consists of 400 mid-capitalization U.S. public issuers.
S&P North American Technology Sector Index	The S&P North American Technology Sector Index measures the performance of U.S. securities classified under the GICS® information technology sector as well as the internet & direct marketing retail, interactive home entertainment, and interactive media & services sub-industries.
S&P Preferred Stock Total Return Index	The S&P Preferred Stock Total Return Index measures the U.S. Preferred Share market that pays higher dividends. Eligible securities must be U.S. listed, have a minimum market cap of US\$100 million and meet the minimum liquidity requirements.
S&P SmallCap 600® Index	The S&P SmallCap 600® Index consists of 600 small-capitalization U.S. public issuers.
S&P/TSX Preferred Share Index	The S&P/TSX Preferred Share Index is designed to track to the performance of the Canadian preferred stock market.
S&P/TSX 60 Index	The S&P/TSX 60 Index consists of 60 large-capitalization Canadian public issuers.
S&P/TSX Canadian Dividend Aristocrats Index	The S&P/TSX Canadian Dividend Aristocrats Index measures the performance of companies included in the S&P Canada BMI that have followed a policy of consistently increasing dividends every year for at least five years.

Reference index	Description of reference index
S&P/TSX Capped Composite Index	The S&P/TSX Capped Composite Index (Index) includes top-ranked Canadian stocks, representing approximately 95% of the Canadian equity market. It is the primary gauge for performance of Canadian-based, TSX-listed companies.
Solactive Equal Weight Canada Banks Index	The Solactive Equal Weight Canada Banks Index includes Canadian exchange listed securities in the diversified bank industry. Constituents are subject to minimum market capitalization and liquidity screens.
Solactive Equal Weight US Bank Index	The Solactive Equal Weight US Bank Index consist of large capitalization United States banks. Each security in the index is allocated an equal weight rather than a market capitalization weight.
Solactive GBS Japan Large & Mid Cap Index	The Solactive GBS Japan Large & Mid Cap USD Index tracks the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in the Japanese market. It is weighted by free-float market capitalization.
Solactive Laddered Canadian Preferred Share Index PR	The Solactive Laddered Canadian Preferred Share Index includes Canadian preferred shares that meet size, liquidity, listing and quality criteria. The Index uses a five year laddered structure where annual buckets are equal weighted while constituent securities within each bucket are market capitalization weighted.
Solactive US Preferred Share Select Index (Net Total Return)	The Solactive US Preferred Share Select Hedged to CAD Index (Net Total Return) measures the U.S. Preferred Share market that pays higher dividends. Eligible securities must be U.S. listed, have a minimum market cap of US\$100 million and meet the minimum liquidity requirements.
Technology Select Sector Index	The Technology Select Sector Index consists of companies primarily covering products developed by internet software and service companies, IT consulting services, semiconductor equipment, computers and peripherals.
Utilities Select Sector Index	The Utilities Select Sector Index consists primarily of companies that produce, generate, transmit or distribute electricity or natural gas.

We assign each BMO ETF to one of the following investment risk categories:

- low
- low to medium
- medium
- medium to high
- high

Other types of risks, both measurable and non-measurable, exist. See **What are the risks of investing in the BMO ETFs?** on page 168 for further details on the risks associated with investing in a BMO ETF.

Just as historical performance may not be indicative of future returns, historical volatility may not be indicative

of future volatility. We review each BMO ETF's risk rating annually and at any time when we no longer deem its risk rating to be reasonable under the circumstances. You may obtain a more detailed explanation of our risk classification methodology, at no cost by calling us toll free at 1-800-361-1392.

Investment restrictions

Investment restrictions and practices

Each BMO ETF has a fundamental investment objective that may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose. Each BMO ETF pursues its investment objective using investment

strategies that we may change from time to time. Refer to the BMO ETF's profile for a description of its investment objective and its investment strategies.

Each BMO ETF is a mutual fund or an alternative mutual fund and is subject to NI 81-102. Except as indicated in the following sections, each BMO ETF is subject to, and is managed in accordance with, the investment restrictions and practices set forth in NI 81-102. These investment restrictions and practices are designed in part to ensure that each BMO ETF's investments are diversified and relatively liquid, and to ensure the proper administration of each BMO ETF.

Exemptions from NI 81-102

BMO Covered Call Canadian Banks ETF

BMO Covered Call Canadian Banks ETF has obtained exemptive relief from the securities regulatory authorities to permit the BMO ETF to purchase certain securities or enter into specified derivatives transactions in connection therewith such that, immediately after the transaction, more than 10% of its net assets would be invested directly or indirectly in the securities of one issuer for the purposes of determining compliance with the concentration restriction in subsection 2.1(1) of NI 81-102, subject to certain conditions.

BMO Covered Call Dow Jones Industrial Average Hedged to CAD ETF

BMO Covered Call Dow Jones Industrial Average Hedged to CAD ETF has obtained exemptive relief to permit the BMO ETF to purchase, or obtain exposure to, a security of an issuer included as a constituent in the Dow Jones Industrial Average such that, immediately after the transaction, more than 10% of the BMO ETF's NAV would be invested, either directly or indirectly, in securities of that issuer for the purposes of determining compliance with the concentration restriction in subsection 2.1(1) of NI 81-102. As conditions of the relief, BMO Covered Call Dow Jones Industrial Average Hedged to CAD ETF's investment in a single issuer must not exceed that issuer's weight in the Dow Jones Industrial Average at the time of purchase, and certain

disclosure must be made in the prospectus, including the risks associated with investing in reliance on the relief.

BMO Canadian MBS Index ETF

BMO Canadian MBS Index ETF seeks to track a mortgage backed securities index and has obtained exemptive relief to permit the BMO ETF to invest in mortgage backed securities issued by the Bank of Montreal or a subsidiary bought in a primary offering up to the amount that is no greater than the amount in the index.

Investment in UCITS and SICAV

The BMO ETFs have received exemptive relief from subsections 2.5(2)(a), (a.1) and (c) of NI 81-102 to permit each BMO ETF to invest up to 10% of its net assets, determined at market value at the time of the investment, in Underlying Funds that are Undertaking for Collective Investments in Transferable Securities (UCITS) or *Société d'Investissement à Capital Variable* (SICAV) even though the UCITS or SICAV funds are not subject to NI 81-102 and are not reporting issuers in any province or territory of Canada.

Investment in certain affiliated funds

The Manager has received relief that permits the BMO ETFs to invest a portion of its assets in:

- any collective investment scheme that is not an investment fund and that is, or will be, managed by us or by an affiliate of ours;
- BMO Georgian Alignment II Access Fund LP, an Ontario limited partnership that is a non-redeemable investment fund and that is not a reporting issuer;
- BMO Partners Group Private Markets Fund, an Ontario trust that is a mutual fund and that is not a reporting issuer; and

any future investment fund that is managed by us or by an affiliate of ours and that has similar non-traditional investment strategies.

Investment in securities underwritten by a related entity

We have received relief that permits the BMO ETFs to invest in debt instruments that have been:

- issued by corporations that are not reporting issuers in Canada, regardless of whether these instruments have a designated rating (as defined in NI 81-102) and
- underwritten by an entity related to the BMO ETFs, to us or an entity related to us,

provided certain conditions are met, including that the BMO ETFs have received prior IRC approval.

In specie transactions

We have received relief that permits the BMO ETFs to engage in *in specie* transactions, provided certain conditions are met.

Investment in Rule 144A securities

The BMO ETFs may rely on an exemption from the requirements in securities legislation relating to purchasing and holding illiquid assets with respect to certain debt instruments that qualify for, and may be traded pursuant to, the exemption from the registration requirements of the *Securities Act* of 1933, as amended (the **U.S. Securities Act**), as set out in Rule 144A of the U.S. Securities Act for resales of certain fixed income securities to “qualified institutional buyers” (as such term is defined in the U.S. Securities Act). This relief is subject to certain conditions.

IRC approvals

The BMO ETFs have received the approval of the IRC, and may rely upon such approval and the relevant requirements of NI 81-107, to vary certain of the investment restrictions and requirements contained in securities legislation, including NI 81-102, to engage in certain transactions with related parties (each, a **Related-Party Transaction**).

The following sections provide a summary of each Related-Party Transaction. In respect of each Related-Party Transaction, the IRC has provided its approval by way of a standing instruction.

The IRC reviews Related-Party Transactions at least quarterly. In its review, the IRC considers whether the investment decisions in respect of the Related-Party Transactions:

- were made by the Manager in the best interests of the BMO ETFs and were free from any influence of the Manager or an entity related to the Manager and without taking into account any consideration relevant to the Manager or an entity related to the Manager;
- were in compliance with the conditions of the policies and procedures of the Manager;
- were in compliance with the applicable standing instruction of the IRC; and
- achieved a fair and reasonable result for the BMO ETF.

In the event an investment decision in respect of a Related-Party Transaction is not made in accordance with a condition imposed by securities legislation or by the IRC in its approval, we are required to notify the IRC and the IRC is required to notify the Canadian securities regulatory authorities as soon as practicable. The IRC is also required to report such a transaction in its annual report to the unitholders of the BMO ETFs.

For additional information about the mandate, duties, and responsibilities of the IRC, see **Independent Review Committee** on page 13.

Transactions in securities of related issuers

The investment restrictions and requirements contained in applicable securities legislation prohibit a registered portfolio adviser from knowingly causing a fund to purchase a security of an issuer related to it, its manager or an entity related to its manager.

However, in accordance with NI 81-107, a fund may make or hold an investment in the security of an issuer related to it, its manager or an entity related to its manager, if certain conditions are met, including that the purchase is made on an exchange on which the securities of the issuer are listed and traded.

In addition, in accordance with NI 81-107, a fund may make an investment in the secondary market in a non-exchange traded debt security of an issuer related to it, its manager or an entity related to the manager, and continue to hold the debt security, if certain conditions are met, including that certain pricing conditions are met.

Lastly, in accordance with NI 81-107, a fund may make an investment in a long-term debt security of an issuer related to it, its manager or an entity related to the manager, provided that the investment is made under a distribution of the long-term debt security of that issuer (*i.e.*, in a primary offering), and if certain conditions are met, including the following:

- the debt security has a term to maturity greater than 365 days;
- the debt security is not asset-backed commercial paper; and
- immediately after the investment is made, the fund complies with holding limits.

Principal trades in debt securities

The investment restrictions and requirements contained in applicable securities legislation prohibit a fund from purchasing a security from or selling a security to an entity related to it, its manager or an entity related to its manager, unless the security is traded on an exchange and certain pricing conditions are met.

However, in accordance with NI 81-107, a fund may purchase a debt security of any issuer from, or sell a debt security of any issuer to, a dealer related to the portfolio manager, acting as principal (*i.e.*, for its own account), if certain conditions are met, including that certain pricing conditions are met.

Investments in securities underwritten by a related entity

The investment restrictions and requirements contained in applicable securities legislation prohibit a fund from knowingly making an investment in a class of securities of an issuer during, or for 60 days after, the period in which a related entity acts as an underwriter in the distribution of securities of that class of securities, except as a member of the selling group distributing five percent or less of the securities underwritten. This prohibition also does not apply to an investment in a class of securities issued or fully and unconditionally guaranteed by the government of Canada or the government of a jurisdiction in Canada.

However, in accordance with NI 81-102, this prohibition does not apply to an investment in a class of securities of a reporting issuer in Canada if certain conditions are met. If the investment is made during the distribution, the conditions include that the distribution of securities of the reporting issuer is made by prospectus or under an exemption from the prospectus requirement. If the investment is made during the 60 days after the distribution, the conditions include that the investment is made on an exchange on which the securities of the reporting issuer are listed and traded or that, in the case of a debt security that does not trade on an exchange, certain pricing conditions are met.

Inter-fund trades

The investment restrictions and requirements contained in applicable securities legislation prohibit a portfolio manager of a fund or managed account from knowingly causing a fund or managed account to purchase a security of an issuer from, or sell a security of an issuer to, another investment fund for which the portfolio manager is the portfolio adviser.

However, in accordance with NI 81-107, this prohibition does not apply when the trade occurs between two investment funds or managed accounts managed by the same manager or an affiliate of the manager, if certain conditions are met, including that certain pricing conditions are met.

Tax-related investment restrictions

A BMO ETF will not make an investment or conduct any activity that would result in the BMO ETF:

- failing to qualify as a “mutual fund trust” within the meaning of the Tax Act;
- being subject to the tax for SIFT trusts; or
- if it becomes a “registered investment” for purposes of the Tax Act, acquiring an investment that is not a “qualified investment” under for registered plans if, as a result thereof, the BMO ETF would be subject to a material amount of tax under Part X.2 of the Tax Act.

The BMO ETFs have not deviated in the last year from the provisions of the Tax Act that are applicable to the BMO ETFs in order for units of the BMO ETFs to be “qualified investments” for registered plans.

Description of units offered by the BMO ETFs

Series of the BMO ETFs

A BMO ETF may offer units of different series, each of which is described in this section. The cover page of this simplified prospectus lists the series offered by each BMO ETF. Read this section to determine which series is right for you.

The ‘know your client’ rule

The BMO ETFs are sold through dealers. The ‘know your client’ rule is intended to ensure that your financial advisor understands your investment needs and objectives and your level of investment knowledge. With this information and his or her own expertise, your financial advisor can recommend the Units of the BMO ETFs that are best for you.

CAD Units

Each BMO ETF, other than BMO Ultra Short-Term US Bond ETF, offers CAD Units, being a series of units denominated in Canadian dollars.

The CAD Units of each BMO ETF with “Hedged” in the name of the BMO ETF are hedged back to the Canadian dollar.

USD Units

USD Units employ the USD as their Valuation Currency, and secondary market trades in these Units are expected to occur in USD.

Hedged Units

Generally, a BMO ETF that offers Hedged Units:

- holds investments that provide exposure to foreign currencies; and
- on only the portion of its NAV attributable to its Hedged Units, uses derivatives to implement a hedging strategy whose objective is to minimize changes in the Hedged Units’ NAV resulting from changes in the exchange rate between the Canadian dollar and the foreign currencies to which the BMO ETF’s investments provide exposure.

Accumulating Units

Accumulating Units are substantially identical to the CAD Units of the same BMO ETF, except as described in the following paragraph.

A BMO ETF that offers Accumulating Units:

- will make quarterly distributions on the Accumulating Units, regardless of the frequency of distributions on the BMO ETF’s non-accumulating units;

- will cause each such distribution to be automatically reinvested in additional Accumulating Units; and
- immediately following each such distribution, will consolidate the Accumulating Units so that following the consolidation, provided the amount reinvested was not reduced due to the application of withholding tax, the number of Accumulating Units held by each unitholder will be the same as immediately preceding the distribution.

USD Accumulating Units

USD Accumulating Units employ the USD as their Valuation Currency, and secondary market trades in these Units are expected to occur in USD.

USD Accumulating Units are substantially identical to the USD Units of the same BMO ETF, except as described in the following paragraph.

A BMO ETF that offers USD Accumulating Units:

- will make quarterly distributions on the USD Accumulating Units, regardless of the frequency of distributions on the BMO ETF's non-accumulating units;
- will cause each such distribution to be automatically reinvested in additional USD Accumulating Units; and
- immediately following each such distribution, will consolidate the USD Accumulating Units so that following the consolidation, provided the amount reinvested was not reduced due to the application of withholding tax, the number of USD Accumulating Units held by each unitholder will be the same as immediately preceding the distribution.

Fixed Percentage Distribution Units

The Fixed Percentage Distribution Units will distribute a monthly amount equal to:

- the series' NAVPS (see **Calculation of net asset value** on page 36) calculated as of the last day of the preceding calendar year or, if the series started in the current calendar year, as of its start date;
- multiplied by the annualized distribution rate of 6%; and
- divided by 12.

We may, at any time and in our sole discretion, make any of the following changes to Fixed Percentage Distribution Units:

- **change the percentage rate used to calculate its regular monthly distributions;**
- **otherwise modify the calculation of its regular monthly distributions; or**
- **discontinue its regular monthly distributions entirely.**

If we make any such change to Fixed Percentage Distribution Units, we will issue a press release to communicate the change.

The percentage rate applicable to the Fixed Percentage Distribution Units may be higher than the rate of return or the portfolio yield of the BMO ETF that offers it. As a result, if you elect to receive some or all of the regular monthly distributions in cash, the value of your investment in the BMO ETF may decline over time.

Distribution policies

This section explains the frequency and composition of distributions that you may receive from a BMO ETF. It also explains the circumstances in which you may elect to receive these distributions in cash.

Types and frequencies of distributions

At least annually, each BMO ETF that has any undistributed net income or any undistributed net capital

gains will distribute any such amounts to its investors. We call this type of distribution a **Year-End Distribution**. Generally, Year-End Distributions will occur in December; however, they may also occur at other times of the year.

Certain BMO ETFs may distribute their estimated or actual undistributed net income on a monthly or quarterly basis. We call this type of distribution a **Periodic Distribution**.

Table 173 identifies each BMO ETF that may make Periodic Distributions on series other than Fixed Percentage Distribution Units, and for each such BMO ETF indicates whether those Periodic Distributions:

- occur monthly (**M**) or quarterly (**Q**); and
- consist of estimated (**E**) or actual (**A**) net income.

We may, at any time and in our sole discretion, make any of the following changes to a series that makes Periodic Distributions:

- **modify the method of calculating its distributable net income from estimated to actual or *vice versa*;**
- **change the frequency of its Periodic Distributions; or**
- **discontinue its Periodic Distributions entirely.**

If we make the second or third of these changes to a series of a BMO ETF, we will issue a press release to communicate the change.

Content of distributions

Each Year-End Distribution will generally consist entirely of net income and/or net capital gains.

Each Periodic Distribution will generally consist:

- in the case of Fixed Percentage Distribution Units, of net income to the extent of the BMO ETF's allocation of net income to that series for that month, and of a return of capital to the extent that the amount of the monthly distribution exceeds this allocation; and
- in the case of any other series, entirely of net income,

provided in each case that if a BMO ETF makes a Periodic Distribution comprised in whole or in part of estimated net income, and the estimated net income so distributed exceeds the BMO ETF's actual net income as determined at its taxation year end, the amount of the excess may consist of a return of capital.

For the tax consequences of distributions, see **Distributions on Fund Units** on page 64.

Reinvestment of distributions

We will reinvest each Year-End Distribution, net of any applicable withholding tax, on your behalf, without charge, in additional Units of the same series of the same BMO ETF on which that distribution was made.

Immediately following a Year-End Distribution, we will consolidate the Units of the series so that following the consolidation, provided the amount reinvested was not reduced due to the application of withholding tax, the

number of Units of the series held by each unitholder will be the same as immediately preceding the Year-End Distribution.

We will pay each Periodic Distribution in cash, except for:

- distributions on Accumulating Units; and
- distributions you have elected to reinvest in additional Units of the series and BMO ETF on which they are made (see Distribution reinvestment plans on page 49).

Name, formation, and history of the funds

Formation of the BMO ETFs

Each BMO ETF is a trust established by us under the laws of the Province of Ontario on the date indicated in Table 174 under a declaration of trust (see **Declaration of Trust** on page 23).

Table 174: Fund inception dates

Fund	Date of inception

Each BMO ETF in Table 176 experienced a material change of investment objectives or investment strategies during the last ten years.

Table 176: Material changes to investment objectives or strategies during the last ten years

Fund	Change	Date of change
BMO MSCI India Selection Equity Index ETF	Change the underlying index from S&P/BNY Mellon India Select ADR Index to MSCI India ESG Leaders Index, and add a responsible investment strategy	December 13, 2021
BMO MSCI China Selection Equity Index ETF	Change the underlying index from S&P/BNY Mellon China Select ADR Index to MSCI China ESG Leaders Index and add a responsible investment strategy	December 3, 2021

Termination of the BMO ETFs

A BMO ETF may be terminated by us on at least 60 days' notice to unitholders of such termination and we will issue a press release in advance thereof. We may also terminate an Index Fund in the event that the Index Provider ceases to calculate the Index or the respective index license agreement is terminated, as described above under "Index license agreements". Upon termination of a BMO ETF, the securities, cash and other assets remaining after paying or providing for all liabilities and obligations of the BMO ETF shall be

distributed pro rata among the unitholders of the BMO ETF.

Each of the following BMO ETFs will terminate on its Maturity Date or an earlier date:

- BMO Target 2027 Canadian Corporate Bond ETF
- BMO Target 2028 Canadian Corporate Bond ETF
- BMO Target 2029 Canadian Corporate Bond ETF.

The rights of unitholders to exchange and redeem units described under “Purchases, switches, and redemptions” will cease as and from the date of termination of the applicable BMO ETF.

Fund-specific information

In this part of the document, you will find everything you need to help you evaluate and compare the BMO ETFs in light of your investment needs. The BMO ETF descriptions that follow give you specific information about each BMO ETF.

Information that is common to some or all of the BMO ETFs is described here. You should refer back to this section when reading a BMO ETF description to make sure you have complete information about that BMO ETF.

Fund details

This section tells you the BMO ETF’s type, its start date, the nature of the units it offers, whether the BMO ETF’s units are eligible for registered plans and the names of the BMO ETF’s portfolio adviser and/or sub-advisor.

What types of mutual funds exist?

Generally, what we identify as each BMO ETF’s type is the category to which it has been, or is expected to be, assigned by The Canadian Investment Funds Standards Committee. This organization was formed by Canada’s major mutual fund database and research firms in order to standardize the classifications of mutual funds in Canada. Its category definitions and assignments are available at www.cifsc.org.

What does the Fund invest in?

This section tells you the BMO ETF’s fundamental investment objective and the investment strategies it uses to pursue that objective.

Investment objectives

These are the goals of the BMO ETF. You’ll find details about the kinds of securities the BMO ETF invests in, as well as any special focus, such as concentrating investments in a particular country or industry.

Certain BMO ETFs, identified on the cover page, have investment objectives that reference responsible investing.

Investment strategies

Investment in depositary receipts

Any BMO ETF may invest in depositary receipts to obtain indirect ownership of foreign securities whose direct ownership would be consistent with the BMO ETF’s investment objective and investment strategies.

Depositary receipts are instruments, issued by banks or other financial institutions, that represent the value of securities issued by foreign companies. These receipts are most often known as one of the following, depending on the location of the depositary:

- American Depositary Receipts,
- European Depositary Receipts, or
- Global Depositary Receipts.

Investment in syndicated loans

Certain BMO ETFs may invest in loans and/or in loan participations (**syndicated loans**).

A syndicated loan is a credit facility that is extended to a corporation or other entity by a financial institution and subsequently sold by that financial institution, in whole or in part, to one or more investors.

The syndicated loan in which a BMO ETF invests may be a term loan or, to the extent permitted by securities regulations:

- a synthetic term loan,
- a delayed-draw term loan,
- a revolving credit facility, or

- a receivables purchase facility.

Interest on a syndicated loan typically accrues at a rate equal to a reference rate that resets periodically plus a spread that is fixed.

Use of derivatives

Each BMO ETF may use derivatives as permitted by NI 81-102, as modified by any exemptions therefrom that the BMO ETF has received (see **Exemptions from NI 81-102** on page 150).

A BMO ETF that may use derivatives may do so:

- to hedge against losses from changes in security prices, exchange rates or interest rates;
- to gain indirect exposure to individual securities, markets, or other investments, instead of investing directly in those securities, markets, or other investments; or
- to seek to generate additional income.

In the BMO ETF descriptions, we indicate whether a particular BMO ETF uses derivatives.

Securities lending, repurchase and reverse repurchase agreements

The BMO ETFs may enter into securities lending agreements, repurchase agreements, and/or reverse repurchase agreements as permitted by NI 81-102.

A BMO ETF may enter into these types of agreements in order to earn additional income.

Short selling

Each BMO ETF may engage in short selling as permitted by NI 81-102.

Short selling provides a BMO ETF with additional opportunities to profit from its portfolio adviser's ability to identify mispriced securities or to anticipate decreases in security prices.

Responsible investment strategies

Certain BMO ETFs, including but not limited to those BMO ETFs whose investment objectives reference responsible investment, may employ one or more of the following strategies:

- **integration & evaluation:** The BMO ETF explicitly considers ESG-related factors alongside traditional financial factors when making investment decisions. Portfolio managers that employ this strategy use various resources for evaluating and monitoring ESG-related factors in a qualitative and quantitative manner including, but not limited to, internal and external research, company reports, company meetings, industry publications, news publications and/or analyst reports.
- **exclusionary screening:** The BMO ETF excludes certain types of securities, issuers, sectors, or regions from its portfolio based on evaluations of activities, business practices, or business segments based on one or more ESG-related factors.
- **best-in-class screening:** The BMO ETF seeks to invest in issuers that perform better than their peers on one or more performance metrics that incorporate ESG-related factors.
- **engagement & stewardship:** The BMO ETF seeks to influence the issuers in which it has invested to make decisions that increase the positive impact of those issuers on ESG-related factors. To this end, the BMO ETF may vote on management and/or shareholder resolutions in accordance with certain ESG-related considerations or aims and may interact with the management of the issuers in which it has invested through meetings and/or written dialogue in accordance with certain ESG-related considerations or aims.
- **thematic investing:** The BMO ETF seeks to invest in securities, issuers, sectors, or regions

that are expected to benefit from long-term macroeconomic or structural trends that are ESG-related

- **impact investing:** The BMO ETF seeks to generate a measurable, positive environmental and/or social impact in addition to a financial return.

Certain BMO ETFs may base their responsible investment strategies on ratings provided by MSCI ESG.

Table 177 identifies which responsible investment strategies are employed by the BMO ETFs. A circle (●) indicates that a particular strategy is employed by a particular BMO ETF.

MSCI ESG ratings

A MSCI ESG rating is designed to measure a company's resilience to long-term, industry-material ESG risks. MSCI ESG uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers.

ESG risks and opportunities may vary by industry and company. The MSCI ESG ratings model identifies the ESG risks that are most material to a GICS® sub-industry or sector. Corporate disclosure is an important input into model, and alternative data from hundreds of media, academic, non-government organizations, regulatory and government sources supplement those disclosures and uncover additional insights.

MSCI ESG's approach to identifying severe business controversies is stakeholder-driven and covers the following five categories of stakeholder impact: environment, human rights and community, labour rights and supply chain, customers, and governance. If MSCI ESG identifies a company as having a severe business controversy, this means it was implicated in one or more situations in which there are credible allegations that the company or its management inflicted serious large-scale harm in violation of global norms.

What are the risks of investing in the BMO ETFs?

For a description of each risk identified in this section, see **What are the risks of investing in a mutual fund?** on page 128.

Certain risks are applicable to all BMO ETFs, or to all BMO ETFs that pursue certain types of strategies or offer units of certain series:

- **changes in legislation risk** applies to all BMO ETFs;
- **currency hedging risk** applies to the Hedged Units of each BMO ETF that offers such Hedged Units as well as the CAD Units of each BMO ETF with “Hedged” in the name of the BMO ETF;
- **cybersecurity risk** applies to all BMO ETFs;
- **portfolio management risk** applies to all BMO ETFs;
- **index investment risk** applies to each BMO ETF that seeks to replicate the performance of an index as well as each BMO ETF that invests in an Underlying Fund that seeks to replicate the performance of an index;
- **underlying fund risk** applies to each BMO ETF that may invest in Underlying Funds;
- **derivative risk** applies to each BMO ETF that may use derivatives for hedging and/or non-hedging purposes and to the Hedged Units of each BMO ETF that offers such Hedged Units;
- **securities lending, repurchase agreement and reverse repurchase agreement risk** applies to each BMO ETF that may enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements;
- **series risk** applies to each BMO ETF that issues Units of more than one series;
- **short selling risk** applies to each BMO ETF that may engage in short selling;

- **responsible investment risk** applies to each BMO ETF that uses responsible investment strategies; and
- **capital depletion risk** applies to the Fixed Percentage Distribution Units of each BMO ETF that offers such Units.
- **secondary market trading risk** applies to each BMO ETF.

Uncertain tax consequences may pose additional risks to your investment in a BMO ETF (see **Income tax considerations** on page 58).

Table 178 identifies additional risks that apply to specific BMO ETFs. A circle (●) indicates that a particular risk applies to a particular BMO ETF.

CDS & Co., the nominee of CDS, is the registered owner of the Units of each BMO ETF, which it holds for various dealers and other persons on behalf of their clients and others.

From time to time, Units of a particular fund representing more than 10% of the NAV of that BMO ETF may be beneficially owned, directly or indirectly, by one or more of the following entities:

- a Designated Broker
- an ETF Dealer
- another dealer
- another investment fund, including a BMO Fund

If, during the 12-month period immediately preceding January 28, 2025, more than 10% of the NAV of a BMO ETF was invested in the securities of a single issuer, that investment is identified in Table 179. This may increase the concentration risk associated with investment in that BMO ETF.

Table 179: BMO ETFs holding investments in a single issuer representing more than 10% of the BMO ETF's NAV

BMO Aggregate Bond Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to investment-grade fixed-income securities of issuers in Canada (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an Index Constituent), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The BMO ETF currently invests in several other BMO ETFs.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Universe Bond Index™.

The Index is designed to be a broad measure of the Canadian investment-grade fixed-income market and includes federal, provincial, municipal, and corporate bonds. The Index consists of semi-annual-pay fixed-rate bonds issued domestically in Canada and denominated in CAD, with an effective term to maturity of greater than 1 year and a credit rating of BBB or higher. Each instrument in the Index is weighted by its relative market capitalization.

The Index is rebalanced on each business day.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO All-Equity ETF

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation by investing primarily in one or more Underlying Funds that provide exposure to a diversified portfolio of equity securities of issuers anywhere in the world.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

At least once per calendar quarter, the portfolio adviser will rebalance the BMO ETF's asset class allocations to the following targets:

- 100% equity securities

The portfolio adviser may review and adjust the BMO ETF's asset class allocations in its sole discretion, based on its assessment of economic conditions and the prospects for each of these asset classes.

The BMO ETF will employ a strategic asset allocation strategy and is expected to invest primarily in other BMO ETFs. As an alternative to or in conjunction with investing in BMO ETFs, exposure may be obtained by

investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Balanced ESG ETF

Fund details

Fund type	Global Neutral Balanced
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide a balance of income and long-term capital appreciation by investing primarily in one or more Underlying Funds that provide exposure to a diversified portfolio of equity securities and debt instruments of issuers anywhere in the world and that satisfy certain ESG-related criteria.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

At least once per calendar quarter, the portfolio adviser will rebalance the BMO ETF's asset class allocations to the following targets:

- 60% equity securities
- 40% debt instruments

The portfolio adviser may review and adjust the BMO ETF's asset class allocations in its sole discretion, based on its assessment of economic conditions and the prospects for each of these asset classes.

The BMO ETF will employ a strategic asset allocation strategy and is expected to invest primarily in other BMO ETFs. As an alternative to or in conjunction with

investing directly in BMO ETFs, exposure may be obtained by investing in equity securities and debt instruments, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns. The BMO ETF is not permitted to hold investments that are inconsistent with ESG values.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies

See

Responsible investment strategies on page 166.

The BMO ETF will select Underlying Funds based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167).

When evaluating a fund, the portfolio adviser will assign a rating to that fund based on the weighted average MSCI ESG rating of the investments in the fund's portfolio. The portfolio adviser will:

- evaluate each prospective Underlying Fund prior to investment and not invest in a fund to which it assigns a rating of B or below; and
- periodically evaluate each Underlying Fund and remove from the BMO ETF's portfolio any exposure to an Underlying Fund to which it assigns a rating of B or below.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Canadian Bank Income Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to financing instruments of Canadian banks (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Canadian Bank Income Index.

The Index includes traditional and non-traditional instruments of Canadian banks including, without limitation, fixed-income securities, preferred shares and limited-recourse-capital notes. Index Constituents are subject to minimum market capitalization, quality and liquidity screens and are weighted by market capitalization within market segments.

The Index is rebalanced infrequently, in response to market developments.

For further information, see **Indices** on page 122.

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Canadian Dividend ETF

Fund details

Fund type	Canadian Dividend & Income Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in Canada.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in Canada.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Canadian High Dividend Covered Call ETF

(formerly BMO Canadian High Dividend Covered Call Fund)

Fund details

Fund type	Canadian Dividend & Income Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in Canada, while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in Canada.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada NHA MBS 975 Index.

The Index is designed to reflect the performance of the fixed-rate 975 Pool of the Canadian National Housing Act Mortgage-Backed Securities market, denominated in Canadian Dollars. Eligible securities must have a minimum issuance size of CAD 200 million and a minimum amount outstanding of CAD 100 million, with an effective term to maturity of greater than 1 year. Each security is weighted by its relative market capitalization.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Clean Energy Index ETF

(formerly BMO Clean Energy Index Fund)

Fund details

Fund type	Global Small/Mid Cap Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of issuers in the clean energy sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an Index Constituent), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies

See

Responsible investment strategies on page 166.

The Index

Currently, the Index is the S&P Global Clean Energy Index.

The Index is a modified market-capitalization-weighted index that provides exposure to equity securities of issuers in both developed and emerging markets that are involved in clean-energy-related businesses, *e.g.*, electric utilities, multi-utilities, or independent power producers and energy traders. The Index aims to capture the performance of companies whose primary business is clean energy, using an exposure score based on the degree to which the company derives revenue from clean energy related businesses and/or generates clean power. The Index Provider uses GICS and FactSet's Revere Business Industry Classification System classifications along with Trucost Power Generation Data for utility companies to determine the eligible universe. Currently, but subject to change by the Index Provider, constituents may qualify for the eligible universe based on certain targets, including without limitation meeting minimum aggregate revenue requirements and minimum power generation from renewable sources.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Conservative ETF

Fund details

Fund type	Global Fixed Income Balanced
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and moderate long-term capital appreciation by investing primarily in one or more Underlying Funds that provide exposure to a diversified portfolio of equity securities and debt instruments of issuers anywhere in the world.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

At least once per calendar quarter, the portfolio adviser will rebalance the BMO ETF's asset class allocations to the following targets:

- 40% equity securities
- 60% debt instruments

The portfolio adviser may review and adjust the BMO ETF's asset class allocations in its sole discretion, based on its assessment of economic conditions and the prospects for each of these asset classes.

The BMO ETF will employ a strategic asset allocation strategy and is expected to invest primarily in other BMO ETFs. As an alternative to or in conjunction with investing directly in BMO ETFs, exposure may be

obtained by investing in equity securities and debt instruments, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168

BMO Corporate Bond Index ETF

Fund details

Fund type	Canadian Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian corporations (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada All Corporate Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds denominated in CAD, with an effective term to maturity greater than 1 year, a credit rating of BBB or higher and minimum size requirement of \$100 million per issue.

The Index consists of corporate bonds.

The Index is rebalanced monthly.

BMO Corporate Discount Bond ETF

Fund details

Fund type	Canadian Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income through exposure to investment grade debt instruments of Canadian corporations that trade near or below par value.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in debt instruments of Canadian corporations that:

- are investment grade;
- have a remaining term to maturity of between 1 and 10 years; and
- primarily trade near or below their par value.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Covered Call Canadian Banks ETF

(formerly BMO Covered Call Canadian Banks Fund)

Fund details

Fund type	Financial Services Equity
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to equity securities of Canadian banks, while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in securities of Canadian banks, Underlying Funds, or a combination of these. The BMO ETF currently invests in BMO Equal Weight Banks Index ETF. For more information about BMO Equity Weight Banks Index ETF, see page 212.

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Covered Call Dow Jones Industrial Average Hedged to CAD ETF

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to equity securities of issuers listed in the U.S., while mitigating some downside risk through the use of covered call options. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in the equity securities of issuers included in the Dow Jones Industrial Average (for the purposes of this BMO ETF, the **Index**) according to the weight of each security in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

The Index includes the equity securities of 30 issuers listed in the U.S., weighted by share price. Issuers are selected for inclusion in the Index by the *editors of The Wall Street Journal* according to four criteria:

- the company is not a utility or in the transportation business;
- the company has a premier reputation in its field;
- the company has a history of successful growth; and

- there is wide interest in the company among individual and institutional investors.

The Index is rebalanced infrequently and not at any regular interval.

For further information, see **Indices** on page 122.

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Covered Call Energy ETF

(formerly BMO Covered Call Energy Fund)

Fund details

Fund type	Energy Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to equity securities of issuers in the energy sector, while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of issuers in the energy sector. The BMO ETF may invest in equity securities of issuers in the renewable energy sub-sector.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- quality
- growth potential
- dividend yield
- liquidity

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

BMO Discount Bond Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to discount investment grade domestic bond issues denominated in Canadian dollars (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Universe Discount Bond Index™.

The Index is designed to be a broad measure of those Canadian investment-grade fixed-income securities that trade near or below par value, consisting of Government of Canada (including Crown Corporations), provincial, and corporate bonds. The Index consists of semi-annual-pay fixed-rate bonds issued domestically in Canada and denominated in CAD, with an effective term to maturity of greater than 1 year and a credit rating of BBB or higher. For inclusion in the Index, securities must have a coupon equal to or less than an announced multiple of the yield to maturity of the security as of the selection date. Each security in the Index is weighted by its modified market capitalization to approximate the term, duration, and sector characteristics of the FTSE Canada Universe Bond Index™.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

BMO Dow Jones Industrial Average Hedged to CAD Index ETF

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of issuers listed in the U.S. (for the purposes of this BMO ETF, the **Index**), by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are

represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Dow Jones Industrial Average (CAD hedged).

The Index includes the equity securities of 30 issuers listed in the U.S., weighted by share price. Issuers are selected for inclusion in the Index by the editors of *The Wall Street Journal* according to four criteria:

- the company is not a utility or in the transportation business;
- the company has a premier reputation in its field;
- the company has a history of successful growth; and
- there is wide interest in the company among individual and institutional investors.

The Index is rebalanced infrequently and not at any regular interval.

For further information, see **Indices** on page 122.

BMO Emerging Markets Bond Hedged to CAD Index ETF

Fund details

Fund type	High Yield Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of sovereign issuers in emerging-market countries (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market

instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg Emerging Markets Tradable External Debt GDP Weighted Capped Index CAD Hedged.

The Index is designed to provide diversified exposure to USD-denominated debt instruments of sovereign issuers in emerging-market countries spanning four broad regions: Latin America, Europe, the Middle East and Africa, and Asia. The Index is designed to be broad-based in its coverage of emerging-market sovereign issuers, yet tradable by specifically focusing on the most liquid securities and countries from each region within predefined maturity bands, *i.e.*, from 18 months to no greater than 10 years to maturity at rebalancing. The Index is differentiated by its use of gross domestic product as a measure of economy size to determine the relative weights of each country within the Basket, rather than using the market value of outstanding debt as in traditional benchmark bond indices.

The Index is rebalanced annually.

For further information, see **Indices** on page 122.

BMO Equal Weight Banks Index ETF

Fund details

Fund type	Financial Services Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of Canadian banks (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight Canada Banks Index.

The Index includes equity securities of Canadian banks, subject to minimum market capitalization and liquidity screens. Each security in the Index is allocated an equal weight rather than a market capitalization weight.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

BMO Equal Weight Global Base Metals Hedged to CAD Index ETF

Fund details

Fund type	Natural Resources Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of issuers in the base metals industry (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are

represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight Global Base Metals Index Canadian Dollar Hedged.

The Index includes equity securities of issuers in the base metals industry. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight, and the USD exposure in the Index is hedged to the CAD.

The Index is rebalanced semi-annually.

For further information, see Indices at page 122.

BMO Equal Weight REITs Index ETF

Fund details

Fund type	Real Estate Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to securities of Canadian issuers that are classified within the Real Estate Investment Trusts sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight Canada REIT Index.

The Index includes securities of Canadian issuers that are classified within the Real Estate Investment Trusts sector. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight.

The Index is rebalanced semi-annually.

BMO Equal Weight US Banks Hedged to CAD Index ETF

Fund details

Fund type	Financial Services Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of U.S. banks (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Equal Weight US Banks Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 226. The

BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight US Bank Index Canadian Dollar Hedged.

The Index includes equity securities of issuers that are constituents of the Solactive US Broad Market Index and are classified as one of the following Industry groups: Finance, US Banks, US Commercial Banks, or US Commercial Savings Institutions. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight and the USD exposure in the Index is hedged to the CAD.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

BMO Equal Weight US Health Care Hedged to CAD Index ETF

Fund details

Fund type	Sector Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of U.S. issuers in the health-care sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight US Health Care Index Canadian Dollar Hedged.

The Index includes equity securities of issuers that are constituents of the Solactive US Broad Market Index and are classified within the Healthcare sector. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight and the USD exposure in the Index is hedged to the CAD.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of U.S. issuers in the health-care sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight US Health Care Index.

The Index includes equity securities of issuers that are constituents of the Solactive US Broad Market Index and are classified within the Healthcare sector. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

BMO Equal Weight Utilities Index ETF

Fund details

Fund type	Sector Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of Canadian issuers in the utilities sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Equal Weight Canada Utilities Index.

The Index includes equity securities of Canadian issuers in the utilities sector. Index Constituents are subject to minimum market capitalization and liquidity screens. In addition, each security in the Index is allocated an equal weight rather than a market capitalization weight.

The Index is rebalanced semi-annually.

BMO ESG Corporate Bond Index ETF

Fund details

Fund type	Canadian Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian corporations that satisfy certain ESG-related criteria (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index. The BMO ETF is not permitted to hold investments that are inconsistent with ESG values.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market

instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies

See

Responsible investment strategies on page 166.

The Index

Currently, the Index is the Bloomberg MSCI Canada Corporate Sustainability SRI Index.

The Index screens issuers in the Bloomberg Canadian Corporate Index based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167). The Index captures the performance of fixed-income securities whose issuers have been assigned high ratings by MSCI ESG relative to their peers.

The Index excludes securities of companies that earn a significant portion of revenues from:

- tobacco
- adult entertainment
- alcohol
- gambling
- conventional weapons and civilian firearms
- any controversial weapons
- significant generation of nuclear power
- unconventional oil and gas

and excludes the securities of companies that MSCI ESG identifies as involved in severe business controversies (see **MSCI ESG ratings** on page 167).

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

BMO Europe High Dividend Covered Call ETF

(formerly BMO Europe High Dividend Covered Call Fund)

Fund details

Fund type	European Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in Europe, while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in Europe.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

BMO Europe High Dividend Covered Call Hedged to CAD ETF

Fund details

Fund type	European Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in Europe, while mitigating some downside risk through the use of covered call options. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Europe High Dividend Covered Call ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 238. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to dividend-paying equity securities of issuers in Europe by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Floating Rate High Yield ETF

Fund details

Fund type	Floating Rate Loan
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide exposure to a diversified portfolio of debt securities of high yield bond issuers, while aiming to mitigate the effects of interest rate fluctuations.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in debt instruments and derivative instruments that provide exposure to the credit risk of non-investment grade issuers, including U.S. issuers, and Government of Canada T-Bills. To gain high yield credit exposure, the BMO ETF may invest in debt instruments, Underlying Funds, and derivative instruments (such as credit default swaps, indices of credit default swaps, and interest rate swaps).

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;

- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

BMO Global Agriculture ETF

Fund details

Fund type	Sector Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in the agricultural sector.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of issuers in the agricultural sector. The BMO ETF may invest in equity securities of issuers that are involved in, or benefit from:

- agricultural production
- chemicals
- farm machinery
- food distribution
- packaging

The portfolio adviser will select equity securities of large-capitalization issuers for the BMO ETF's portfolio.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Global Consumer Discretionary Hedged to CAD Index ETF

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of issuers in the consumer discretionary sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are

represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Developed ex Korea Consumer Discretionary Capped 100% Hedged to CAD Index.

The Index consists of equity securities of companies classified as Consumer Discretionary in accordance with the FTSE Russell Industry Classification Benchmark classification system from the ex-Korean Developed Markets included in the FTSE Global Equity Index Series for large and mid-cap securities while imposing a company cap of 10% on all constituents included within the Index quarterly. All foreign currency exposure is hedged back to CAD.

The Index is rebalanced annually.

For further information, see **Indices** on page 122.

BMO Global High Dividend Covered Call ETF

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers anywhere in the world, while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers anywhere in the world.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be

settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Global Infrastructure Index ETF

Fund details

Fund type	Global Infrastructure Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of issuers in the infrastructure business (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Dow Jones Brookfield Global Infrastructure North American Listed Index.

The Index is a float-adjusted market-capitalization-weighted index that reflects securities actually available to investors in the marketplace. Index Constituents must be listed on a North American stock exchange, have a minimum float-adjusted market capitalization of USD 500 million, and a minimum three-month average daily trading volume of USD 1 million.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

BMO Gold Bullion ETF

Fund details

Fund type	Commodity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of the price of gold bullion by investing in long-term holdings of unencumbered gold bullion in 400-troy-ounce international bar sizes.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest substantially all of its assets in long-term holdings of unencumbered gold bullion in 400-troy-ounce international bar sizes. These holdings will consist primarily of pure, refined, and unencumbered gold bullion in London Good Delivery Bars.

The BMO ETF does not speculate with respect to short-term changes in the price of gold bullion and its holdings of gold bullion are not actively managed.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risks:

Fineness and quality risk

Bank of Montreal, the custodian of the gold bullion owned by the BMO ETF, does not inspect the fineness or quality of the gold bullion that is delivered to it. There is no assurance as to the fineness or quality of the gold bullion owned or acquired by the BMO ETF.

Custody oversight risk

Bank of Montreal, as custodian of the gold bullion owned by the BMO ETF, is responsible for the safekeeping of the BMO ETF's gold bullion. Bank of Montreal also facilitates the transfer of gold to and from the BMO ETF through unallocated gold accounts it maintains for Dealers and Designated Brokers and the BMO ETF.

Bank of Montreal is a market maker, clearer and approved weigher under the rules of the LBMA, which sets out good practices for participants in the bullion market. However, the LBMA is not an official or governmental regulatory body. Furthermore, although Bank of Montreal is generally regulated in the U.K. by the Prudential Regulation Authority and the Financial Conduct Authority, such regulators do not directly cover the gold bullion custody operations of custodians. Accordingly, the BMO ETF is dependent on Bank of Montreal to comply with the best practices of the LBMA and to implement satisfactory internal controls for its gold bullion custody operations in order to keep its gold secure.

Liquidity risk

On any Trading Day, unitholders may redeem Units of the BMO ETF for cash at a redemption price per Unit equal to the lesser of:

- 95% of the closing price for the Units on the Exchange on the effective day of the redemption; and
- the net asset value per Unit on the effective day of the redemption.

To fund the payment of the redemption price, the BMO ETF may dispose of gold bullion.

The BMO ETF's ability to so dispose of gold bullion may be restricted by an event beyond its control, such as wars, interference by civil or military authorities, civil insurrections, local or national emergencies, blockades, seizures, riots, sabotage, vandalism, terrorism, storms,

earthquakes, floods or nuclear or other explosions. During such events, the BMO ETF may experience a delay in the receipt of the proceeds of disposition until such time as it is able to dispose of gold bullion or may be able to do so only at prices which may not reflect the fair value of such investments.

Depletion of amount of bullion risk

The BMO ETF is not expected to generate any net income. Therefore, it may be required to sell gold bullion over time on an as-needed basis to pay for certain of its fees and expenses and to fund certain redemptions. As a result, the amount of gold bullion represented by each Unit of the BMO ETF will, and the NAVPS may, gradually decline over time, irrespective of whether the trading price of the BMO ETF's Units rises or falls in response to changes in the price of gold. The continuous offering of the BMO ETF's Units will not reverse this trend, as the amount of gold bullion acquired by the proceeds from such offering will proportionately reflect the amount of gold bullion represented by the Units of the BMO ETF issued pursuant thereto.

Risk of higher transaction costs

Direct purchases of gold bullion by the BMO ETF may entail higher transaction and custody costs than for other types of investments, which may affect the BMO ETF's performance.

Loss of bullion risk

There is a risk that part or all of the BMO ETF's gold bullion could be lost, damaged or stolen, notwithstanding the handling of deliveries of gold bullion by, and storage of gold bullion in, the Bank of Montreal vault. Furthermore, access to the BMO ETF's gold bullion could be restricted by natural events (*e.g.*, earthquakes), human actions (*e.g.*, wars or terrorist attacks), or pandemic situations.

The gold bullion to be purchased by the BMO ETF may be allocated by the applicable counterparty in a commercially reasonable time and manner. There will be a period of time between the time that the BMO ETF has

purchased gold bullion and the time that such gold bullion has been fully allocated to the BMO ETF, or when the BMO ETF is redeeming Units, that it will hold unallocated gold bullion. The BMO ETF will attempt to limit the period of time during which any gold bullion is unallocated. During this time, it will be subject to the credit risk of the counterparty and/or the vendors of the gold bullion. There can be no assurance that any losses attributable to holding unallocated gold bullion will be recovered by the BMO ETF.

The BMO ETF does not insure its gold bullion. Bank of Montreal maintains insurance against certain risks of physical loss or damage. However, the BMO ETF is not a direct beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. There can be no assurance that such insurance is sufficient to cover any losses that may be suffered by the BMO ETF.

BMO Gold Bullion Hedged to CAD ETF

(formerly BMO Gold Bullion Fund)

Fund details

Fund type	Commodity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide exposure to the price of gold bullion, net of fees and expenses, by investing indirectly (through an Underlying Fund) in long-term holdings of unencumbered gold bullion in 400-troy-ounce international bar sizes and will use derivative instruments to seek to hedge foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Gold Bullion ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 251. The BMO ETF will use derivative instruments to seek to hedge the foreign currency exposure back to the Canadian dollar.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the same additional risks as an investment in the Reference ETF (see **What are the risks of investing in the Fund?** on page 251).

BMO Government Bond Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to investment-grade bonds issued by Canadian governments (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada All Government Bond Index™.

The Index includes bonds issued by federal, provincial, and municipal governments in Canada. The Index consists of semi-annual-pay fixed-rate bonds denominated in CAD, with an effective term to maturity of greater than 1 year, a credit rating of BBB or higher, and a minimum size requirement of CAD 100 million per issue on new issuances.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

BMO Growth ETF

Fund details

Fund type	Global Equity Balanced
Units offered	CAD Units, Fixed Percentage Distribution Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and capital appreciation by investing primarily in one or more Underlying Funds that provide exposure to a diversified portfolio of equity securities and debt instruments of issuers anywhere in the world.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

At least once per calendar quarter, the portfolio adviser will rebalance the BMO ETF's asset class allocations to the following targets:

- 80% equity securities
- 20% debt instruments

The portfolio adviser may review and adjust the BMO ETF's asset class allocations in its sole discretion, based on its assessment of economic conditions and the prospects for each of these asset classes.

The BMO ETF will employ a strategic asset allocation strategy and is expected to invest primarily in other

BMO ETFs. As an alternative to or in conjunction with investing directly in BMO ETFs, exposure may be obtained by investing in equity securities and debt instruments, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO High Quality Corporate Bond Index ETF

Fund details

Fund type	Canadian Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to investment-grade bonds issued by Canadian corporations (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada 1-10 year A+ Corporate Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued by Canadian corporations and denominated in CAD, with an effective term to maturity of greater than 1 year and a credit rating of BBB or higher. Each instrument in the Index is weighted by its relative market capitalization.

The Index is rebalanced on each business day.

For further information, see **Indices** on page 122.

BMO High Yield US Corporate Bond Hedged to CAD Index ETF

(formerly BMO High Yield US Corporate Bond Hedged to CAD Index Fund)

Fund details

Fund type	High Yield Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to high-yield debt instruments of U.S. corporations (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO High Yield US Corporate Bond Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more

information about the Reference ETF, see page 262. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg U.S. High Yield Very Liquid Index CAD Hedged.

The Index is a more liquid version of the U.S. Corporate High Yield Index that consists of USD-denominated, non-investment-grade, fixed-rate, taxable corporate bonds. Each Index Constituent must have at least USD 500 million outstanding and must be less than 5 years from its issue date. Each Index Constituent is weighted by its relative market capitalization, but no Index Constituent may exceed 2% of the Index.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

BMO International Dividend ETF

Fund details

Fund type	International Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in countries other than Canada and the U.S.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in countries other than Canada and the U.S.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO International Dividend Hedged to CAD ETF

Fund details

Fund type	International Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in countries other than Canada and the U.S. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO International Dividend ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 264. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to dividend-paying equity securities of issuers in countries other than Canada and the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Japan Index ETF

Fund details

Fund type	Geographic Equity
Units offered	CAD Units, Hedged Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large-and mid-capitalization issuers in Japan (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive GBS Japan Large & Mid Cap Index.

The Index tracks the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in the Japanese market. It is weighted by free-float market capitalization.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO Junior Gold Index ETF

Fund details

Fund type	Precious Metals Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of gold-mining companies (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Dow Jones North America Select Junior Gold Index.

The Index is a float-adjusted market-capitalization-weighted index that tracks the securities that are classified on the Industry Classification Benchmark as gold mining. The Index is constructed by identifying and selecting, from the securities that constitute the Dow Jones Canada Total Stock Market Index and the Dow Jones U.S. Total Stock Market Index, the securities of companies that possess float-adjusted market values that are between certain established thresholds. To be included in the Index as a constituent security, an issue generally must be:

- a company's common shares or other securities that have the characteristics of common equities; and
- the security of a company that is incorporated in, or has its primary market listing in, Canada or the United States and that meets certain minimum trading volume requirements.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO Laddered Preferred Share Index ETF

Fund details

Fund type	Preferred Share Fixed Income
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to preferred shares of Canadian issuers (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive Laddered Canadian Preferred Share Index.

The Index includes preferred shares that generally have an adjustable dividend rate and are laddered using equal weights in annual reset term buckets. Securities are market-capitalization weighted within the annual term buckets. Constituents are subject to minimum market capitalization, quality, and liquidity screens.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

BMO Long Corporate Bond Index ETF

Fund details

Fund type	Canadian Long Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian corporations with an effective term to maturity generally greater than 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Long Term Corporate Bond Index™.

The Index consists of semi-annual-pay fixed-rate corporate bonds denominated in CAD, with an effective term to maturity greater than 10 years, a credit rating of BBB or higher and minimum size requirement of \$100 million per issue. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

BMO Long Federal Bond Index ETF

Fund details

Fund type	Canadian Long Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian federal issuers with an effective term to maturity generally greater than 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Long Term Federal Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued by the Government of Canada (including both non-agency and agency/crown corporations) and supra-national entities that are denominated in CAD, with an effective term to maturity greater than 10 years, a credit rating of AAA, and minimum size requirement of \$100 million per issue on new issuances. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

BMO Long Provincial Bond Index ETF

Fund details

Fund type	Canadian Long Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments issued or guaranteed by Canadian provincial governments with an effective term to maturity generally greater than 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Long Term Provincial Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued or guaranteed by Canadian provinces and provincial or territorial corporations that are denominated in CAD, with an effective term to maturity greater than 10 years, a credit rating of BBB or higher, and minimum size requirement of \$100 million per issue on new issuances. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

BMO Long Short Canadian Equity ETF

Fund details

Fund type	Alternative Equity Focused
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF:

- seeks to provide long-term capital appreciation, primarily by establishing long and short positions in equity securities of issuers in Canada;
- will invest any excess cash, directly or indirectly, in debt instruments; and
- may employ leverage to enhance returns, such that the sum of its long and short equity exposures will generally exceed 100% of its NAV.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The portfolio adviser evaluates equity securities on the basis of their fundamental characteristics, which may include:

- value factors
- quality factors
- growth factors

- technical indicators
- market sentiment

Generally, the BMO ETF will establish long positions in equity securities that the portfolio adviser regards favourably and may establish short positions in equity securities that the portfolio adviser regards unfavourably.

The BMO ETF will invest any excess cash in debt instruments including treasury securities, short-term debt, provincial or corporate bonds.

The BMO ETF may use leverage to pursue its investment objectives. To create leverage, the BMO ETF may:

- borrow money up to 50% of its NAV;
- use derivatives; and/or
- engage in short selling;

provided that under normal market conditions, the BMO ETF's aggregate exposure to all sources of leverage will not exceed 300% of its NAV.

The BMO ETF's portfolio is managed both qualitatively and quantitatively, and while the sum of its long and short equity exposures will generally exceed 100% of its NAV, its long equity exposure less its short equity exposure will generally not exceed 100% of its NAV.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

The BMO ETF is an “alternative mutual fund” for securities law purposes. Accordingly, the BMO ETF has the ability to invest in asset classes and use investment strategies that are not permitted for conventional mutual funds, such as the ability to invest more than 10% of its net asset value in securities of a single issuer, the ability to borrow cash, to short sell beyond the limits prescribed for conventional mutual funds and to generally employ leverage. While these strategies will only be used in accordance with the BMO ETF’s investment objectives and strategies, during certain market conditions they may accelerate the risk that an investment in Units of the BMO ETF decreases in value.

BMO Long Short US Equity ETF

Fund details

Fund type	Alternative Equity Focused
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF:

- seeks to provide long-term capital appreciation, primarily by establishing long and short positions in equity securities of issuers in the U.S.;
- will invest any excess cash, directly or indirectly, in debt instruments; and
- may employ leverage to enhance returns, such that the sum of its long and short equity exposures will generally exceed 100% of its NAV.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The portfolio adviser evaluates equity securities on the basis of their fundamental characteristics, which may include:

- value factors
- quality factors
- growth factors

- technical indicators
- market sentiment

Generally, the BMO ETF will establish long positions in equity securities that the portfolio adviser regards favourably and may establish short positions in equity securities that the portfolio adviser regards unfavourably.

The BMO ETF will invest any excess cash in debt instruments including treasury securities, short-term debt, provincial or corporate bonds.

The BMO ETF may use leverage to pursue its investment objectives. To create leverage, the BMO ETF may:

- borrow money up to 50% of its NAV;
- use derivatives; and/or
- engage in short selling;

provided that under normal market conditions, the BMO ETF's aggregate exposure to all sources of leverage will not exceed 300% of its NAV.

The BMO ETF's portfolio is managed both qualitatively and quantitatively, and while the sum of its long and short equity exposures will generally exceed 100% of its NAV, its long equity exposure less its short equity exposure will generally not exceed 100% of its NAV.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

The BMO ETF is an “alternative mutual fund” for securities law purposes. Accordingly, the BMO ETF has the ability to invest in asset classes and use investment strategies that are not permitted for conventional mutual funds, such as the ability to invest more than 10% of its net asset value in securities of a single issuer, the ability to borrow cash, to short sell beyond the limits prescribed for conventional mutual funds and to generally employ leverage. While these strategies will only be used in accordance with the BMO ETF’s investment objectives and strategies, during certain market conditions they may accelerate the risk that an investment in Units of the BMO ETF decreases in value.

BMO Long-Term US Treasury Bond Index ETF

Fund details

Fund type	U.S. Fixed Income
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to U.S. treasury bonds with an effective term to maturity generally at least 20 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg U.S. Treasury 20+ Year Index.

The Index measures the performance of USD-denominated, fixed-rate, nominal debt issued by the U.S. Treasury. Index Constituents must have a remaining term to maturity of at least 20 years and greater than USD 300 million outstanding.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Low Volatility Canadian Equity ETF

(formerly BMO Low Volatility Canadian Equity Fund)

Fund details

Fund type	Canadian Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in Canada that have lower sensitivity to market movements.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of large-capitalization issuers in Canada.

The portfolio adviser will select securities for the BMO ETF's portfolio that have low beta relative to their peers, and the weight of a particular security in the BMO ETF's portfolio will generally vary inversely with its beta.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Low Volatility Emerging Markets Equity ETF

Fund details

Fund type	Emerging Markets Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in emerging-markets countries that have lower sensitivity to market movements.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of large-capitalization issuers in emerging-markets countries.

The portfolio adviser will select securities for the BMO ETF's portfolio that have low beta relative to their peers, and the weight of a particular security in the BMO ETF's portfolio will generally vary inversely with its beta.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;

- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

BMO Low Volatility International Equity ETF

(formerly BMO Low Volatility International Equity Fund)

Fund details

Fund type	International Equity
Units offered	CAD Units, Hedged Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in countries other than Canada and the U.S. that have lower sensitivity to market movements.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of large-capitalization issuers in countries other than Canada and the U.S.

The portfolio adviser will select securities for the BMO ETF's portfolio that have low beta relative to their peers, and the weight of a particular security in the BMO ETF's portfolio will generally vary inversely with its beta.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units

has to foreign currencies will be hedged back to the Canadian dollar.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Low Volatility International Equity Hedged to CAD ETF

Fund details

Fund type	International Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in countries other than Canada and the U.S. that have lower sensitivity to market movements. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Low Volatility International Equity ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 286. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to equity securities of issuers in countries other than Canada and the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Low Volatility US Equity ETF

(formerly BMO Low Volatility US Equity Fund)

Fund details

Fund type	US Equity
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in the U.S. that have lower sensitivity to market movements.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities of large-capitalization issuers in the U.S.

The portfolio adviser will select securities for the BMO ETF's portfolio that have low beta relative to their peers, and the weight of a particular security in the BMO ETF's portfolio will generally vary inversely with its beta.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units

has to foreign currencies will be hedged back to the Canadian dollar.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Low Volatility US Equity Hedged to CAD ETF

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide long-term capital appreciation through exposure to equity securities of issuers in the U.S. that have lower sensitivity to market movements. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Low Volatility US Equity ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 288. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to equity securities of issuers in the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Mid Corporate Bond Index ETF

Fund details

Fund type	Canadian Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian corporations with an effective term to maturity generally between 5 and 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Mid Term Corporate Bond Index™.

The Index consists of semi-annual-pay fixed-rate corporate bonds denominated in CAD, with an effective term to maturity between 5 and 10 years, a credit rating of BBB or higher and minimum size requirement of \$100 million per issue. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Mid Federal Bond Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian federal issuers with an effective term to maturity generally between 5 and 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Mid Term Federal Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued by the Government of Canada (including both non-agency and agency/crown corporations) and supra-national entities that are denominated in CAD, with an effective term to maturity between 5 and 10 years, a credit rating of AAA, and minimum size requirement of \$100 million per issue on new issuances. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

BMO Mid Provincial Bond Index ETF

Fund details

Fund type	Canadian Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments issued or guaranteed by Canadian provincial governments with an effective term to maturity generally between 5 and 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Mid Term Provincial Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued or guaranteed by Canadian provinces and provincial or territorial corporations that are denominated in CAD, with an effective term to maturity between 5 and 10 years, a credit rating of BBB or higher, and minimum size requirement of \$100 million per issue on new issuances. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

BMO Mid-Term US IG Corporate Bond Hedged to CAD Index ETF

Fund details

Fund type	U.S. Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to investment grade debt instruments of U.S. corporate issuers with an effective term to maturity generally between 5 and 10 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO Mid-Term US IG Corporate Bond Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 298. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market

instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg US Investment Grade 5 to 10 Year Corporate Bond Capped Index CAD Hedged.

The Index measures the performance of USD-denominated, fixed-rate debt instruments issued by U.S. and non-U.S. corporations. Index Constituents must have been issued within the preceding 5 years, have a remaining term to maturity of between 5 and 10 years and greater than USD 750 million outstanding. The Index includes only the three largest issues from each issuer. Exposure to each issuer is limited to 2% of the total market value of the Index, and any excess market value is redistributed Index-wide on a *pro-rata* basis. USD currency exposure is hedged back to CAD.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

BMO Monthly Income ETF

Fund details

Fund type	Global Neutral Balanced
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide monthly distributions and modest long-term capital appreciation by investing primarily in one or more Underlying Funds that provide exposure to a diversified portfolio of income-producing investments including equity securities and debt instruments of issuers anywhere in the world.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

At least once per calendar quarter, the portfolio adviser will rebalance the BMO ETF's asset class allocations to the following targets:

- 55% equity securities
- 45% debt instruments

The portfolio adviser may review and adjust the BMO ETF's asset class allocations in its sole discretion, based on its assessment of economic conditions and the prospects for each of these asset classes.

The BMO ETF will employ a strategic asset allocation strategy and is expected to invest primarily in other

BMO ETFs. As an alternative to or in conjunction with investing directly in BMO ETFs, exposure may be obtained by investing in equity securities and debt instruments, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO MSCI ACWI Paris Aligned Climate Equity Index ETF

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in developed-market and emerging-market countries that satisfy certain ESG-related criteria (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies

See

Responsible investment strategies on page 166.

The Index

Currently, the Index is the MSCI ACWI Climate Paris Aligned Equity Index.

The Index is based on the MSCI ACWI Index, which includes the equity securities of large- and mid-capitalization issuers in developed-market and emerging-market countries. The Index is designed to:

- reduce exposure to companies with higher physical and transition climate risk;
- increase exposure to companies pursuing opportunities arising from the transition to a lower-carbon economy; and
- exceed the requirements of the EU Paris-Aligned Benchmark aligning with a 1.5°C temperature-rise scenario.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO MSCI All Country World High Quality Index ETF

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in developed-market and emerging-market countries (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI ACWI Quality Index.

The Index is based on the MSCI ACWI, which includes the equity securities of large- and mid- capitalization issuers across developed-market and emerging-market countries. The Index seeks to reflect the performance of quality issuers by identifying issuers with high quality scores based on three main fundamental variables: high return on equity, stable year-over-year earnings growth, and low financial leverage. The quality score for each security is calculated by normalizing the three fundamental variables using winsorized Z scores. Computing a Z score is a widely used method of standardizing a variable in order to combine it with other variables that may have a different unit of measurement or a different scale. Based on the quality scores, a fixed number of constituent securities are selected for the Index. The Index weights the securities by the product of their market capitalization weight in the parent index and the quality score. The Index reweights the selected quality growth stocks from the parent index to emphasize stocks with high quality scores.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO MSCI Canada Selection Equity Index ETF

(formerly BMO MSCI Canada ESG Leaders Index ETF)

Fund details

Fund type	Canadian Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in Canada that satisfy certain ESG-related criteria (for the purposes of this BMO ETF, **the Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, **an Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index. The BMO ETF is not permitted to hold investments that are inconsistent with ESG values.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168

Responsible investment strategies

See

Responsible investment strategies on page 166.

The Index

Currently, the Index is the MSCI Canada Selection Index.

The Index screens issuers in the MSCI Canada Index, which includes the equity securities of large- and mid-capitalization issuers in Canada, based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167). The Index captures the performance of equity securities whose issuers have been assigned the highest ratings by MSCI ESG within their GICS® sectors.

The index excludes securities of companies that earn a significant portion of revenues from:

- tobacco
- alcohol
- gambling
- conventional weapons and civilian firearms
- any controversial weapons
- significant generation of nuclear power
- unconventional oil and gas

and excludes the securities of companies that MSCI ESG identifies as involved in severe business controversies (see **MSCI ESG ratings** on page 167).

The Index is rebalanced quarterly.

For further information, see Indices on page 122.

BMO MSCI Canada Value Index ETF

Fund details

Fund type	Canadian Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in Canada exhibiting value style characteristics (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI Canada Enhanced Value Capped Index.

The Index is based on its parent index, the MSCI Canada Index, which includes the equity securities of large- and mid-capitalization issuers in Canada. The Index aims to capture the performance of securities that have high value characteristics relative to their peers within their GICS® sectors. Index Constituents have relatively higher value characteristics based on three variables: price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations. The value score for each security is calculated by combining the z-scores of the three variables. The Index is constructed with a fixed number of securities, by selecting constituents from their parent index based on their final value scores and a 10% security cap is applied.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

BMO MSCI China Selection Equity Index ETF

(formerly BMO MSCI China ESG Leaders Index ETF)

Fund details

Fund type	Greater China Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers with exposure to China that satisfy certain ESG-related criteria (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index. The BMO ETF is not permitted to hold investments that are inconsistent with ESG values.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies on page 166.

The Index

Currently, the Index is the MSCI China Selection Index.

The Index screens issuers in the MSCI China Index, which includes the equity securities of large- and mid-capitalization issuers with exposure to China, based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167). The Index captures the performance of equity securities

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risks:

Geographic concentration in China risk

Although the Chinese economy has grown rapidly during recent years and the Chinese government has implemented significant economic reforms to liberalize trade policy, promote foreign investment, and reduce government control of the economy, there can be no guarantee that economic growth or these reforms will continue.

The Chinese economy may also experience slower growth if global or domestic demand for Chinese goods decreases significantly and/or key trading partners apply trade tariffs or implement other protectionist measures.

whose issuers have been assigned the highest ratings by MSCI ESG within their GICS® sectors.

The index excludes securities of companies that earn a significant portion of revenues from:

- tobacco
- alcohol
- gambling
- conventional weapons and civilian firearms
- any controversial weapons
- significant generation of nuclear power
- unconventional oil and gas

and excludes the securities of companies that MSCI ESG identifies as involved in severe business controversies (see **MSCI ESG ratings** on page 167).

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

The Chinese economy is also susceptible to rising rates of inflation, economic recession, market inefficiency, volatility, and pricing anomalies that may be connected to governmental influence, a lack of publicly-available information and/or political and social instability.

The Chinese government maintains currency controls in order to achieve economic trade and political objectives and regularly intervenes in the currency market. The Chinese government also plays a major role in the country's economic policies regarding foreign investments. Foreign investors are subject to the risk of loss from expropriation or nationalization of their investment assets and property, governmental restrictions on foreign investments and the repatriation of capital invested.

Because the BMO ETF concentrates its investments in Chinese companies, these and other factors could have a negative impact on the BMO ETF's performance and increase the volatility of an investment in the Fund.

Geographic concentration in Hong Kong risk

The BMO ETF may invest a significant portion of its assets in investments in Hong Kong, which is a special administrative region of China. Investing in companies organized or traded in Hong Kong involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Mainland China is Hong Kong's largest trading partner, both in terms of exports and imports. Any changes in the Chinese economy, trade regulations or currency exchange rates may have an adverse impact on Hong Kong's economy.

Regulatory scrutiny on ADRs of Chinese companies risk

The U.S. has recently taken a harder line on Chinese businesses, including: requiring U.S. investors to pull out of Chinese companies linked to China's military, requiring Chinese companies to adhere to U.S. auditing standards in order to remain on U.S. stock exchanges and banning U.S. transactions with eight Chinese apps linked to various Chinese companies. As a result of these and other actions, and assuming some or all restrictions remain in place, the ADRs of numerous Chinese companies could be de-listed from U.S. stock exchanges which has resulted in significant political and regulatory uncertainty for Chinese companies that have issued ADRs. A de-listing of ADRs could make such ADRs less liquid and decrease their value, which would impact the performance of the BMO ETF to the extent of its investment in these ADRs. If the BMO ETF is not able to invest in ADRs through U.S. stock exchanges, it may incur additional expenses and increased currency risk associated with purchasing securities directly on non-U.S. exchanges.

BMO MSCI EAFE Selection Equity Index ETF

(formerly BMO MSCI EAFE ESG Leaders Index ETF)

The Index

Currently, the Index is the MSCI EAFE Selection Index.

The Index screens issuers in the MSCI EAFE Index, which includes the equity securities of large- and mid-capitalization issuers across 21 developed-market countries excluding Canada and the U.S., based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167). The Index captures the performance of equity securities whose issuers have been assigned the highest ratings by MSCI ESG within their GICS® sectors.

The index excludes securities of companies that earn a significant portion of revenues from:

- tobacco
- alcohol
- gambling
- conventional weapons and civilian firearms
- any controversial weapons
- significant generation of nuclear power
- unconventional oil and gas

and excludes the securities of companies that MSCI ESG identifies as involved in severe business controversies (see **MSCI ESG ratings** on page 167).

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO MSCI EAFE Hedged to CAD Index ETF

Fund details

Fund type	International Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in developed-market countries other than Canada and the U.S. (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO MSCI EAFE Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 320). The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market

instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI EAFE 100% Hedged to CAD Index.

The Index includes the equity securities of large- and mid- capitalization issuers across 21 developed-market countries excluding Canada and the U.S. The Index covers approximately 85% of the free-float-adjusted market capitalization in each country. Foreign currency exposure is hedged back to CAD.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO MSCI EAFE High Quality Index ETF

BMO MSCI Emerging Markets Index ETF

Fund details

Fund type	Emerging Markets Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid- capitalization issuers in emerging-market countries (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI Emerging Markets Index.

The Index includes the equity securities of large- and mid- capitalization issuers in emerging-market countries.

The Index covers approximately 85% of the free-float-adjusted market capitalization in each country.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

BMO MSCI Europe High Quality Hedged to CAD Index ETF

Fund details

Fund type	European Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers in Europe (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market

instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI Europe Quality 100% Hedged to CAD Index.

The Index is based on a traditional market-capitalization-weighted parent index, the MSCI Europe Index, which includes equity securities of large- and mid-capitalization issuers in Europe. The Index aims to capture the performance of quality stocks selected from the parent index by identifying stocks with high quality scores based on three main fundamental variables:

- high return on equity;
- stable year-over-year earnings growth, which may be measured by the standard deviation of earnings growth over the last five fiscal years; and
- low financial leverage, which may be measured by the debt-to-equity ratio.

The quality score for each security is calculated by normalizing the three fundamental variables using winsorized Z scores. Computing a Z score is a widely used method of standardizing a variable in order to combine it with other variables that may have a different unit of measurement or a different scale. Based on the quality scores, a fixed number of Index Constituents are selected. Each Index Constituent's weight in the Index equals the product of:

- its market capitalization weight in the parent index; and
- its quality score.

All foreign currency exposure is hedged back to CAD.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO MSCI Global Selection Equity Index ETF

(formerly BMO MSCI Global ESG Leaders Index ETF)

Fund details

Fund type	Global Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large- and mid-capitalization issuers anywhere in the world that satisfy certain ESG-related criteria (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in other BMO ETFs.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. The BMO ETF is not permitted to hold investments that are inconsistent with ESG values.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

Responsible investment strategies

See

Responsible investment strategies on page 166.

The Index

Currently, the Index is the MSCI World Selection Index.

The Index screens issuers in the MSCI World Index, which includes the equity securities of large- and mid-capitalization issuers anywhere in the world, based on MSCI ESG ratings (see **MSCI ESG ratings** on page 167). The Index captures the performance of equity securities whose issuers have been assigned the highest ratings by MSCI ESG within their GICS® sectors.

The index excludes securities of companies that earn a significant portion of revenues from:

- tobacco
- alcohol
- gambling
- conventional weapons and civilian firearms
- any controversial weapons
- significant generation of nuclear power
- unconventional oil and gas

and excludes the securities of companies that MSCI ESG identifies as involved in severe business controversies (see **MSCI ESG ratings** on page 167s).

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the MSCI USA Enhanced Value Capped Index.

The Index is based on a traditional market-capitalization-weighted parent index, the MSCI USA Index, which includes equity securities of large- and mid-capitalization issuers in the U.S. The Index aims to capture the performance of Index Constituents of the parent index that exhibit high value characteristics relative to others within a particular GICS® sector by identifying stocks with higher value characteristics based on three ratios:

- price to book value;
- price to forward earnings; and
- enterprise value-to-cash flow from operations.

The value score for each security is calculated by combining the z-scores of the three ratios.

The Index is constructed with a fixed number of securities, by selecting constituents from the parent index based on their final value scores and a 10% security cap is applied.

The Index is rebalanced semi-annually.

For further information, see **Indices** on page 122.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the NASDAQ-100 Index.

The Index is a modified market-capitalization-weighted index that tracks 100 of the largest non-financial securities listed on the Nasdaq Stock Market based on market capitalization. The Index is constructed from the securities that constitute the Nasdaq Stock Market by selecting the securities of companies that rank in the top 100 eligible securities based on market capitalization.

Generally, each Index Constituent will be:

- an eligible security type including common stocks, ordinary shares, American depository receipts, shares of beneficial interest or limited partnerships interests and tracking stocks; and
- the security of a company that is exclusively listed on the Nasdaq Global Select Market—unless the security was dually listed on another United States market prior to January 1, 2004 and has continuously maintained such listing—having an average daily trading volume of at least 200,000 shares.

Index Constituents and their weights are updated quarterly after the close of trading on the third Friday of March, June, September and December and such updates become effective at the opening of trading on the first Monday thereafter. In addition to these scheduled reviews, the Index is also reviewed and updated on an on-going basis to account for extraordinary events such as delistings, bankruptcies, spin-offs, mergers, and take-overs involving Index Constituents.

For further information, see **Indices** on page 122.

BMO Premium Yield ETF

(formerly BMO Premium Yield Fund)

Fund details

Fund type	US Equity
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation while mitigating downside risk through exposure to equity securities of large-capitalization issuers in the U.S. and derivative instruments.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in equity securities and derivative instruments to provide exposure to large-capitalization issuers in the U.S.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- quality
- dividend yield
- liquidity

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

Depending on market volatility and other factors, the BMO ETF may:

- sell call options that will be selected considering volatility, fundamental and technical analysis, price sensitivity to the broad market, and sector diversification;
- purchase call options to gain potential exposure to U.S. equity securities and U.S. markets;
- purchase put options to potentially limit the loss from significant declines of U.S. equity securities and U.S. markets; and/or
- sell put options to reduce the net cost of acquiring portfolio securities. Such options will only be written in respect of securities in which The BMO ETF is permitted to invest, and will be selected considering volatility, fundamental and technical analysis, price sensitivity to the broad market, and sector diversification.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;

- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO Real Return Bond Index ETF

Fund details

Fund type	Canadian Inflation-Protected Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to inflation-protected debt instruments of Canadian federal issuers (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Real Return Federal Non-Agency Bond Index™.

The Index consists of semi-annual-pay real return bonds issued by the Government of Canada (excluding both non-agency and agency/crown corporations and supra-national entities) that are denominated in CAD, with an effective term to maturity greater than 1 year. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO S&P 500 Hedged to CAD Index ETF

Fund details

Fund type	U.S. Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large-capitalization issuers listed in the U.S. (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO S&P 500 Index ETF (for the purposes of this BMO ETF, the

Reference ETF). For more information about the Reference ETF, see page 346. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the S&P 500® Hedged to Canadian Dollars Index.

The Index includes the equity securities of 500 of the largest issuers listed in the U.S, weighted by market capitalization.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments that are issued or guaranteed by Canadian provincial governments with an effective term to maturity generally between 1 and 5 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Short Term Provincial Bond Index™.

The Index consists of semi-annual-pay fixed-rate bonds issued or guaranteed by Canadian provinces and provincial or territorial corporations that are denominated in CAD, with an effective term to maturity between 1 and 5 years, a credit rating of BBB or higher, and minimum size requirement of \$100 million per issue on new issuances. The Index is weighted by relative market capitalization.

The Index is rebalanced daily.

For further information, see **Indices** on page 122.

BMO Short-Term Bond Index ETF

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of Canadian corporations with an effective term to maturity generally between 1 and 5 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the FTSE Canada Short Term Overall Bond Index™.

Each Index Constituent:

- is a semi-annual-pay fixed-rate bond;
- is denominated in CAD;
- has an effective term to maturity between 1 and 5 years;
- has a credit rating of BBB or higher; and
- in the case of a new issuance, has an issue size of at least CAD100 million.

Index Constituents are weighted by relative market capitalization. The Index is rebalanced daily.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Short-Term Discount Bond ETF

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income through exposure to debt instruments by investing primarily in debt instruments of Canadian corporations that have a remaining term to maturity of between 1 and 5 years and that trade near or below par value.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in debt instruments of Canadian corporations, Government of Canada, provinces and municipalities that:

- are investment grade;
- have a remaining term to maturity of between 1 and 5 years; and
- primarily trade near or below their par value.

The BMO ETF will invest more than 30% of its NAV in debt instruments of Canadian federal, provincial, and

municipal governments that satisfy the three preceding criteria.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Short-Term US IG Corporate Bond Hedged to CAD Index ETF

Fund details

Fund type	U.S. Corporate Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to investment grade debt instruments of U.S. corporations with an effective term to maturity generally between 1 and 5 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg US Investment Grade 1 to 5 Year Corporate Bond Capped Index CAD Hedged.

Each Index Constituent:

- has been issued by a U.S. or non-U.S. industrial, utility, or financial corporation;
- is denominated in USD;
- is less than 5 years from its issue date;
- has an effective term to maturity between 1 and 5 years; and
- has an issue size of at least USD 750 million.

The Index includes only the three largest issues from each issuer represented in the Index. Exposure to each issuer is limited to 2% of the total market value of the Index, and any excess market value is redistributed index-wide on a *pro rata* basis. USD currency exposure is hedged back to CAD.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO Short-Term US TIPS Index ETF

Fund details

Fund type	U.S. Fixed Income
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to inflation-protected debt instruments of the U.S. federal government with an effective term to maturity generally between 0 and 5 years (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg US Government Inflation-Linked 0-5 Year Bond Index.

Each Index Constituent:

- is issued by the U.S. government;
- has both principal and interest linked to inflation;
- is denominated in USD;
- has an effective term to maturity between 0 and 5 years; and
- has at least USD 500 million outstanding.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

BMO SPDR Communication Services Select Sector Index ETF

Fund details

Fund type	Sector Equity
Units offered	CAD Units, Hedged Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large-capitalization issuers in the U.S. communications services sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in The Communication Services Select Sector SPDR® Fund (for the purposes of this BMO ETF, the **Reference ETF**). However, the BMO ETF may invest substantially all of its assets in the Index Constituents, in

substantially the same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Communication Services Select Sector Index.

The Index is a subindex of the S&P 500 Index. Each Index Constituent is a constituent of the S&P 500 Index whose issuer is assigned to the Communications Services sector by the GICS® framework.

Index Constituents are weighted by float-adjusted market capitalization.

The Index is rebalanced quarterly.

Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Financial Select Sector Index.

The Index is a subindex of the S&P 500 Index. Each Index Constituent is a constituent of the S&P 500 Index whose issuer is assigned to the Financials sector by the GICS® framework.

Index Constituents are weighted by float-adjusted market capitalization.

The Index is rebalanced quarterly.

BMO SPDR Health Care Select Sector Index ETF

Fund details

Fund type	Sector Equity
Units offered	CAD Units, Hedged Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to equity securities of large-capitalization issuers in the U.S. health care sector (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in The Health Care Select Sector SPDR® Fund (for the purposes of this BMO ETF, the **Reference ETF**). However, the BMO ETF may invest substantially all of its assets in the Index Constituents, in substantially

the same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Health Care Select Sector Index.

The Index is a subindex of the S&P 500 Index. Each Index Constituent is a constituent of the S&P 500 Index whose issuer is assigned to the Health Care sector by the GICS® framework.

Index Constituents are weighted by float-adjusted market capitalization.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO Target 2027 Canadian Corporate Bond ETF

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income for a limited period of time ending on or about November 19, 2027 or an earlier date upon not less than 60 days' notice to unitholders (for the purposes of this BMO ETF, the **Maturity Date**) by investing primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2027 or within the twelve months preceding the Maturity Date, and by using derivatives to implement a hedging strategy designed to minimize reinvestment risk in 2027 as a result of staggered bond maturity dates.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2027 and use derivative instruments to hedge the reinvestment risk.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

Concentrated counterparty risk

Due to the fact that the BMO ETF may have only a limited number of derivatives counterparties and the BMO ETF may pay these derivatives counterparties the full principal amounts received from maturing bonds during the course of 2027 for repayment to the BMO ETF with interest on or before the Maturity Date, the

BMO ETF may be subject to concentrated credit exposure to those counterparties during 2027.

BMO Target 2028 Canadian Corporate Bond ETF

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income for a limited period of time ending on or about November 24, 2028 or an earlier date upon not less than 60 days' notice to unitholders (for the purposes of this BMO ETF, the **Maturity Date**) by investing primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2028 or within the twelve months preceding the Maturity Date, and by using derivatives to implement a hedging strategy designed to minimize reinvestment risk in 2028 as a result of staggered bond maturity dates.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2028 and use derivative instruments to hedge the reinvestment risk.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

Concentrated counterparty risk

Due to the fact that the BMO ETF may have only a limited number of derivatives counterparties and the BMO ETF may pay these derivatives counterparties the full principal amounts received from maturing bonds during the course of 2028 for repayment to the BMO ETF with interest on or before the Maturity Date, the

BMO ETF may be subject to concentrated credit exposure to those counterparties during 2028.

BMO Target 2029 Canadian Corporate Bond ETF

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income for a limited period of time ending on or about November 30, 2029 or an earlier date upon not less than 60 days' notice to unitholders (for the purposes of this BMO ETF, the **Maturity Date**) by investing primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2029 or within the twelve months preceding the Maturity Date, and by using derivatives to implement a hedging strategy designed to minimize reinvestment risk in 2029 as a result of staggered bond maturity dates.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in investment-grade debt instruments of issuers in Canada that have an effective maturity in 2029 and use derivative instruments to hedge the reinvestment risk.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

Concentrated counterparty risk

Due to the fact that the BMO ETF may have only a limited number of derivatives counterparties and the BMO ETF may pay these derivatives counterparties the full principal amounts received from maturing bonds during the course of 2029 for repayment to the BMO ETF with interest on or before the Maturity Date, the

BMO ETF may be subject to concentrated credit exposure to those counterparties during 2029.

BMO Ultra Short-Term Bond ETF

(formerly BMO Ultra Short-Term Bond Fund)

Fund details

Fund type	Canadian Short Term Fixed Income
Units offered	CAD Units, Accumulating Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to invest primarily in short-term debt instruments denominated in CAD.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in:

- money market instruments;
- high-interest savings accounts; and/or
- debt instruments, including corporate, Government of Canada, provincial and municipal, with a remaining term to maturity of 1 year or less.

The BMO ETF may invest in floating-rate instruments, including floating-rate preferred shares, whose rate reset

frequency does not exceed 1 year and whose remaining term to maturity does not exceed 5 years.

The BMO ETF will invest primarily in assets denominated in CAD.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in:

- money market instruments;
- high-interest savings accounts; and/or
- debt instruments, including corporate and government, with a remaining term to maturity of 1 year or less.

The BMO ETF may invest in floating-rate instruments, including floating-rate preferred shares, whose rate reset frequency does not exceed 1 year and whose remaining term to maturity does not exceed 5 years.

The BMO ETF will invest primarily in assets denominated in USD.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions

from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO US Aggregate Bond Index ETF

Fund details

Fund type	U.S. Fixed Income
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to debt instruments of issuers in the U.S. (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Bloomberg US Aggregate Bond Index.

The Index is designed to be a broad measure of the U.S. investment-grade fixed-income market and includes federal, provincial, municipal, and corporate bonds.

Each Index Constituent is publicly offered for sale in the U.S., has at least one year remaining to maturity, and is part of an issue that satisfies the following requirements:

- in the case of Treasury, government-related and corporate instruments, a minimum outstanding amount of USD 300 million;
- in the case of mortgage-backed securities and pool aggregates, a minimum outstanding amount of USD 1 billion;
- in the case of asset-backed securities, a minimum deal size of USD 500 million and a minimum tranche size of USD 25 million; and
- in the case of commercial mortgage-backed securities, a minimum deal size of USD 500 million, a minimum outstanding amount of USD 200 million outstanding, and a minimum tranche size of USD 25 million.

The Index is rebalanced monthly.

For further information, see **Indices** on page 122.

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO US Dividend ETF

Fund details

Fund type	US Equity
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in the U.S.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in the U.S.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO US Dividend Hedged to CAD ETF

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in the U.S. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO US Dividend ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 403. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to dividend-paying equity securities of issuers in the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO US Equity Buffer Hedged to CAD ETF – April

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide unitholders with income and appreciation (before fees, expenses and taxes) that matches to the extent possible the return of a Reference Index designed to measure the large-cap segment of the US equity market (for the purposes of this BMO ETF, the **Index**) up to a cap (before fees, expenses and taxes), while providing a buffer against approximately the first 15% (before fees, expenses and taxes) of a decrease in the market price of the Index, including through the use of derivatives, over a period of approximately one year from on or about the first business day of April of each year to on or about the last business day of March of the following year, referred to as the Target Outcome Period.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF invests primarily in BMO S&P 500 Hedged to CAD Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 344.

The BMO ETF may also invest in Converge Options that reference the price return of the Reference ETF to

employ a “target outcome strategy”. Target outcome strategies seek to produce predetermined investment outcomes based upon the performance of the Reference ETF during the applicable Target Outcome Period. The predetermined outcomes sought by the BMO ETF, which include a buffer against approximately the first 15% (before fees, expenses and taxes) of decrease in the market price of BMO ETF and a predetermined upside cap (before fees, expenses and taxes), are based on the return of the Reference ETF over the Target Outcome Period.

Each Target Outcome Period will be a period of approximately one year from on or about the first business day of April of each year to on or about the last business day of March of the following year.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio

adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the S&P 500® Hedged to Canadian Dollars Index (see **The Index** on page 345).

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

An investment in the BMO ETF is subject to the following additional risk:

Target outcome period risk

An investor that purchases units of the BMO ETF other than on the first day of a Target Outcome Period and/or redeems or sells units of the BMO ETF prior to the end of a Target Outcome Period may experience results that are very different from the target outcomes sought by the BMO ETF for that Target Outcome Period. To achieve the intended target outcomes sought by the BMO ETF for a Target Outcome Period, an investor must hold units of the BMO ETF for that entire Target Outcome Period.

Please refer to the Structured Outcome ETFs' website (www.bmogam.com/ca-en/products/structured-outcomes) for important information about the Target Outcome Period start and end dates and the applicable cap and buffer.

Cap risk

If the market price of the Reference ETF increases during a Target Outcome Period in excess of the maximum for that Target Outcome Period, the BMO ETF will not benefit from the excess gains or any further distributions on the Reference ETF.

BMO US Equity Buffer Hedged to CAD ETF – January

Fund details

BMO US High Dividend Covered Call ETF

(formerly BMO US High Dividend Covered Call Fund)

Fund details

Fund type	US Equity
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

Depending on market volatility and other factors, the BMO ETF will sell call options on some or all of the equity securities that it owns. These call options may be settled either physically or in cash and may be traded either on an exchange or in the over-the-counter market.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in the U.S., while mitigating some downside risk through the use of covered call options.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in dividend-paying equity securities of issuers in the U.S.

The portfolio adviser will select equity securities for the BMO ETF's portfolio using a rules-based methodology that considers variables including, without limitation, the following:

- dividend growth
- dividend yield
- payout ratio
- liquidity

BMO US High Dividend Covered Call Hedged to CAD ETF

Fund details

Fund type	US Equity
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income and long-term capital appreciation through exposure to dividend-paying equity securities of issuers in the U.S., while mitigating some downside risk through the use of covered call options. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO US High Dividend Covered Call ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 413. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to dividend-paying equity securities of issuers in the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

See **What are the risks of investing in the BMO ETFs?** on page 168.

BMO US Preferred Share Hedged to CAD Index ETF

Fund details

Fund type	Preferred Share Fixed Income
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to preferred shares of issuers in the U.S. (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO US Preferred Share Index ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information

about the Reference ETF, see page 417. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with investing directly in Underlying Funds and/or derivative instruments, exposure may be obtained by investing in the Index Constituents, in substantially the same proportions as the Index Constituents are represented in the Index. The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive US Preferred Share Select Hedged to CAD Index (NTR).

Index Constituents:

- must be listed for trading in the U.S.;
- have a minimum market capitalization of USD 100 million; and
- meet the minimum liquidity requirements.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO US Preferred Share Index ETF

Fund details

Fund type	Preferred Share Fixed Income
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to replicate, to the extent possible before fees and expenses, the performance of an index that provides exposure to preferred shares of issuers in the U.S. (for the purposes of this BMO ETF, the **Index**) by investing, directly or indirectly, in:

- the instruments included in the Index (each, for the purposes of this BMO ETF, an **Index Constituent**), each in proportion to its weight in the Index; and/or
- instruments that are not Index Constituents but that have, in the aggregate, investment characteristics similar to the Index or to a subset of the Index Constituents

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests substantially all of its assets in the Index Constituents, in substantially the

same proportions as the Index Constituents are represented in the Index.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The portfolio adviser may use a sampling strategy in selecting investments for the BMO ETF. Under this strategy, the portfolio adviser uses qualitative and/or quantitative analysis to select Index Constituents and/or other instruments that, in the aggregate, resemble the Index or a subset of its Index Constituents in terms of performance attributes, key risk factors and other appropriate financial characteristics. Where this strategy is used, the performance of the BMO ETF may not track the performance of the Index as accurately as if the BMO ETF had invested exclusively in the Index Constituents in proportion to their weights in the Index.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

The Index

Currently, the Index is the Solactive US Preferred Share Select Index (NTR).

Index Constituents:

- must be listed for trading in the U.S.;
- have a minimum market capitalization of USD 100 million; and
- meet the minimum liquidity requirements.

The Index is rebalanced quarterly.

For further information, see **Indices** on page 122.

BMO US Put Write ETF

Fund details

Fund type	Miscellaneous – Income and Real Property
Units offered	CAD Units, Hedged Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income through exposure to put options on equity securities of large-capitalization issuers in the U.S.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will invest primarily in a portfolio of put options to gain exposure to equity securities of large-capitalization issuers in the U.S.

The portfolio adviser will select the equity securities on which the BMO ETF will sell put options by considering the following variables:

- volatility
- fundamental analysis
- technical analysis
- price sensitivity to the broad market
- sector diversification

Depending on market volatility and other factors, the BMO ETF may sell to the buyer of the option, for a premium, either a right to sell the security at an exercise price or, if the option is cash settled, the right to a payment equal to the difference between the exercise price and the value of the security. The put options that the BMO ETF will sell may be either exchange traded options or over-the-counter options. Generally, the BMO ETF will hold investments that qualify as "cash cover" (as defined in NI 81-102, such as treasury bills and securities issued by a money market fund, and other investments listed in the definition of "cash cover"). The BMO ETF may also purchase put options to potentially limit the loss from significant stock price declines.

The exposure that the portion of the BMO ETF's portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar. The exposure that the portion of the BMO ETF's portfolio attributable to the Hedged Units has to foreign currencies will be hedged back to the Canadian dollar.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

BMO US Put Write Hedged to CAD ETF

Fund details

Fund type	Miscellaneous – Income and Real Property
Units offered	CAD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to provide income through exposure to put options on equity securities of large-capitalization issuers in the U.S. The BMO ETF uses derivative instruments to seek to hedge the foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

Currently, the BMO ETF invests primarily in BMO US Put Write ETF (for the purposes of this BMO ETF, the **Reference ETF**). For more information about the Reference ETF, see page 419. The BMO ETF will use derivative instruments to hedge the foreign currency exposure back to the Canadian dollar.

As an alternative to or in conjunction with obtaining exposure to put options on equity securities of large-capitalization issuers in the U.S. by investing in the Reference ETF, the exposure may be obtained by investing in equity securities, Underlying Funds and/or derivative instruments.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;
- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.

What are the risks of investing in the Fund?

BMO USD Cash Management ETF

Fund details

Fund type	U.S. Fixed Income
Units offered	CAD Units, USD Units
Eligible for registered plans	Yes
Portfolio adviser	BMO Asset Management Inc. Toronto, Ontario

What does the Fund invest in?

Investment objective

The BMO ETF seeks to maximize current income, while at the same time preserving capital and maintaining liquidity, by investing primarily in high-quality short-term debt instruments denominated in USD.

The fundamental investment objective may only be changed with the approval of a majority of the votes cast at a meeting of the BMO ETF's investors called for that purpose.

Investment strategies

The BMO ETF will aim to maximize current income by investing primarily in U.S. T-Bills, denominated in USD, and other short-term debt instruments of appropriate term, quality and yield. The BMO ETF will aim to seek capital preservation, ensuring sufficiently high liquidity and generating income.

The BMO ETF may, in accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described elsewhere (see **What does the Fund invest in?** on page 165):

- use derivatives for hedging and non-hedging purposes;

- enter into securities lending agreements, repurchase agreements and/or reverse repurchase agreements; and
- engage in short selling,

provided that if the BMO ETF does so, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

The BMO ETF may invest a portion of its assets in Underlying Funds, including BMO Funds.

The BMO ETF may temporarily depart from its investment objectives and/or strategies by investing all or a portion of its assets in cash, money market instruments, and/or money market funds. The portfolio adviser may take this action for defensive purposes, for liquidity purposes, or for other reasons.
